IDWR/NORTHERN

TELEPHONE 208-556-6008 - FAX 208-753-7008 - E-MAIL info@peakmechanical.com

To whom it may concern:

Regarding: Peerless Pump Model 6x6x12 x 20HP, S/N 251175.

Location: West End of Zanetti's Gravel Pit, Near I-90, #57, East bound ramp.

Due to the age of the pump an individual pump curve was not obtainable.

Based on pump power formula and motor specs taken directly for the pump, and also considering lift, friction losses and efficiency losses, It can be determined that the pumps potential at the discharge should be conservatively estimated at 2,000 – 2,200 GPM.

Best Regards,

Cory Weikel
