Who's the claimant? I have Fish & Game as an O-owner and BLM as C-owner, but the license was issued to Fish & Game in 1993. BLM did not submit this record in its data to us with all the other claims. I'm confused. Thanx for your help.

Customer Name: David Langman, US Fish and Wildlife

From: Vikie Hancock

He called today with a question on the ownership of the above right. He indicated that Fish and Game had forwarded information on this claim to US Fish and Wildlife. He was confused as to why F and G claimed ownership of the land when his records indicated BLM did. I told him that our records had been changed to reflect BLM as current owner of the claim and F and G as original owners. He requested copies of our files for his records, and also informed me that Fish and Wildlife was discussing changing the ownership from BLM to F and W, as they ran the hatchery. He will keep me informed. I sent the requested copies this date, and also a change of ownership form.

RE: Evaluation of Fish Propagation and Calculation of Annual Diversion Volume

INPUT:

Depth 4 feet
Width 20 feet
Length 72 feet
• sum of all raceway dimensions

Days of Use 365 days
Flow into Facility 2 cfs
(May be adjusted to meet acceptable change per hours for fish propagation)

Permitted Amounts 15 cfs
Permitted rate = 365 days
Days of operation =

CALCULATIONS:

Cubic feet in one hour (cubic feet per second * 3600 seconds per hour) = 7200 cubic feet
Number of times flow will fill the facility in one hour (Facility Volume cubic feet / flow cubic feet) = 1.3 times
Fish Facility Volume 5760 cubic feet

Find how many changes can occur in one year:
One change = 48 minutes
Hours in one year = 8760 hours
Number of changes per year = 10950 changes

Find one year diversion volume in acre feet:
1 acre foot = 43560 cubic feet
Facility Volume = 5760 cubic feet
Facility Volume = 0.13 acre feet

Compare Volumes:

Annual Volume = 1447.9 acre feet
Based on Facility Change (Total Diversion Volume = Fish facility volume * changes / hours)

Annual Diversion Volume = 10859.7 acre feet
(Based on Permits)

*Use smallest Volume

Because this is a holding facility rather than an actual propagation facility, we will allow the high diversion rate. Otherwise it would be reduced from 15 cfs to no more than 2 cfs.

D. FLOW MEASUREMENTS

☐ Additional Data Sheets Attached

1.	Measurement Equipment	Type	Make	Model No.	Serial No.	Size	Calib. Date
	5' Rect weir suppressed						

2. Measurements:

Pool above weir is small in velocity is high and sensations are needed to get exact flow.

Capacity - $h = 1.01'$ from water measurement manual by Bureau of Rec. page 262 table 4. $Q = 16,900 cfs$.

E. FLOW CALCULATIONS

☐ Additional Computation Sheets Attached

1. Measured Method:

$$Q = 16,900 cfs - capacity.$$

2. Alternate Method for Checking Purposes:

F. PUMP EFFICIENCY DATA (Optional)

Discharge Pressure: $\text{psi} \times 2.31 = \text{ft (1)}$; Dynamic pumping level: ft (2)
Total Head: $(1) + (2) = \text{ft (3)}$; Flow rate: cfs (4)

Water HP: $(3) \times (4) \div 8.8 = \text{hp (5)}$
Meter Input KW: $3.6 \times \text{CTR or MULT} \times \text{PTR} \times \text{NV} \div \text{T} = \text{hp (6)}$

Meter Input HP: $(6) \times 1.34 = \text{hp (7)}$
Panel Input KW: $\text{Ave PF} \times \text{Ave Volts} \times \text{Ave Amps} \div 1000 = \text{hp (8)}$

Panel Input HP: $(8) \times 1.34 = \text{hp (9)}$ Efficiency: $(5)/(9) \times 100 = \text{efficiency (10)}$

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_a = (\text{Acres irrigated}) \times (\text{Irrigation Requirement}) = \text{acre-ft}$

$V_{da} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = \text{acre-ft}$

$V = \text{Smaller of } V_a \text{ and } V_{da} = \text{acre-ft}$

2. Volume Calculations for Other Uses:

Receivers: $301 \times 10^1 \times 3.5' \times 2 = 2,100 \text{ ft}^3 = 0.054 \text{ AF}$

Fish Trap: $12' \times 14' \times 4' = 672 \text{ ft}^3 = 0.0154 \text{ AF}$

Even though water management is not ideal and flow rate is probably a little more, corrections are not needed since capacity is greater than amount applied for.

