Good morning, Linda,

I'm attaching the aerial photo/ map of our property on the St. Joe River across the river from Hoyt's Flat. I've drawn in the approximate location of the water pipe that was used for as long as I can remember going from a rock dam in Dago Creek (recently renamed Italian Creek). The iron water pipe and subsequent plastic water pipe is still present on the property.

Thank you for your help!

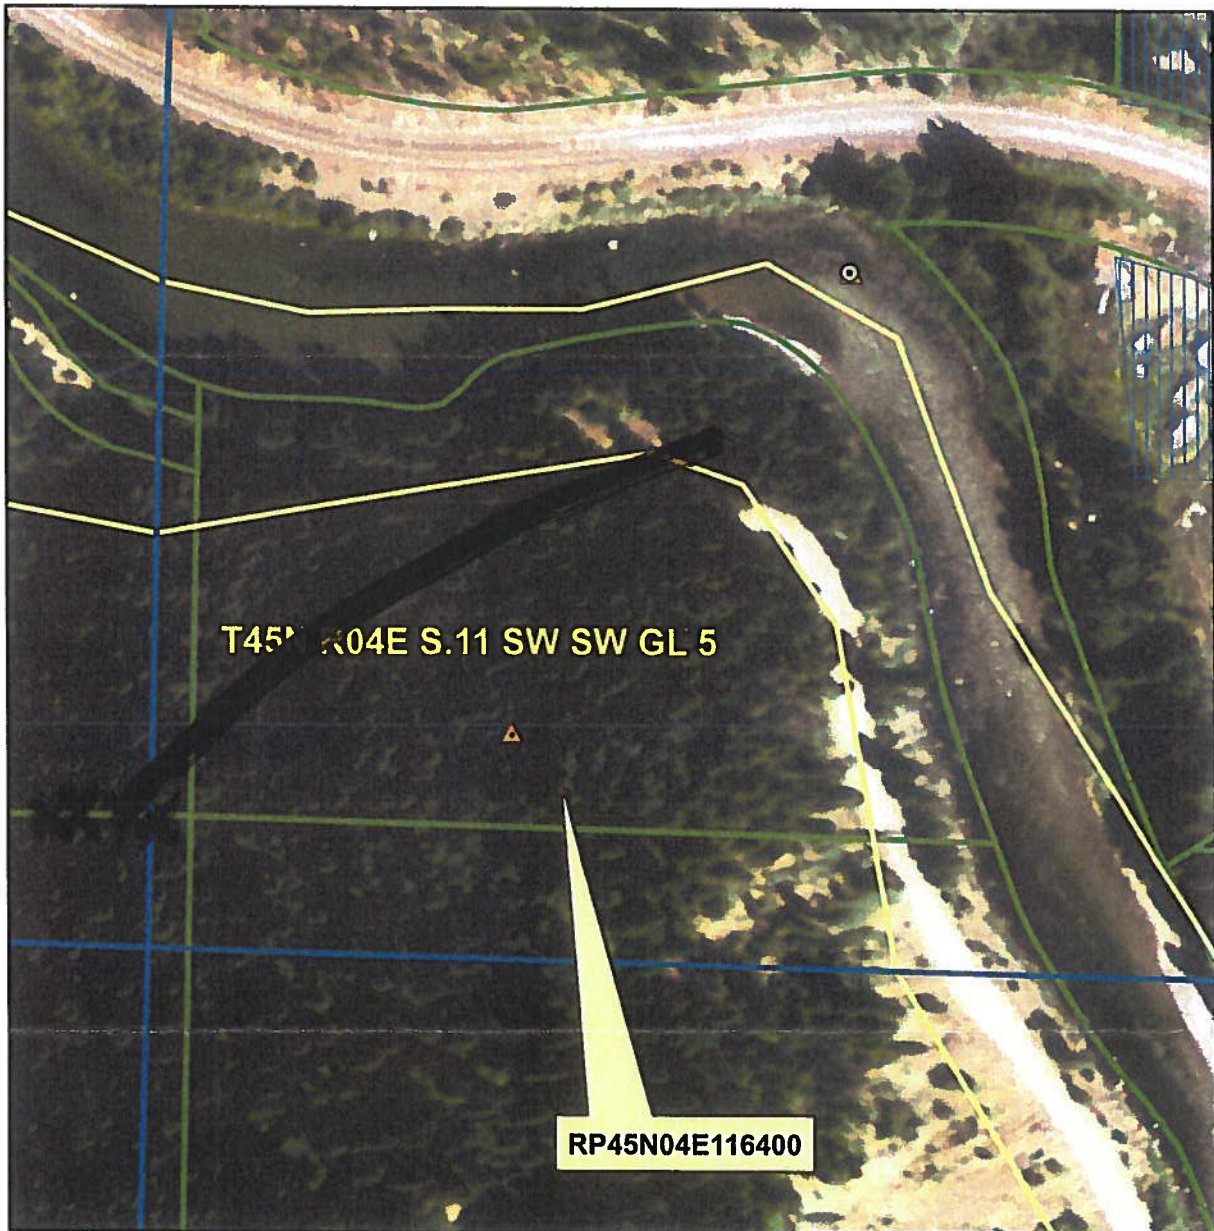

Corey Stanley

Black line is approximate location of water pipe from rock "dam" on Dago (now Italian) Creek. Portions of 3" iron pipe and subsequent 1½" black plastic pipe still evident on property
