RE: Evidence of Priority

RESPONSE DEADLINE
MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit. The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, proof must be provided supporting the priority date you have claimed.

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date".

Please submit the required evidence supporting the priority date(s) by May 1, 1992, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

RE: Notice of Error/Objection for SRBA claims 72-04192A & 72-04192B

Dear Mr. Hunt,

This letter is in response to the Notice(s) of Error (NOE) you recently filed with IDWR and the Director's recommendation of the claim(s) listed above. Your NOE has been reviewed by IDWR, but, due to the limited response time, I was unable to coordinate a resolution of your concerns before the Director's Report was filed with the SRBA court. We have spoke by phone of some of these issues and we will have a chance to meet and discuss your concerns after the Objection is filed.

Since you still disagree with IDWR's recommendations, you should file an Objection to the Director's Report with the court. This Objection form is enclosed for your use. IDWR will work with you to resolve these disputed issues, including efforts to obtain additional data or information.

Please feel free to contact me at our office if you need further information.

Sincerely,

STEVE CLELLAND
Sr. Water Resource Agent

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

Flow Rate Recommendation:

2. Describe the changes you wish to make in the proposed recommendation:

Need 200 Inches Claimed.

3. Give a brief explanation as to why you disagree with these portions:

Need 200 Inches To get Enough water to Irrigate with
because of Loss in Delivery Ditch and Rotation is 5-6 Days
on most of the Ground.
Delivery Ditch + Eastern Side of Property is Extremely Rocky + Sandy.

☐ I AGREE with this proposed recommendation; no changes need to be made.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

DIRECTIONS TO PROPERTY / REMARKS:

We walked across the river to reach this Island Ditch Division. Did not know what was needed for measuring purposes and no measurement was made at this time. Ditch was not flowing at capacity Division. (see photo) I walked the entire Ditch system w/ Ryan Hunt and found irrigation was as claimed. Irrigation of this ground produced good pastures whereas the natural oak area ~~area~~ was either Dry or short & green. Once the Ditch left the claimed POU it entered and was collected in a slough area. No irrigation from this ditch appears to take place below or after the hunt area.

* FLOW ESTIMATES

Based on my field observations:

Ditch is 6' wide,

$$6' \times 0.67' = 4.02 \text{ ft}^2$$

Flow was approx. 8" deep

estimate velocity @ 1 ft / 2 seconds.

$$4.02 \times 1 \frac{\text{ft}}{2 \text{ sec}} = 2.01 \text{ cfs}$$

(est. flow on 8-4-93 by SC)

make the deep flow @
measurement of the full operation @
time of year.

(see flow estimate below.)

this would be within reason of the
flow I observed at my farm.
estimate system was at 1/2 its capacity,
therefore capacity is about 4 cfs as claimed.
see 2-1-94
