As of the date of the preliminary director's report, there had been no correspondence, that I found in the file, back from Insingers in regard to re-filing these claims based on Water Right 72-00231 - which is based on a Decree from the claimed source, and appurtenant to the POU described in these two claims. Both claims recommended as based on Beneficial Use.

PD FROM EF-REFILE/DECREE

BOB INSINGER, A PARTNER IN THE INSINGER RANCH, CALLED AS A RESULT OF MY LEAVING MY CARD IN HIS GATE WHILE I WAS ON THE EAST FORK DURING THE WEEK OF 06-12 TO 06-16. I REVIEWED HIS POU LANDS AS I HAD DISCOVERED AN APPURTENANT DECREE USAGE WHEN I REVIEWED HIS CLAIMS LAST WINTER.

I VISITED WITH HIM ABOUT THE LACK OF PD FROM THE EAST FORK (CLAIMED AS PD #2 IN A72-00232A) AND SENT HIM, AS DISCUSSED, CCS OF MAPS, AERIALS WITH COLOR MARKINGS AND A PROOF COPY OF THE WR AND THE ACTUAL LANGUAGE FROM THE DECREE FOR HIS REVIEW.

✓ AFTER WE CLEAR UP THE DISCREPANCY ON THE 2ND PD I WILL PURSUE THE REFILE OF THE LITTLE BOULDER CREEK USAGE CURRENTLY A B.U. CLAIM. I HAVE FOUND DECREE USAGE THAT IS CLOSE TO THE AMOUNT OF DIVERSION FOR HIS IRRIG UAGE AT THE RANCH UNDER THE B.U. CLAIM AND WOULD GIVE HIM A SENIOR PRIORITY DATE BY 16 YEARS.

BOB FOSTER CALLED THIS MORNING TO REPORT THAT HE WILL BE UP ON THE EAST FORK THURSDAY, 06-29, TO CATALOG IF&G SITES SO HE WILL GO BY THE INSINGER RANCH AND TRY TO GET A MEASUREMENT ON LBC OR AT LEAST SOME PIX SINCE IT WAS TOO IRREGULAR AT LEAST IN THE REACH WE OBSERVED ON 06-15-95. BOB WILL CALL ME WHEN HE GETS BACK SINCE HE WILL BE OUT OF THE OFFICE AND IN BOISE MOST OF NEXT WEEK.

RE: Evidence of Priority

RESPONSE DEADLINE

MAY 1, 1992

Dear Claimant:

The Notice(s) of Claim identified with the number shown above your name on the mailing label has been filed in the Snake River Basin Adjudication (SRBA). The Notice(s) indicate your water usage is based on "Beneficial Use" or a "Statutory Claim". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed. **The date of first use, known as the priority date, has not been confirmed by a License, Decree or Permit.** The Department will soon conduct reviews &/or field exams for the claims in your area. Since the priority date of a beneficial use water right can not be confirmed by field examination, **proof must be provided supporting the priority date you have claimed.**

The Department will not recommend the Notice(s) be decreed by the court as claimed if no evidence of a priority date is submitted.

Please find enclosed a computer printout of your Notice(s) and the pamphlet entitled **"Evidence of Priority"**. The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. I direct your attention to the two sections entitled **"What Kind of Evidence is Required"** and **"Some Examples of Documents Which May Be Evidence of the Priority Date"**.

Please submit the required evidence supporting the priority date(s) by **May 1, 1992**, referencing all documents with the corresponding Notice number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Allen Merritt, P.E.
Water Rights Supervisor

Sara,

I just got a return call from John Insinger on the above claim. He reviewed some info I faxed to him and concluded that there was a mistake made in the original filing on the location of some stockwater POUs. Insinger has been in contact with Larry Brown, and BLM is preparing an SF5 to fwd to Insinger. If there is anything else Insinger needs to do, you can call him at 208-345-9974. He is an atty and really wants to avoid a trip to Challis. The tracts in question are: SESW & SWSE SECTION 22 should be SESW & SWSE SECTION 15 for stockwater.

