The United States of America

To all to whom these presents shall come, Greeting:

WHEREAS, In pursuance of the provisions of the Revised Statutes of the United States, Chapter Six, Title Thirty-two, and legislation supplemental thereto, there are now deposited in the Bureau of Land Management of the United States the Plat and Field Notes of Survey and a Certificate of the Land Office at Boise, Idaho, accompanied by other evidence whereby it appears that

Tuscarora Mining Corporation

has entered and paid for the CM#2, CM#3, CM#4, CM#5, CM#11, CM#12, CM#13, CM#14, CM#19, CM#20, and CM#21 lode mining claims, designated as Survey No. 3617, embracing a portion of Sections 34 & 35 in Township 12 north of Range 16 east and Sections 2 & 3 in Township 11 north of Range 16 east of the Boise Meridian, Custer County, Idaho, the said claims being more particularly described in the official field notes and depicted on the official plats which are expressly made a part of this patent and copies of which are attached hereto.

The lands involved contain 215.188 acres.

NOW KNOW YE, That there is therefore, pursuant to the laws aforesaid, hereby granted by the United States unto the said

Tuscarora Mining Corporation

the said mining premises hereinbefore described, and not expressly excepted from these presents, and all that portion of said veins, lodes, or ledges, and of all other veins, lodes, and ledges throughout their entire depth, the tops of apexes of which lie inside of the surface boundary lines of said granted premises in said survey extended downward vertically, although such veins, lodes, or ledges in their downward course may so far depart from a perpendicular as to extend outside the vertical side lines of said premises: PROVIDED, That the right of possession to such outside parts of said veins, lodes, or ledges shall be confined to such portions thereof as lie between vertical planes drawn downward through the end lines of said survey so continued in their own direction that such planes will intersect such exterior parts of said veins, lodes, or ledges; AND PROVIDED FURTHER, That nothing herein contained shall authorize the grantee herein to enter upon the surface of a claim owned or possessed by another.

TO HAVE AND TO HOLD said mining premises, together with all the rights, privileges, immunities, and appurtenances of whatsoever nature thereunto belonging, unto the said grantee above named and to its successors and assigns forever; subject nevertheless to the following conditions and stipulations:

FIRST. That the premises hereby granted shall be held subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local laws, customs, and decisions of the courts. And there is reserved from the lands hereby granted a right-of-way thereon for ditches and canals constructed by the authority of the United States.

SECOND. That in the absence of necessary legislation by Congress, the Legislature of Idaho may provide rules for working the mining claims or premises hereby granted, involving easements, drainage, and other necessary means to its complete development.

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat. 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.

Re: Cyprus Thompson Creek Mining Company Claim A72-07193

Dear Steve:

I am responding to your correspondence of December 21, 1993 regarding the above matter. As I indicated to you during our telephone conversation on December 22, 1993, I will proceed to prepare an amended notice of claim for claim A72-07193 and obtain the proper signature of the claimant. I will then forward the amended claim to you for processing.

In this regard, I should mention one item which I failed to discuss with you during our telephone conversation. During November, 1993, Cyprus Thompson Creek Mining Company was sold by the owner of the company, Cyprus Minerals Company, as part of a merger between Cyprus Minerals Company and Amax. The Cyprus Thompson Creek Mining Company is now referred to as the Thompson Creek Mining Company. Consequently, the president of Thompson Creek Mining Company, Mr. Steve Mooney, will be the signator on the amended claim.

Additionally, we will be filing the required documentation with the Department of Water Resources to reflect the change in ownership of the Thompson Creek Mine and the related water rights.

As I indicated during our telephone conversation, we will attempt to provide you with the amended claim for A72-07193 by January 7, 1994. However, it may be difficult to submit the amended claim prior to that date. If this is not acceptable, please contact me in writing prior to that date.

RE: Change in Notice of Appearance of Counsel on the Snake River Basin Adjudication Claims for Owen Ranches, Pioneer Irrigation District, Cyprus Thompson Creek Mining Company, Conversion Industries U.S.A., Inc. and Settlers Irrigation District

Dear Scott:

The five computer reports enclosed confirm the change in firm and address you requested in your letter dated February 13, 1992. By comparing these reports to the list you supplied with your letter, you will see not all of the water right claims listed in your attachments were changed. Those claim records not changed are filed by persons other than your client(s).

The possibility of questions I raised in our telephone conversation last week were resolved for my part. If you have any questions or need some points clarified, please feel free to contact me.

