DESCRIPTIVE SUMMARY

This document is the United States' Motion, through and on behalf of the Bureau of Land Management, for Summary Judgment in subcases listed on the attached exhibit A.

UNITED STATES' MOTION FOR SUMMARY JUDGMENT

Claimant, the United States of America (hereinafter "United States"), by and through its attorneys, pursuant to Rule 56(c) of the Idaho Rules of Civil Procedure, moves for entry of a summary judgment. As grounds therefor, Claimant states:

BACKGROUND

The United States claims the water rights listed on the attached exhibit A for de minimis amounts of water for a stockwatering purpose pursuant to the description of these rights in the Standard Forms No. 5 submitted for each subcase. The Standard Forms No. 5 contain descriptions of elements of water rights that differ from the elements of the right as claimed and recommended by IDWR in the Director's Report. These differences involve legal matters of proper form and content of the stockwater decree that are the subject of the pending Basin-Wide Issue No. 12. This basin-wide issue will determine form and content questions applicable to this and other de minimis stockwatering rights. For this reason, the United States incorporates by way of reference in support of this motion all briefing submitted by the United States for basin-wide issue no. 12.

CONCLUSION

For the reasons set forth herein and on the submitted briefing in Basin-Wide Issue No. 12, the United States respectfully requests this Court enter an Order pursuant to I.R.Civ.P 56(c) concluding that the United States of America is entitled as a matter of law to the decree of a water right as stipulated to in the Standard Forms No. 5 for these subcases.

No oral argument is requested in support of this motion.

Respectfully submitted this 13th day of August, 1996.
