

Field Exam conducted June 6, 2014 to determine correct Point of Diversion information and location and status of Domestic and Irrigation use for CSRBA Claim 94-8462. An Unnamed Stream (locally known as Deer CR) tributary to the S. Fork Coeur d'Alene River and a Developed Spring were found to be the correct sources of water used instead of the information shown on the original claim 94-8462. Domestic & Irrigation uses and the quantities of water being used are consistent with the Claim.
