RE: Evidence of Priority

RESPONSE DEADLINE

MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date,** has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled **"Evidence of Priority"**. The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date"**.

Please submit the required evidence supporting the priority date(s) by **May 1, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

COMMUNICATION DOCUMENTATION

He called to follow-up on the discussions we had earlier... I found no OBJ in the file or on record. He thought he had dealt with it in Challis, I told him he needs to file the OBJ form to keep the court from issuing the Partial Decree. Then we can sit down and work out the details of a settlement resolution. I am sending him the forms and some copies of the AJ file docs to help him with the OBJ forms. Sent to PO Box 179, Challis. RE: SRBA Claim(s) 72-04192A, 72-04192B

Dear Claimant:

Please find the enclosed copy of the Notice of Completed Administrative Proceeding, which the department has filed with the SRBA Court regarding the above referenced claims. You have received this notice pursuant to SRBA Court Administrative Order 11 requiring IDWR to report to the court and interested parties any pending changes to adjudication claims in basins for which a Director's Report has been filed with the court.

Please contact this office if you have any questions about the notice or the administrative process.

RE: Notice of Error/Objection for SRBA claims 72-04192A & 72-04192B

Dear Mr. Hunt,

This letter is in response to the Notice(s) of Error (NOE) you recently filed with IDWR and the Director's recommendation of the claim(s) listed above. Your NOE has been reviewed by IDWR, but, due to the limited response time, I was unable to coordinate a resolution of your concerns before the Director's Report was filed with the SRBA court. We have spoke by phone of some of these issues and we will have a chance to meet and discuss your concerns after the Objection is filed.

Since you still disagree with IDWR's recommendations, you should file an Objection to the Director's Report with the court. This Objection form is enclosed for your use. IDWR will work with you to resolve these disputed issues, including efforts to obtain additional data or information.

Please feel free to contact me at our office if you need further information.

Sincerely,

STEVE CLELLAND
Sr. Water Resource Agent

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Acres, Flow Rate

2. Describe the changes you wish to make in the proposed recommendation:

Need 6.19 C.F.S. Claimed.

3. Give a brief explanation as to why you disagree with these portions:

92 Acres Are Irrigated (not 83.3)
Need Amount Claimed because of Conveyance Loss. And Ground Requires
Large Amount of water to push the sets thru, if smaller Amount of water
used water only goes approx. 40' makes a Bubbling Noise & Sinks especially
on the first Irrigation.

I AGREE with this proposed recommendation; no changes need to be made.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

then with conveyance losses associated with the old delivery system via lower McGowan Ditch. These losses are assumed to have been left in that ditch and are not subject to transfer.

The new Delivery System of Challis Irr. Canal has actually supplied the conveyance loss to deliver this right. From Warm Spring Creek to Redwood, The Creek has supplied the conveyance loss. The Delivery Ditch from Warm Spring to POU has made water returns to offset any losses shown. See 2-2-94
