RE: Evidence of Priority

RESPONSE DEADLINE

MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **May 1, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Hailey 011410.

THE UNITED STATES OF AMERICA,

To All To Whom These Presents Shall Come,

Greeting:

WHEREAS, a Certificate of the Register of the Land Office at Hailey, Idaho, has been deposited in the General Land Office, whereby it appears that full payment has been made by the claimant JULIUS BLUME, Assignee by mesne conveyance of Joseph H. Horton, according to the provisions of the Act of Congress of April 24, 1920, entitled "An Act making further provision for the sale of the Public lands," and the acts supplemental thereto, for the Lots one, two and three and the north half of the northeast quarter of Section twenty-six and the southeast quarter of the southeast quarter of Section twenty-three in Township fifteen north of Range nineteen east of the Boise Meridian, Idaho, containing two hundred fifty-seven and forty-one-hundredths acres according to the Official Plat of the Survey of the said Land, returned to the General Land Office by the Surveyor-General:

NOW KNOW YE, That the UNITED STATES OF AMERICA, in consideration of the premises, and in conformity with the several Acts of Congress in such case made and provided, HAS GIVEN AND GRANTED and by these presents DOES GIVE AND GRANT, unto the said claimant and to the heirs of the said claimant the Tract above described; TO HAVE AND TO HOLD the same, together with all the rights, privileges, immunities and appurtenances, of whatsoever nature, thereunto belonging, unto the said claimant and to the heirs and assigns of the said claimants forever; subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local customs, laws, and decisions of courts; and there is reserved from the lands hereby granted, a right of way thereon for ditches or canals constructed by the authority of the United States.

This patent is issued in lieu of patent No. 431863, dated September 17, 1914, which has been canceled.

((((((SEAL))))))

IN TESTIMONY WHEREOF, I Woodrow Wilson President of the United States of America, have caused these letters to be made Patent, and the Seal of the General Land Office to be hereunto affixed. GIVEN under my hand, at the City of Washington, the SIXTEENTH day of MAY in the year of our Lord one thousand nine hundred and SIXTEEN and of the Independence of the United States the one hundred and FORTIETH.

DUE TO PRIORITY DATE DISCREPANCY? (Y/N)

DATABASE N FIELD EXAMINER

ARE THERE OBVIOUS REASONS TO QUESTION THE PRIORITY DATE CLAIMED? Y() N()

REMARKS:

claimant submitted the following:

- (1) affidavit by William L. MULLICK 1930
- (2) " " of RALPH W. HUTCHISON 1926
- (3) PATENT FOR LANDS NONE
- (4) Feb 20, 1900 Deed NONE

Based on item #2 above 1926

As this division system is shown with A72-04034 and the P12 for A72-04034 is somewhat identical with these water from this right considered that the two systems were developed concurrently. Affidavit is A72-04034 at least to prove the same date that the invention was made in 1900. The Feb 20, 1900 RECOMMENDED PRIORITY DATE: 1926 deed references appear to be further references to. 04-01-1900 - 1926 ditch indicating the development of an irrigation system.

REVIEWED BY

DATE

11-20-92

As this P12 is prior to & linked with the P12 for A72-04034 which was recommended with a 1900 priority date I am recommending this right also with a 1900 priority date

Recommended date 4-1-1900

DUE TO SOURCE DISCREPANCY?	(Y/N)	N	

REMARKS:

The diversion works is a wing wall in the Salmon River carrying water to a cement headgate and then to the Ditch. The recommended P/D is that point where the wing wall goes from porous back to a solid canal. Since water diverted is returned to the river at the headgate, the headgate is located within the claimed P/D. A recommended changing the P/D legal doc to the one listed on pg 5.

DUE TO PERIOD FROM/TO DISCREPANCY? (Y/N) N

D. PERIOD OF USE:

RECOMMEND AS CLAIMED?
RECOMMEND TO WR STANDARDS OR OTHER?

Yes Mr. Douglas Y (X) N (X) Explain in remarks, below.

