Twin Falls County Civil Case No. 39576

Report to the SRBA District Court

Prepared by the Idaho Department of Water Resources
Gary Spackman, Director
Carter Fritschle, Manager, Adjudication Section

August 6, 2014

DESCRIPTIVE SUMMARY

This is a Director's Report of Deferred De Minimis Domestic Water Use submitted by the Director of the Idaho Department of Water Resources (IDWR).

INTRODUCTION

A Motion for Determination of Deferred De Minimis Domestic or Stockwater Use (Motion), as well as a Notice of Claim to Water Right, was submitted to the Court on April 10, 2014, under water right claim no. 63-33933. The claimants, Kurt and Teri Thaemert, published notice of the Motion, and the Director has now completed his examination of the water right claim. The examination was conducted by Carter Fritschle, Manager, Adjudication Section on behalf of the Director. The materials used in and results of the examination of the elements of water right claim 63-33933 are discussed below.

DISCUSSION

Priority Date – The priority date claimed was 9/11/2008. A well driller's report in the name of Nolan Construction was located which noted the same latitude / longitude coordinates as shown on the claim for the claimed point of diversion. The start date on the well driller's report was 9/11/08 and the completion date was shown as 9/25/08. Therefore, the earliest date water could have been diverted and put to beneficial use from the well is 9/25/2008.

Point of Diversion – The latitude / longitude coordinates were entered in IDWR's Wells spatial data layer. The point of diversion was confirmed to be in T07N, R04E, S26, NESW. IDWR's Point of Diversion spatial data layer for the recommendation was updated to match the location shown for the well.

Source – The source for water diverted from a well is Ground Water.

Place of Use – The 2009 aerial photo confirms a structure is located approximately 70 feet from the well in T07N, R04E, S26, NESW. The Boise County tax lot data indicate the claimants own the property where the structure is located. IDWR's Place of Use spatial data layer for the recommendation was updated to include the structure shown in the aerial photo. No overlapping domestic water rights were found.

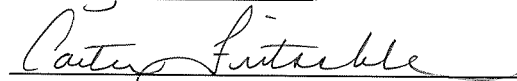

Purpose of Use and Period of Use – The well driller's report indicates the well is for domestic use. Wells used for domestic purposes are recommended for year round use if year round use was claimed.

Quantity – The well driller's report shows the well produced 20 gallons per minute during a 24 hour pump test. The amount claimed is 0.02 cfs (9 gallons per minute). Therefore, the pump test confirms the well can produce the 0.02 cfs claimed.

IDWR has added the appropriate standard conditions to the recommendation, and IDWR's Claim Verification Report has been completed.

Pursuant to the Judge Wildman's *Order Granting Motion Governing Procedures in the SRBA for Adjudication of Deferred De Minimis Domestic and Stock Water Claims*, dated June 28 2012, the Director submits this Director's Report of Deferred De Minimis Domestic Water Use, Claim No. 63-33933, which includes the recommendation of deferred de minimis water right no. 63-33933.

Respectfully submitted this 6th day of August, 2014.