Thank you for supplying the claim lists in an orderly fashion.

Sincerely,

Donald V. Shaff
Manager, Adjudication Section

EXHIBIT A 72-7193

I-9395

The United States of America

To all to whom these presents shall come, Greeting:

WHEREAS, In pursuance of the provisions of the Revised Statutes of the United States, Chapter Six, Title Thirty-two, and legislation supplemental thereto, there are now deposited in the Bureau of Land Management of the United States the Plat and Field Notes of Survey and a Certificate of the Land Office at Boise, Idaho, accompanied by other evidence whereby it appears that

Tuscarora Mining Corporation

has entered and paid for the CM#2, CM#3, CM#4, CM#5, CM#11, CM#12, CM#13, CM#14, CM#19, CM#20, and CM#21 lode mining claims, designated as Survey No. 3617, embracing a portion of Sections 34 & 35 in Township 12 north of Range 16 east and Sections 2 & 3 in Township 11 north of Range 16 east of the Boise Meridian, Custer County, Idaho, the said claims being more particularly described in the official field notes and depicted on the official plats which are expressly made a part of this patent and copies of which are attached hereto.

The lands involved contain 215.188 acres.

NOW KNOW YE, That there is therefore, pursuant to the laws aforesaid, hereby granted by the United States unto the said

Tuscarora Mining Corporation

the said mining premises hereinbefore described, and not expressly excepted from these presents, and all that portion of said veins, lodes, or ledges, and of all other veins, lodes, and ledges throughout their entire depth, the tops of apexes of which lie inside of the surface boundary lines of said granted premises in said survey extended downward vertically, although such veins, lodes, or ledges in their downward course may so far depart from a perpendicular as to extend outside the vertical side lines of said premises: PROVIDED, That the right of possession to such outside parts of said veins, lodes, or ledges shall be confined to such portions thereof as lie between vertical planes drawn downward through the end lines of said survey so continued in their own direction that such planes will intersect such exterior parts of said veins, lodes, or ledges; AND PROVIDED FURTHER, That nothing herein contained shall authorize the grantee herein to enter upon the surface of a claim owned or possessed by another.

TO HAVE AND TO HOLD said mining premises, together with all the rights, privileges, immunities, and appurtenances of whatsoever nature thereunto belonging, unto the said grantee above named and to its successors and assigns forever; subject nevertheless to the following conditions and stipulations:

FIRST. That the premises hereby granted shall be held subject to any vested and accrued water rights for mining, agricultural, manufacturing, or other purposes, and rights to ditches and reservoirs used in connection with such water rights, as may be recognized and acknowledged by the local laws, customs, and decisions of the courts. And there is reserved from the lands hereby granted a right-of-way thereon for ditches and canals constructed by the authority of the United States.

SECOND. That in the absence of necessary legislation by Congress, the Legislature of Idaho may provide rules for working the mining claims or premises hereby granted, involving easements, drainage, and other necessary means to its complete development.

IN TESTIMONY WHEREOF, the undersigned authorized officer of the Bureau of Land Management, in accordance with the provisions of the Act of June 17, 1948 (62 Stat. 476), has, in the name of the United States, caused these letters to be made Patent, and the Seal of the Bureau to be hereunto affixed.

SRBA CLAIM NUMBER 72-07193

**STANDARD FORM 1
OBJECTION
ATTACHMENT A**

The quantity should be 20.89 c.f.s (or 15,123.11 afy) for all uses. The quantity for industrial storage and industrial from storage should not be limited to 1600 afy.

In addition, the limitation stating that "use of this right with Right No. 72-07257 is limited to a total combined annual diversion volume of 2916 AF" should be amended or eliminated.

SRBA CLAIM NUMBER 72-07193

**STANDARD FORM 1
OBJECTION
ATTACHMENT B**

This water right, as decreed, should include a remark confirming that water may be used for industrial, industrial storage, and industrial from storage purposes throughout the mine site.

SRBA CLAIM NUMBER 72-07193

STANDARD FORM 1
OBJECTION
ATTACHMENT C

Quantity

The system which implements the industrial storage and industrial from storage uses is in continuous operation. Thus, even though the capacity of the holding pond is approximately 1600 acre feet, the actual volume diverted may exceed that amount.