' recommended amount applied for'

1. Recommended Amounts

Beneficial Use	Period of Use From To	Rate of Diversion Q (cfs)	Annual Volume V (afy)
Fish Propagation	Jan Dec 31	15.0 cfs	
Totals:		15.0 cfs

JUL 02 1987

Department of Water Resources

July 1, 1987

Mr. Jim Johnson
Water Distribution Supervisor
Department of Water Resources
Statehouse Mall

Dear Mr. Johnson:

RE: Permit 72-7185

I am requesting a variance to allow the Idaho Department of Fish and Game to measure discharge only for the above-mentioned water right on the East Fork of the Salmon River. The attached drawing shows the layout of the facility. The facility is used to trap and hold steelhead for spawning from mid-March through April.

The facility is also used to trap and hold chinook salmon for spawning from approximately June 1 to mid-September. A small dam backs water up to the intake structure, and the water exits via a fish ladder approximately 108 feet downstream from the intake structure. When the facility is not in operation, two large radial gates are opened to allow fish passage. The concrete holding ponds, trap, and fish ladder all have waterstop at the wall and slab junction to prevent leakage.

Please advise if more information is needed. Thank you for your consideration of this matter.

Sincerely,

Phil Jeppson, P.E.
Engineer Supervisor

WATER RIGHT LICENSE

WATER RIGHT NO. 72-07185

Priority: April 23, 1982

Maximum Diversion Rate: 15.00 CFS
Maximum Diversion Volume: 10859.7 AF

This is to certify, that STATE OF IDAHO
DEPT OF FISH & GAME
PO BOX 25
BOISE ID 83720

has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated April 23, 1982; and
has submitted Proof of Beneficial Use on July 14, 1987. An examination indicates
that the works have a diversion capacity of 16.900 cfs of water from:

SALMON RIVER, EAST FORK tributary to SALMON RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
FISH PROPAGATION	01/01 to 12/31	15.00 CFS	10859.7 AF

LOCATION OF POINT(S) OF DIVERSION:

NWNW , Sec. 14, Township 09N, Range 17E
CUSTER County

PLACE OF USE: FISH PROPAGATION
TWN RGE SEC

09N 17E 14 NWNW

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Water used under this right if discharged into a natural channel shall meet Idaho Water Quality Standards.
6. The issuance of this right in no way grants any right-of-way or easement across the land of another.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 72-7185, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before August 1, 1987.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: Measuring devices of a type approved by the Department shall be permanently installed and maintained at the point of diversion and the point of effluent discharge.

The permit shall not be assigned or sold without first securing the written approval of the Department of Water Resources.

Water used under this permit if discharged into a natural channel shall meet Idaho Water Quality Standards.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

Witness my hand this 26th day of August, 1982.

ADJUDICATION MEMO 32

TO: Adjudications Staff
FROM: Lynne Krogh-Hampe
DATE: August 20, 1992
RE: Conditions, Standard Remarks, and Status Codes

There are a variety of changes marked throughout this memo, so please review thoroughly.

The standard remarks table is now ready to use. The standard remarks table differs from the standard condition table in two ways. First, the standard remark table generally sets forth remarks that will require some modification (usually fill in the blanks) when added to the "R" record. Second, the standard remark table includes some status code remarks that do not require modification, but nonetheless need to be added to remarks so that the remark will show up in the report on the list of claims/rights not recommended.

