SUBJECT: Notices of Claims Filed on Spring Usage

Dear Mr. Ferris:

We have received the Notice of Claims that you submitted on the spring usage in Benewah County. They're numbered 92-10937 and 92-10938 and a copy is enclosed.

Claim 92-10937

I have enclosed a map showing where I placed the spring location and where the water is used. I determined the location of the spring based on the GPS coordinates and parcel number you supplied and the location of the place of use based on the description of diversion works, i.e. 320 feet up the spring course.

Claim 92-10938

Also enclosed is a map showing the spring location and place of use and this information was determined using the GPS location, parcel number and place of use description. Please note – the GPS location and parcel number put the spring in the *NE1/4SE1/4* rather than the *NE1/4NE1/4* of Section 28, T44N R1E as was claimed. Consequently, I made this change when I data entered the claim.

Please review this information for accuracy and let me know if we need to make a change. The final Director's Report will be submitted for all the claims filed in your area within the next several months so I would appreciate it if you would advise me on this by July 25, 2014.

I can be reached at (208) 762-2802.

Sincerely,

Linda A. Werner
Water Resource Agent

MEMO

Date: July 16, 2014

To: Claim File 92-10937 and 92-10938, Ferris Living Trust

From: Linda Werner, Water Resource Agent *L.W.*

Subject: Source and Location of Point of Diversion

Per phone conversation with John Ferris on July 16, 2014.

The claims were received on July 16, 2014. They showed several different sources so I called Mr. Ferris, who advised me that the source of each claim is a spring, and the description of diversion works shows where each place of use is located.

I will send Mr. Ferris a map, and copy of claim for his review.
