RE: Notice of Error for SRBA claim 72-07072

Dear Mr. Leuzinger,

This letter is in response to the Notice(s) of Error (NOE) you recently filed with IDWR regarding the Director's preliminary recommendation of the claim(s) listed above. Your NOE requests an increase in the acreage of the recommendation as listed in your claim.

Under Idaho law, a water right is limited to the amount of water beneficially used for the purposes for which the water right was established.

You received a copy of the GIS map to show you the area recommended as the irrigated place of use. The acreage is limited to that found actually irrigated. Please review the map you received and I am sure you will see every irrigated acre is shown as part of the place of use for this right. Based on aerial photographs from the 1988 USFS photo and my field examination of the site in 1993, I am unable to confirm the additional acreage as irrigated land. Without more substantial documentation I am unable to recommend additional acres at this time.

IDWR welcomes any additional evidence or documentation you may provide to show where the additional acres may be located or that they are currently irrigated for beneficial uses. Until such evidence is demonstrated, the recommendation will remain at 7.7 acres.

If you still disagree with IDWR's recommendations, you will have an opportunity to file an objection to the Director's Report with the court. When the Director's Report is filed with the court, you will be mailed a notice that will contain more information about the objection process.

Please feel free to contact this office or me if you have further questions or need additional assistance.

Sincerely,

STEVE CLELLAND
Sr. Water Resource Agent
