RE: Evidence of Priority

RESPONSE DEADLINE
MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by May 1, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Re: Preliminary Recommendation of SRBA Claims 72-04081, 72-04082 & 72-04083

Dear Mr. & Mrs. Cutler,

Enclosed please find the recommendations of the claims you filed in the SRBA. Also attached is a color GIS layout that illustrates the irrigation uses. If you have any disputes with these recommendations, you need to contact our office or me as soon as possible. The reports will be submitted for final recommendation next week.

If you disagree with IDWR's recommendations, you will have an opportunity to file an objection to the Director's Report with the court. When the Director's Report is filed with the court, you will be mailed a notice that will contain more information about the objection process.

Please feel free to contact this office or me if you have further questions or need additional assistance.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Clelland', is written over a horizontal line.

4082	3.0		
4083	6.0	Salmon R.	IDFG meas. @ #33B = 2.4 cfs

#33B was not capacity.

- less acres are under this source.
- POD in dco repair @ Tumels.

Duty calculations:

$$4081/4082: \quad \frac{2.60 \text{ cfs}}{114 \text{ ac}} = .0228 \text{ cfs/ac}$$

- most of this land is all under sprinklers.
- Cutler said pipeline limit is 3 cfs.

4083: gravity system is irrigating 17.1 ac.
not the full 47.4 recommended.

$$\frac{2.40 \text{ cfs}}{17.1 \text{ ac}} = 0.14 \text{ cfs/ac} \quad \text{vs soil DBB of } .13 \text{ cfs/ac.}$$

seems what is expected!

based on review of fish screen photos &
observation of ditch flow in 1993 it is possible
for this ditch to carry the claimed 6.0 cfs.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
