Re: Coeur d'Alene-Spokane River Basin Adjudication (CSRBA)
Claim No(s). 95-4083, 95-4084

Dear Morris Family Trust,

The Idaho Department of Water Resources is in the process of reviewing CSRBA claims in basin 95. Initial review of the above referenced claims has resulted in several questions.

Item 1 – Contact Information:

CSRBA claims 95-4083 and 95-4084 appear to be owned by the same entity. However, each claim has different contact information (see above). My first question was if this was intentional, or if both claims should have the same contact information?

If my assumption that both 95-4083 and 95-4084 are in fact owned by the same entity, then I think you will want to update the contact information for one or both of the claims so they are the same. The easiest way to do this is to amend the existing claims with the updated ownership information.

For your convenience, I have enclosed an amended claim for both 95-4083 and 95-4084. The amended claims list both of the recorded contacts:

WILLIAM AND LELA MORRIS FAMILY TRUST
1231 BILL MORRIS RD
PLUMMER ID 83851

MORRIS FAMILY TRUST
PO BOX 1231 BILL MORRIS RD
PLUMMER ID 83851

Please review the claims and cross out the contact and address that shouldn't be on the claim. You can also edit the contacts as necessary if neither one is correct. When finished, initial your changes, sign the claim, and send it back to me in the enclosed envelope. This will allow me to update the contact data.

Item 2 - Source:

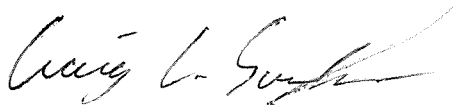

Both 95-4083 and 95-4084 are claiming use from an **unnamed stream** tributary to Chatcolet Lake. From the historical documentation it would appear that each claim represents a different point of diversion along an unnamed stream with use dating back to October 22, 1918. Back in 1918 the delivery system would

have been a gravity system. To help me understand the system, could you please draw in the following items on the enclosed map:

- The point(s) of diversion for both claims
- The 12 irrigated acres (or 24 irrigated acres if each claim represents a different 12 acres)
- The delivery or ditch system that would/does deliver the water from the source to the irrigated acres, the home, and the stockwater places of use.
- Any additional information you can add to the map that would help me understand the system would be great.

I understand this is a lot to cover so please feel free to contact me if you have any questions and we can talk this through.

Respectfully submitted,

Craig L. Saxton
Adjudication Technical Analyst