In addition, the Director's Report for this water right states that "[u]se of this right with Right No. 72-07257 is limited to a total combined annual diversion volume of 2916 af." That limitation should be deleted or amended for the following reasons: (1) When Thompson Creek filed its Amended Notice of Claim for this water right, it listed the total consumptive use at 2916 acre feet per year. The requirement that a notice of claim include the annual consumptive use has now been deleted from Idaho Code section 42-1409. (2) Before it was amended in 1997, Idaho Code section 42-1411 stated that the Director's Report could include the annual volume of consumptive use and the annual volume of diversion of water. Obviously, the two were considered to be different elements. In 1997, Section 42-1411 was amended, as was Section 42-1409, to delete any reference to the annual volume of consumptive use. However, that does not mean that annual volume of consumptive use then became the same as the annual volume of diversion. (3) Similarly, the annual volume of consumptive use is not necessarily the same as the annual diversion volume. More water may need to be diverted than that which is actually consumed.

Place of Use

The water under this right is used throughout the mine site. Although the legal description for the place of use as set forth in the Director's Report is correct, Thompson Creek is requesting that the water right as decreed include a remark confirming that water may be used for industrial, industrial storage, and industrial storage uses throughout the mine site.

Dear Mr. Campbell,

This letter is in response to the Notice(s) of Error (NOE) you recently filed with IDWR regarding the Director's preliminary recommendation of the claim(s) listed above.

Your NOE indicates the preliminary recommendations are incorrect but fails to point out the specific errors made in each right you addressed. Therefore, I am unable to respond to your NOE reply with any corrections or revisions due to the vague generality of the errors described on such a variety of claims.

Since it appears you are objecting to the right being recommended, your complaints may be better addressed in the Objection phase of the process. If you still disagree with IDWR's recommendations, you will have an opportunity to file an objection to the Director's Report with the court. When the Director's Report is filed with the court, you will be mailed a notice that will contain more information about the objection process.

Please feel free to contact this office or me if you have further questions or need additional assistance.

Sincerely,

STEVE CLELLAND

ANALYSIS OF WATER REQUIREMENTS
PERMITS 72-7193 AND 72-7257

Flow and Consumptive use

The two permits represent the water supply for the operation of the ore concentrator. At its maximum capacity of 35,000 tons of ore per day (per Jamie Sturgess during exam) the concentrator requires a water flow of approximately 30 cfs. In normal operation, all flows of Bruno Creek are diverted into the tailings impoundment and the concentrator uses water reclaimed from the tailings and seepage return ponds. The Salmon River pumping plant supplies water to make up the difference between the process requirements and the water supplied from Bruno Creek. If no water is available from Bruno Creek or in a startup situation, the Salmon River pumps have the capacity to supply the entire operating requirement until sufficient water is stored in the impoundments to operate the plant on reclaimed water.

Water balance information developed during the design of the tailings impoundment is based on a capacity of 25,000 tons per day. Adjustment of the water amounts estimated to be absorbed by slimes and sands by a factor of 1.4 gives the following estimates of water consumption at an operating capacity of 35,000 tons of ore per day:

WINTER OPERATION (274 days)

Flow consumed: 1830 gpm (4.21 cfs)
Volume consumed: 2299 acre-feet

SUMMER OPERATION (91 days)

Flow consumed: 1558 gpm (3.47 cfs)
Volume consumed: 627 acre-feet

Total volume consumed per year: 2916 acre-feet

Stored volume

The tailings impoundment is designed to be able to store a probable maximum flood event (PMF). This is estimated to be 1530 acre-feet in the design report. Additionally, the impoundment has capacity to store 160 acre-feet over any 10-day period. The design storage quantities justify licensing a quantity of 1600 acre-feet for industrial storage.

MEMORANDUM

TO: FILES 72-7193, 72-7219, 72-7257 & 72-7220

FROM: JIM JOHNSON

RE: MEETING WITH SCOTT CAMPBELL

DATE: 28-NOV-1988

On this day Scott Campbell, attorney for the permit holder met with me to discuss the recommendations made by the field examiner for licensing the above named permits.

PERMIT 72-7220

The place of use was changed to include the SWNE & SENE.

The field report describes the place of use for domestic to include only the change house located in NWSE, however, water is also used for domestic purposes in the shop, and at the crusher building.

PERMITS 72-7219, 72-7193 & 72-7219

The place of use was changed to include the NENE as well as the NWNE because the building straddles the 1/4 1/4 line.

The field report does confirm the close proximity of the building to the line therefore to be sure license was not in error the additional description was added.
