RE: Evidence of Priority

RESPONSE DEADLINE
MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by **May 1, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

The undersigned, first being duly sworn, deposes and says as follows:

1. I was born in 1908 and came to the Challis area of Custer County, Idaho, in 1926.

2. Further, I acted as Water Master over the Challis Creek water rights for about four years in the 1970's. Therefore, I am familiar with the water rights referred to in the exhibits attached as Exhibit A, A-1, A-2, and A-3.

3. Upon review of various plats and maps of the area, I can state that the lands referred to in the various exhibits as the place of use were being irrigated in 1926 when I first arrived in this area. It is my best recollection and belief that the priorities referred to were in use on those lands as early as 1926, and further, I do know as a certainty that the 1910 and 1911 priorities were being delivered to these lands many, many years before I was Water Master in the 1970's, and that I continued to allow the use of those rights as Water Master.

4. I swear the above statement is true and correct information and is based upon my knowledge and experience.

STATE OF IDAHO)

The undersigned, first being duly sworn, deposes and says as follows:

1. I was born in 1908 and have basically resided in Custer County my entire lifetime. During my youth, I grew up on a ranch being irrigated from Challis Creek so I became very familiar with the delivery and use of Challis Creek water at an early age.

2. I have reviewed an aerial photo of the lands in Sections 8, 9, 3, 4, and 16, in Township 14 North, Range 19 East, Boise Meridian, Custer County, Idaho, and have reviewed the Exhibits attached as Exhibits A, A-1, A-2, and A-3, made a part of this affidavit. Further, I can state that I personally irrigated most of the lands described as the place of use on the Exhibits for a few years during the mid-1960's using the water rights described. Further, being very familiar with the delivery and use of water and the irrigation of lands in the area, I can state that from my best personal recollection, knowledge and experience, these rights were used on the lands described as early as the summer of 1924. At that time, we commonly referred to the rights as "high water." I do believe the rights were used prior to that time, but my personal recollections of these matters commence when I was 15 or 16 years of age.

3. These statements are based upon my personal knowledge and recollections.

The undersigned, first being duly sworn, depose and say as follows:

1. We, the undersigned, were adults in 1966 when we purchased certain lands in Township 14 North, Range 19 East, Boise Meridian, Custer County, Idaho. From that date (including the growing season of that year), we were familiar with and/or personally involved in the irrigation of the lands at the place of use indicated on the attached Exhibits A, A-1, A-2, and A-3, made a part hereof, from that time up to the present date.

2. From our individual recollections, we state that the water referred to in the respective exhibits and from the source(s) shown has been applied to beneficial use on the lands listed from the date of our purchase. The extent of use has varied somewhat from one season to the next depending upon the flows available, but annual use has occurred since and including 1966.

3. We have referred to various maps, plats and other data available and state to the best of our knowledge, recollection, experience and belief that the within statements are accurate and correct.

RE: 72-04162, 72-04163, 72-10409

Dear Mr. Gammache,

This letter is in response to the Notices of Error (NOEs) you recently filed with IDWR regarding the Director's proposed recommendation of the claims listed above. Your NOEs questioned the priority dates.

The Department's policy is to recommend beneficial use claims with a priority date of one day junior to the signing of the decree in the area. In your case, that date is October 10, 1991 and I have recommended the priority dates accordingly.

If you still do not agree with the proposed IDWR recommendation to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.

Sincerely,

Jeanie Robertson

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.
