Recommendation review of Ingram water rights on Warm Spring Creek

SRBA Claims: A72-10141, A72-10142, A72-10143, A72-10144 & A72-04096
Permit: 72-07359 & SRBA claim A72-07359

11/20/1998
Steve Clelland

I accompanied Mel Schulte, IDWR, as he examined the systems for permit 72-07359. While he gathered information for the permit I was observing the systems to confirm the SRBA claims on file. We worked jointly throughout the day directed at times by Mr. Will Ingram.

Measurements: We measured the irrigation flows delivered from the power plant tailraces with polysonic equipment <See attached>. We measured the main diversion from Warm Spring Creek, the main canal to the power uses, using standard current meter equipment. The current meter measurements consistently resulted in about a 20.0-cfs flow reading. It contradicted the parshall flume installed by Mr. Ingram that read a flow of 28.0 cfs. During several exam visits to the property and flume, Mel Schulte indicates the flume could never be supported with other measurement techniques and he believed the flume reading to be in error. After reviewing the files and exam notes I agree with Mr. Schulte's finding of the flume. After reviewing all the measurements taken on the system, I find the best flows measured during the 1992-1993 seasons result in a total flow rate from Warm Spring Creek of 25.0 cfs.

The permit 72-07359 was filed and based on increased flow rates as a result of the Mt. Borah earthquake in 1983. Any increase in the flow of the spring appears to have been a temporary affect and is not supported by IDWR measurements.

POD's: Points of Diversion as claimed by Mr. Ingram in the SRBA appear to include several re-diversions of the same waters. Those PODs listed in the recommendation show diversions of actual live stream flows. Re-diversions are not listed in the recommendations.

POU & Acres: Place of use very closely matches that of the boundaries drawn by Mr. Ingram on the attached ASCS map sheets. This information, along with the GIS data used by IDWR, was combined to obtain the most accurate place of use description available. Actual acreage was then calculated using the Arc-View software used by IDWR and I found 1515 acres of irrigation for these claims. These claims all describe the same entire POU and will be recommended as such, except for the claim for reservoir storage, A72-04096.

Summary: The total flow of the rights claimed and previously decreed or licensed, not counting the storage right, amount to 30.19 cfs. The maximum acreage covered by these previous rights is limited to about 1649 acres. <See notes by Clelland that total the rights.> Since the POU is found to be actually

limited to 1515 acres and the total flow of 30.19 cfs applied uniformly, the resulting duty of water as recommended is 0.0199 cfs/acre (0.02 cfs/acre or 1"/acre). This conforms to the decree (Joseph Rodgers, Et. Al. vs. Daniel C. Breyer, Et. Al.; 7/16/1913) which established a duty of water as 1 " per acre and no additional water was found to be available or delivered to this POU from Warm Spring Creek.

Each right will be recommended for the full amount of water as claimed and the recommendation for the outstanding permit 72-07359 will be disallowed, no use found.

Full review materials and documents for the SRBA claims can be found in the claim file for A72-10141 and copies will be added to the Permit file for final permit review.

Dear Ms. Von Morganroth:

Pursuant to your request for a change in ownership and/or the notification that you presently own the property in which the above-referenced adjudication claim(s) is appurtenant, the department has changed the record of the current owners as you requested for rights listed above.

I have forwarded your request and information to our state office to change the record on additional water right numbers.

Please find enclosed a copy of your adjudication claims, as they now appear in our records.

If you have any further corrections or questions please contact our office.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Clelland'.

He says the new owner of the place is Von Morganroth. In addition to giving him profile reports (all claims are still in Ingram's name) for the above claims I slipped in C/O forms, too. Maybe he will get the hint?
