IDWR/NORTHERN

Dear Ms. Cottier:

I have received your request for continued use of a buried 4 inch pvc pipe water transmission line across National Forest System (NFS) lands. I understand that this use has been in place since 1909, and there would be no impacts to fish or wildlife, water or air quality, or visual effects.

After a careful review of your application, I have determined that the use has such nominal effects to National Forest System lands, resources, or programs that it is not necessary to establish terms and conditions in a written special use authorization, pursuant to 36 CFR 251.50(e). Therefore, the use may continue as described. Please notify me if any aspects of the water transmission line change from the current conditions, as further review may be required.

Please have this letter available upon request.

Sincerely,

WADE E. SIMS
District Ranger
