RE: SNAKE RIVER BASIN ADJUDICATION CLAIMS: A72-00051M &
A72-00057M

Dear Mike

A72-00051M & A72-00057M (Johnny Smith Place)

I have reviewed your Notice of Error (NOE) response and am changing my recommendation to include the southeast corner of the place of use.

While reviewing your file I reviewed your warranty deed and noticed that I had incorrectly drawn your northern border for the place of use. I have corrected that line. My original recommendation followed the Quarter/Quarter line whereas the warranty specifies S. 85°06'43" E. Once I made both corrections to the P/U, GIS calculated the acreage to be 5 acres in the NWSW and 10 acres in the NESW. I believe that this should resolve the questions you had with this recommendation.

A72-00124, A72-10297A, & A72-04058 (Klug Place)

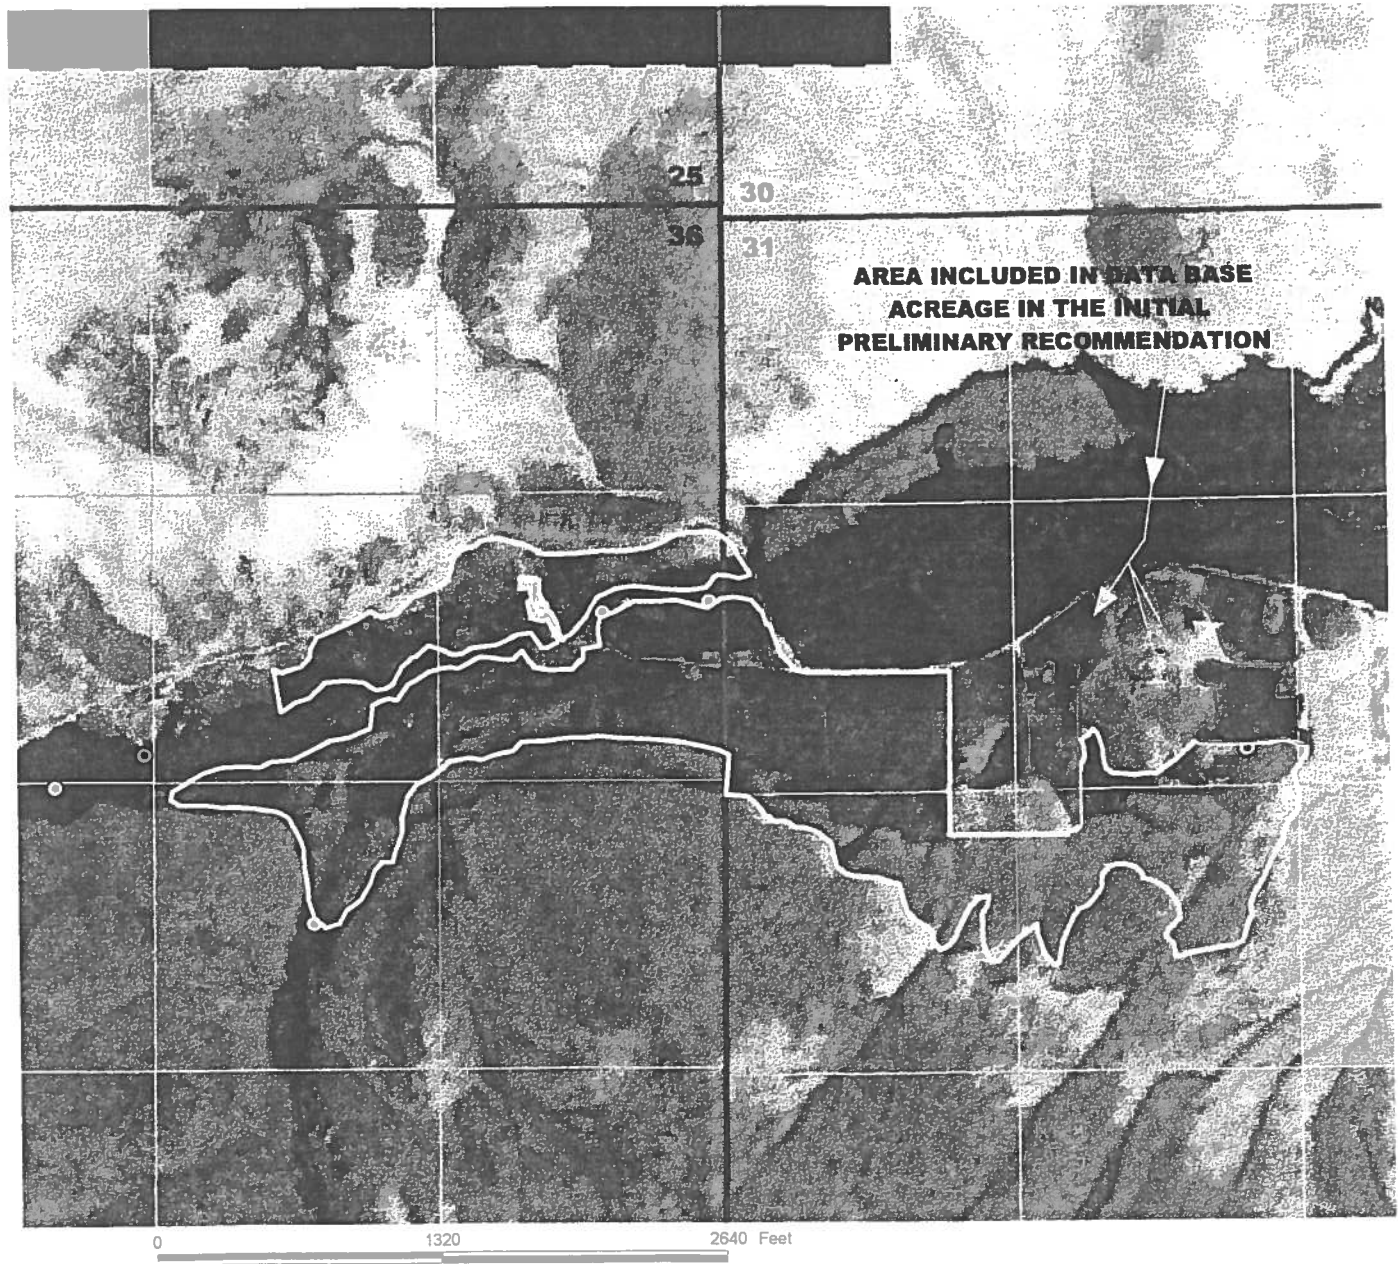

I have added the areas you identified as irrigated through the NOE process. Again, in reviewing my earlier recommendation I found that I had included the place of uses for the three parcels owned by other claimants within Sec 31 SENW. The recommended shape file as identified through GIS has not changed except for the 2 acres I added around your home. I have corrected this error in the data base and the related elements in the revised recommendation. I apologize for my error and the confusion that it may cause.

If you need additional, information please contact me.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

the John Gulch water can reach virtually all of the P/U South of Garden Creek. Therefore I am recommending that right (72-041763) within the PPU although the diversion rate is not sufficient to irrigate all of the P/U independent of Garden Creek water. PO41 limit = acres within the PPU of 94 acres.