The code for each condition and remark is listed below with a SHORT explanation as to when that code is used, for quick identification. NOTE that this short explanation is not a thorough analysis of when and how that condition or remark is to be used - you may need to refer to the claim investigation manual, the adjudication memos, or other sources for further information.

DATA REVIEW { Where a right will be recommended with numerous remarks and/or conditions, attention should be paid to the order in which they are data entered, so that they will appear in final form in an order that "reads" well.

A. PERMIT CONDITIONS

All permits should contain standard condition A01, which provides that the right is subject to completion in accordance with the statute and remains subject to all conditions set forth in the permit.

The conditions stated in the permit should not be included in the recommendation of the permit, since these are incorporated by reference in the standard condition.

B. LICENSE CONDITIONS

Unlike permits, license conditions will not be incorporated in the report by reference to the license. On the other hand, the recommendation of a water right based on a license should not automatically include every condition set forth on the license, since many of the standard licensing conditions will be covered by general provisions in the report.

Therefore, when a water right is recommended based on a license which contains conditions, each condition should be carefully reviewed to determine whether it should be restated in

the recommendation for the water right. If the condition will be covered by the general provisions to be included in the report, then it should not be included in the recommendation of the water right. The general provisions are now more limited than originally proposed, so fewer of the standard license conditions will be covered by a general provision. In particular, conditions concerning measuring devices and control works or water quality should be continued (in AJ form) in the recommendation of the water right.

If the condition is a specific limitation of the right to be recommended, then it should be included, but it may need to be rephrased slightly for consistency. (For example, references to the director or to the department should be changed to IDWR, references to this license should be changed to this right, etc.) If you have a question as to whether a condition on a license should be included in the recommendation of the water right, or as to proper wording, then refer the question to legal staff for further review.

NOTE: A copy of the license must be used to review licensing conditions; only recent licenses (late 7000 series) have all the conditions shown in the WR database.

A list of the standard conditions as of _____ is attached to this memo. Some of the standard conditions should simply be omitted since they will be covered by a general finding or conclusion. Some of the standard licensing conditions will be rephrased slightly as an adjudication condition. Below is a list of the codes for the standard licensing conditions, which indicates what should be done as to a particular condition. NOTE there may be conditions in addition to those on the license that should be included in the recommendation of the right; this list indicates only what should be done with existing standard conditions. NOTE that where a substitution is indicated, the substitution is a standard condition, unless a standard remark is specifically indicated.

901 through 905- omit (The 901 series state general law which should apply with or without the condition.)

R01- use M01 instead

R02- use M02 instead

R03- use M10 instead

R04- ~~omit~~ Where the water right is made subject to regulation by a watermaster who would not otherwise regulate it, then use REMARK B09 instead; otherwise omit. Where it appears that such a remark would be appropriate, the claim should be forwarded for further review, since it may be appropriate to state not only that the right is subject to regulation by the watermaster, but also to state how it will be regulated.

R05- omit (Use AJ combined use limits where appropriate.)

WATER RIGHT LICENSE

WATER RIGHT NO. 72-07185

Priority: April 23, 1982

Maximum Diversion Rate: 15.00 CFS
Maximum Diversion Volume: 10859.7 AF

This is to certify, that STATE OF IDAHO
DEPT OF FISH & GAME
PO BOX 25
BOISE ID 83720

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated April 23, 1982; and has submitted Proof of Beneficial Use on July 14, 1987. An examination indicates that the works have a diversion capacity of 16.900 cfs of water from:

SALMON RIVER, EAST FORK tributary to SALMON RIVER

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
FISH PROPAGATION	01/01 to 12/31	15.00 CFS	10859.7 AF

LOCATION OF POINT(S) OF DIVERSION:

NWNW , Sec. 14, Township 09N, Range 17E
CUSTER County

PLACE OF USE: FISH PROPAGATION
TWN RGE SEC

09N 17E 14 NWNW

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Water used under this right if discharged into a natural channel shall meet Idaho Water Quality Standards.
6. The issuance of this right in no way grants any right-of-way or easement across the land of another.
