Additional explanation or supporting documentation of the error:

Several water rights in Basin 63 were previously decreed in the case *Pioneer Irrigation District v. American Ditch Association, et al.* (Seventh Judicial District, Canyon County, decree entered by Judge E. L. Bryan on February 14, 1929), commonly referred to as the “Bryan Decree.” The Bryan Decree case commenced in 1913, following entry of what generally is referred to as the “Stewart Decree,” a decree of the rights on the Boise River in the case of *Farmers’ Cooperative Ditch Company, Inc. v. Riverside Irrigation District, Ltd., et al.* (Seventh Judicial District, Canyon County, decree entered by Judge George H. Stewart on January 18, 1906). The purpose of the Bryan Decree case was to adjudicate a small number of rights that for various reasons had not been previously adjudicated and decreed in the Stewart Decree. These rights were decreed in the February 14, 1929, Bryan Decree, but that decree imposed upon them the following limitation:

[A]ll rights and amounts of water herein awarded are and are hereby decreed to be subject, subsequent and inferior to all the rights and priorities established by and awarded in said Stewart Decree.

Eleven rights were originally made subject to this limitation. Two more were added by a subsequent order entered in the case by Judge A.O. Sutton on January 30, 1932, entitled *Order for Distribution of Waters of Boise River for 1932*, which order in turn was extended by a subsequent order entered by Judge Charles E. Winstead on June 23, 1933, entitled *For 1933 and until Further Order of the Court*, an order still in effect today. Three other rights were added to the list of Bryan Decree rights by two subsequent decrees which made the rights contained therein subject to both the Stewart and Bryan Decrees.

The Bryan Decree rights all have priority dates senior to one or more rights contained in the Stewart Decree, but because of the limitation quoted above the watermaster historically subordinated them to the Stewart Decree rights junior to them. This subordination was carried over into the SRBA recommendations for Basin 63. However, in making its recommendations IDWR placed language referencing the subordination not on the Bryan Decree rights that were subordinated to one or more

Stewart Decree rights, but rather on the Stewart Decree rights that receive the benefit of the subordination. IDWR has now determined that this approach was flawed because IDWR did not likewise place notice of the subordination on the rights that are subject to the burden of the subordination. IDWR should have placed language referencing the subordination also on the Bryan Decree rights to better communicate how they historically have been administered and to provide clear instruction to the watermaster.

IDWR's initial error correction request, submitted to the Court on May 29, 2014, asked that the following language be added to the priority date element of the partial decree for water right number 63-297: "Pursuant to a call in times of scarcity, this right is junior to water right nos. 63-191, 63-225, 63-228, 63-229, 63-248, 63-250, 63-251, 63-252, 63-253, 63-285, 63-286, 63-292, 63-293, 63-369 and 63-382B and any future splits of these rights." IDWR again requests that the Court add this language to the partial decree for water right number 63-297.

In response to IDWR's initial error correction request, an objection was filed dated July 11, 2014. The objection claimed IDWR's proposed subordination condition was insufficient to remedy an ambiguity created by the step-down cut conditions already in place on both Bryan and Stewart Decree rights. At the hearing on the Court's Notice of Intent to Issue Amended Partial Decrees on July 15, 2014, the Court granted the parties time to negotiate language to clarify that ambiguity. As a result, IDWR requests the following language be added to the quantity element of the partial decree for water right number 63-297 directly after the step-down cut condition: "This step-down cut condition shall be implemented before the step-down cut condition contained in water rights identified as originating from the Stewart Decree is implemented."

During negotiation regarding language to clarify the ambiguity described above, interest was expressed that language be included in the partial decrees at issue explaining that neither the proposed subordination condition or step-down clarification condition modify, amend, or waive any defenses available to rights to a call in times of scarcity. Accordingly, IDWR also requests the following language be added to the other provisions element of the partial decree for water right number 63-297: "The step-down cut condition contained in the quantity element of this partial decree and the subordination condition contained in the priority date element of this partial decree do not modify, amend, or waive any defenses available to this right to a call in times of scarcity."
