Hello Mr. Stanley,

I've begun the recommendation of your claim in the Coeur d'Alene-Spokane River Basin Adjudication and have made a couple changes based on the information I recently received from you. They're shown on the attached claim form and map and are as follows:

Item 2 - Date of Priority

Based on the patent information, and our recent conversation, I did change the priority date to 11/20/1963.

Item 3 - Source and Item 4 - Point of Diversion The attached contour map (USGS) actually shows the stream and its' name as Italian Creek. I've circled it on the map. However, it does show that it's in Section 10, SE1/4SE1/4 rather than Section 11, SW1/4SW1/4. I made this change under item 4.

The remaining elements of your claim remain the same, although I did add a description of the diversion works (item 5).

Please review this information, and if it's correct, sign and date the claim form and return to me as soon as possible. Also, would you put a dot on the approximate location of the diversion from Italian Creek, and where the water is used, and return this also.

If any information is incorrect, just make any changes necessary, but please initial and date such changes.

Thank you for your prompt attention to this matter.
