MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by May 1, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

In August of 1965 Salmon River Electric put a power line to the Fish & Game Fish Screen on our property. In September of 1965 power poles to the Fish Screen had to be moved out of our pasture because of new ground washing out poles. Diagram on work order sheet shows route of power line when poles were moved out side of field. Actual date we started using water was June, 1964. We have two photos - one black & white dated 1966 and one colored dated 1981. Both show irrigated ground.

Memo to File

A72-04/69

by STEVE CLELLAND

6-24-93

This water right is pumped from a ditch that diverts water from the Salmon River. The water is pumped to a sprinkler system to irrigate lands above the said ditch, 2.1 acres as claimed.

Since the land is less than 5 acres the additional Diversion rate per acre of 0.03 cfs/acre was applied.

The pump is capable to pump 0.22 cfs per the theoretical calculation. This is not the daily continuous use however, and the water is free for use by others on the ditch at those times which describes an informal rotation policy.

* Recommended rate 0.06 cfs for sprinkler of 2.1 acres

The Stock use claimed is incidental to the irrigation uses. Even the claim states it is instream useage (within the Ditch the Stock is not watered from this system except when it is used for irrigation. * Recommended the Stock use be removed from this right and recognized by the general provisions as an incidental right.

I called to tell her I had stopped by to do the Exam for her adjudication claim. She said they have been up logging and I just caught her briefly.

She said they have a 5 HP pump in the ditch. (if she was not right she would call me back later.)

I ask if the Ditch ran water year round and she said no. I ask how they watered the stock and she said the Domestic well was used. (A72-10053)

THEORETICAL RATE OF FLOW:

$$Q = \frac{(8.8) \times (\text{H.P.}) \times (\text{EFF.})}{\text{TDH}}$$

Q = CFS

H.P. = Total Brake Horsepower of pumping plant (including booster)

EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)

TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]

LIFT = depth to water in FEET from land surface to pumping water level

PSI = pumping pressure measured in psi near pump
(if open discharge assume zero [0])

$$Q = \frac{(8.8) (5) (0.70)}{[(2) + (60 \times 2.31)]} = \frac{30.8}{140.6} = 0.219 \text{ cfs}$$
