=====

Mr. Metcalf visited with me this morning to discuss the "proof of beneficial use" letter that we sent him regarding A34-10737. The claim is based on an expansion of license 34-02442, with a priority of April, 1977. The expansion is for 79 acres over the 100 acres licensed under 34-02442. During his review, Mr. Metcalf realized that the additional 79 acres had been developed in 3 phases, so he questioned whether 3 claims should have been filed.

I went over the development history of the property with Mr. Metcalf. It is as follows:

- 1962 - Well drilled and licensed (34-02442) for 100 acres in the SE1/4 Sec. 24 by flood irrigation (shaded green on attached map).
- 1973 - Purchased center pivot, mainline and handlines, which added an additional 33 acres within the SE1/4 Sec. 24 (shaded green on attached map).
- 1978 - Purchased 46.5 acres w/i S1/2 NW1/4 Sec. 24. That spring he expanded the mainline from well and, with wheel lines, irrigated another 25 acres (shaded purple on attached map). *(w/ 46.5 acre PARCEL)*
- 1988 - Through Quiet Title action, obtained old rail road right of way in Sec. 24, adding 20.7 acres to his irrigated acreage in 1989 (shaded brown on attached map).

Given this information, I discussed several options with Mr. Metcalf. First, he could change his initial filing to include a claim based on expansion of 34-02442 for the 33 acres developed in 1973 and then amend A34-10737 to reflect only those acres (25) developed in 1979. Since the date the expansion of the other 20.7 acres occurred after the adjudication commencement date, Nov. 1987, it was apparent that an application for permit should be filed (Adjudication memo #16A, pg. 1).

However, Mr. Metcalf stated that due to the system capacity and requirements with ASCS to idle a certain amount of land each year, he normally fallows between 20 to 25 acres, meaning he annually irrigates only 158 of the 179 acres possible under this system. This fact presented another option that would avoid the need to file an application for permit for the 20.7 acres developed in

MICROFILMED

DEC 08 1992

1989 - amend his claims to show a permissible place of use.

Mr. Metcalf decided he didn't want to go to the expense of filing an additional claim for the 33 acres developed in 1973, so he opted to include this acreage with the 1979 expansion under A34-10737. He amended A34-10737 to claim a 179 acre permissible place of use and that only 58 acres, within this permissible place of use, would be irrigated annually under this right. In addition, he amended A34-02442 for the same 179 acre permissible place of use with only 100 acres being irrigated annually under this right. The two rights should be conditioned so that in combination, no more than 158 acres are irrigated annually and no more that 2.00 cfs are diverted under the two rights.

We suggested to Mr. Metcalf that he might want to file an application for permit for the 20.7 acres developed in 1989, but he declined to do so at this time. He was made aware that an application would be necessary if he wanted to increase the capacity of the system in the future.

Letter (attach letter) _____

I. Changes to be made to proposed recommendation: NONE

II. Explanation of reasons for recommendation: No recommendation changes were made.
Mr. Metcalf believes his decreed rights should all be able to be
stored in reservoir and then divert double or triple the amount (or less)
^{within} ~~the~~ throughout the season. This is a beneficial Use of the water.

I explained that I can't make any changes at this time And
he will have to file a protest with the courts when the Director's
Report is filed with the courts