...and another one bites the dust....

I Called him regarding the BLM objection to his stockwater POU in the south half of section 22 as claimed and recommended. He requested that I send him copies of the SF5 and his claim as he believed that some of the info he needed to review the obj was up at the ranch on the East Fork. I faxed the information to the above number this date. He stated that he did not believe that he had any stockwater use south of his property in Section 22.

The rate per acre calculations are based upon a 300 foot run at a 2% slope. An 8 hour set time was also used. Individual graded border evaluations, soil characteristics work sheets, and peak irrigation diversion requirement work sheets have been created and archived separately for each soil type.

Where actual rotation is shorter than the optimal rotation, optimal rotation is the criteria to be used for the recommendation analysis and, therefore, the rotation percentage adjustment is not necessary. The rate becomes the acres per soil type times the rate per acre from the above chart.

governmental entities) will be construed as including a homestead, and therefore supporting one claimed domestic use. The rationale for this interpretation is that it would be strange for all the claimants to obtain water rights for their fields but not for their homes. Second, a decree for an irrigation right (regardless of to whom it was decreed) will be construed as including incidental stockwater (use of amounts diverted during the irrigation season for stockwater use as well as for irrigation). The rationale for this interpretation is that incidental stockwater is an historic practice that is continued today, and which IDWR recognizes by including a general provision in the director's report that an irrigation right includes incidental stockwater.

Non-incidental stockwater use is subject to the general rule that some specific support in the decree is necessary. There is specific support for non-incidental stockwater where the decree provides that the rights determined therein are for irrigation and stockwater purposes. In addition, there may be a general exception for all irrigation rights determined by a particular decree where there are documents in the court files, or evidence outside the case which supports a finding that irrigation water was generally diverted year round for stock water use at the time of the decree. Such a finding should be approved by the bureau chief before non-incidental stockwater rights are recommended. In such cases, the amount of the water right during the non-irrigation season is determined the same way the amount any stockwater right is determined - it does not necessarily include the full amount decreed for irrigation but it is necessarily no larger than the full amount decreed for irrigation.

Finally, if the decree has a generic description of NU(s), and does not indicate a uniform duty of water, then it will be generally assumed that the rights are irrigation rights (unless there is some reason to believe otherwise), for which other claimed NU(s) may be recommended as described above. For example, there is one old decree in Southern Region where, if you assume that the rights are generally irrigation rights, some have a duty of water of 2.3 inches per acre, some 2.5, some even more. The rationale for this interpretation is that the vast majority of these rights would have been irrigation rights, even without the assurance of a uniform duty of water.

This analysis ties in heavily with the analysis of season of use, because an ambiguity in season of use is often resolved by looking to the nature of use.

b. Specific support

If there is some specific support for each NU claimed and the amount claimed for each NU in the decree or other documents already in IDWR files, then the NU and the amount for each NU for which there is some specific support should be recommended.

B. CAN THE CLAIMED TOTAL DIVERSION RATE BE VERIFIED USING THE WATER RIGHT FILE?

N/A () Y () N ()

* ALL CLAIMS BASED ON BENEFICIAL USE (INCLUDING POSTED NOTICES AND STATUTORY CLAIMS) REQUIRE A FLOW MEASUREMENT.

C. IS THERE ANY INDICATION THAT THERE HAS BEEN A FIVE YEAR PERIOD OF CONTINUOUS NONUSE OF THIS RIGHT, OR ANY PORTION OF THE DIVERSION RATE?

Y () N ()

* IF AN AMOUNT SMALLER THAN THE ORIGINAL DIVERSION RATE IS CLAIMED AND A FIELD EXAM IS NOT REQUIRED, EXPLAIN IN NOTES.

D. SHOULD THE CLAIMED DIVERSION RATE BE VERIFIED BY FIELD EXAM?

Y () N ()

E. FLOW MEASUREMENT

MEASUREMENT METHOD _____, SEE ATTACHED CALCULATIONS.

F. RATE/VOLUME CALCULATIONS: (IRRIGATION)
