To: Claim File 91-7508, Dale Pritchard

From: Linda Werner, Water Resource Agent *L.W.*

Subject: Location of POD and POU(S)

We sent a letter to Dale and Debera Pritchard on August 17, 2012, requesting more information on the ownership of the property as well as the location of the well. Mr. Pritchard called us on December 14, 2012 stating that the map we sent him doesn't show the correct location of the well or his 4 rental homes, and that he'd go to the Benewah County Assessor's office to get a map and the correct parcel number for the well and 4 homes and send it to us. He states the map we sent him is for his personal residence.

We never received the information so on March 27, 2014 I sent him a letter, with copy of the August 17, 2012, letter asking that he contact me with the information we asked for earlier.

He called me on May 6, 2014 and stated that he wasn't able to find a map, that the parcel numbers have been changed, he owns all four homes and that the well was located near the two houses, with garage, in front of the garage.

Consequently, I advised him that I would send him another map and requested he pinpoint the location of the homes and well. This letter was sent on May 8, 2014 and included a "response due date" of May 22, 2014.

I then called the Benewah County Assessor's office, who informed me that these parcels have been split and now have different parcel numbers. She wasn't able to tell me what parcel numbers were split off the original parcel number (listed as RP46N02W09779DA under both items 4 and 9 on the claim) but did state that this is not in a subdivision.