REMARKS:

The claimant did not permit the true irrigation rotation practice nor did the current lease holder (Jim Douglas). I discussed the irrigation analysis program used for divide calculations; he felt that as the year as this would would likely be similar to the neighbors that have the divide, that their rotation practice would likely represent this area as well. The neighbor operates with a 10 day rotation practice. Multiple analysis gives a recommended diversion rate of 5.95 CFS.

the bench ground east of 93 running from the south west corner, northeast to include some ground north of the farmstead. The use at farm time consisted of a wheel line west of 93 for that 20+ acres and a mainline laying in the ditch east of 93 and running north east roughly to the 'Swale' that delineates the slope change prev. described with hand lines covering the P/U. The pumping system has been upgraded from the 15 hp pump used for flood irrigation to a 60 HP pump tied into the pressure system. This change was apparently made in 1993. I have not found an existing right for that use. The current lessee has only operated the place for one year and did not have a personal knowledge of the historical use.

Salmon River flood system.

The delivery system is shared with Thornock (P/U lays east of this system) and consists of a rock wing diverting water into a ditch system that splits into two main ditches at the south west corner of the P/U. Irrigation water generally flows north to northeast across the P/U. A few cross ditches exist on the ground but the system is primarily just a wild flooding operation.

one ditch segment going south east along the eastern border of highway 93 for just ~~along~~ of $\frac{1}{8}$ mile with irrigation flow going southeast to east. The other segment goes west under Highway 93 to irrigate 20+ acres on that side. The ditch forms the western border of the P/u with H-93 forming the east border. The Ditch eventually goes east to again cross under 93 to then flow north (bordering 93 on the east. It continues north northeast paralleling 93 until it reaches the end of the first ditch described above.

When the ditch first joins the P/u north of the farmstead. (previously described) a ditch also runs North east along 93 to irrigate ground somewhat off the bench ground the irrigation flows south east to south to eventually reach a swale that designates a slope change as described on the bench P/u. This swale separates Mcs P/u with the Salmon River flood system P/u. The Bench P/u crop is predominately alfalfa, alfalfa grass mix. This P/u overlaps with the sprinkler system.

Salmon River Sprinkler System

POOR ORIGINAL

DATE: 4-21-94PAGE: 1/4AGENT: KKCFILES: A72-04025A72-00151 A72-07055
00152ATTACHMENT SUBJECT: System description

The Dunfee P/U is irrigated with Morgan Creek water, Salmon River water flood irrigated P/U, and Salmon River water pumping system for sprinkler irrigation. The Morgan Creek water P/U overlaps with the pumping system for Salmon River water and the Salmon River flood system is considered a separate system with no overlapping rights.

The P/U is roughly two parcels physically with one portion being the ground on the 'bench' that borders Highway 93 (either side) and the low ground that receives Salmon river water from a ditch system @ at the South end of the P/U that irrigates the majority of that ground. Ground off the bench (primarily in Sec. 23) is also flood irrigated with Morgan Creek & the division between the systems is a swale that marks the slope change from running downhill South east for the Morgan Cr. P/U to running downhill north north east for the Salmon River. (See map for location)

Morgan Creek water (specifically).

This system is unique in that the supply ditch from Morgan Creek joins the P/U North of the farmstead, swings east around the farmstead and then divides with

orig. A72-00149

For A72-04025

ATTACHMENT SUBJECT: Salmon River diversions

A72-04032 original claim amended on 9-23-93 to shift acres from this claim to A72-04034 based upon planimeter acreage determination of both parcels. The claimed diversion rate was also increased to reflect the soils analysis rate determination. (see attached analysis sheets.)

Per Phyllis Rose - Del Fish & Game, the diversion of Salmon River water was measured on 6-2-93 at 18.2 cfs. The measurement location was downstream approx 100 to 150' from the Fish & Game fish screen S-23. The ditch forks approx 40' from screen & two measurements were made, one on each canal. Fish & game also made a measurement of the ditch in 1959 & found 19.8 cfs being diverted. only one ditch measured (which ditch unknown) on 7-7-93 - found 4.9 cfs; 9-9-93 - 4.9 cfs F & G measurements. Measurements are downstream from Duffer Pump site for A72-07055.
