

Conversation Memo

Date: October 22, 2014

To: Files 95-15366, 95-15367, 95-15368, 95-15387

From: Craig Saxton *CVS*

Re: Response to Information Request

Norman Odekirk Sr., contacted me today to ask why I had sent him correspondence regarding his CSRBA claim. He told me that he hired an attorney to file the claims and he thought it was all taken care of.

In our conversation, we were able to discuss some of the questions I had for him:

95-15366:

The pond is man made

The primary source of water is seepage from within the pond (springs).

He will try to send me a signed amendment to include stockwater storage.

95-15387:

The pond is man made

The primary source of water is seepage from within the pond (springs).

He will try to send me a signed amendment to include stockwater storage.

95-15367:

Mr. Odekirk said he used the water to irrigate his lawn and garden and actually, about ½ acre sounds right. He said he had never measured it. I told him if the irrigation was less than a half acre, then I didn't need evidence of priority. I suspect he will sign the amended claim I sent him for 95-15367 and send it back, but based on our conversation, I only intend to recommend domestic use.

Mr. Odekirk said Big Spring was diverted and pumped up to the house which is consistent with the claim.
