SUBJECT: Coeur d'Alene-Spokane River Basin Adjudication (CSRBA) Beneficial Use Claim

Dear Ms. Thornbrugh:

I'm writing in regard to our telephone conversation of today, Monday, November 3, where we discussed your spring usage, its' location relative to where it's shown on statutory claims 92-4029 and 92-4030 (copies enclosed), the actual date of first usage and the Application for Permit, which is numbered 92-10951.

I've completed a Notice of Claim showing a priority date of May 20, 1904, which was taken from land patent information (copy enclosed). I've indicated a domestic usage at a quantity of 0.04 cubic feet per second which is approximately 18 gallons per minute and is an average for in-house usage and ½ acre or less of lawn irrigation. We didn't discuss a stock water usage so I did not include that as a usage; however, domestic may include stock, and since your permit showed one horse, this would definitely be covered by domestic. If, however, you feel more comfortable claiming a separate stock water usage, add that under the domestic purpose in item six, and be sure to adjust the quantity. I'm enclosing an instruction form should you have any questions. I'm also enclosing an extra map which shows the spring location and your home location. If you do add stock to the usage, please show where the stock usage occurs and return this map with the completed claim.

If you agree with the information on the claim, please return the signed, dated Notice of Claim to my attention, with the \$25.00 fee, by **November 21, 2014**; as we're finishing up all the claims in this basin and will be submitting this information to the Director very shortly.

Please feel free to contact me if you have any questions. I can be reached at (208) 762-2802 or by email at linda.werner@idwr.idaho.gov.

Sincerely,

Linda A. Werner
Water Resource Agent, Sr.
