Subject: 37-577CA, 37-659A, and 37-7017 CAMPION

Before I send this to everybody I thought that I would run it by you guys.

Remark to be added by court to satisfy objections. For rights 37-577CA and 37-659A.

The appropriator is entitled to the quantity of water described above at the point of measurement in Twp 03N, Rge 18E, Sec. 29, SENESW.

EXPLANATION OF THE HISTORY OF THE DEPARTMENT NUMBERING SYSTEM, ALLOCATIONS DATA BASE VS ADJUDICATION DATABASE

For the adjudication process a separate database, (independent from the allocations database) was created. The agent had the ability to assign a claim number based upon an allocations right, modify an existing number with a unique suffix or have the computer generate a new 10,000 series number. Initially the adjudication process emulated the allocations practice of using a suffix to identify a split portion from an existing water right. Historically if an individual sold a portion of a piece of property with a water right but no elements changed, then the department was not notified and the original right was not split in the allocations database. Thus when a claimant filed an adjudication claim against a portion of an existing water right there would be no exact matching record that he could claim against.

In 1989 Campion filed adjudication claim 37-577CA against a portion of allocations right 37-577 (The Riley Right). That claim represented a portion of the original right that had not been split and assigned a unique number on the allocations database. He received the next suffix combination available based upon the adjudication database numbering system.

Campion filed Transfer 3574 in 1994 to change the point of diversion associated with his water right. At that time the department's practice was to split the base right (now parent) and assign the 'children' rights the next available suffixes associated with the base right. In this case Campion received 37-577BR. This resulted in Campion having adjudication right 37-577CA and allocations right 37-577BR that represented the same use.

In an effort to sort through the multiple splits associated with 37-577 (The Riley right) the department renumbered the various portions into the 37-30000 series numbers. This was done in 1996. Right 37-577BR was renumbered to 37-30033. The ultimate goal was to identify the matching adjudication claim and then renumber that record to the same 30,000 series number. Unfortunately, because of the complexity of that process and the adjudication review demands in other basins, no agents were available to complete this task.

Ultimately, as rights are decreed through the adjudication process, they are moved from the adjudication database into the allocations database and the associated allocations record will be deleted. In this case assuming that this right is decreed adjudication record 37-577CA will ultimately be moved to the allocations data base and 37-30033 will be deleted.

Kimberly - Yes, I created the shapes per Dave's request in order to help him out. These were the first two files I found without shapes already prepared. I

don't remember the details, but would have used the available ArcView data to create the shapes based on what actually appeared to be irrigated. I would

not have recommended land that has been taken out of production for homes, etc. Let me know if you still have questions.

Jim,

I am contacting you regarding some Basin 37 Part 3 shapefiles that Zach Maillard sent me today. It is my understanding, via Dave Tuthill, that you may have created these shapefiles at the Sun Valley meeting. If this is true, please let me know; since I have a few questions . . .

Thanks,

Kimberly,

The shape might have been generated by Jim Stanton -- he was working on shapes as he had time...

10 acres sounds about right for .26 cfs...

Thanks, Dave

Dave,

I requested the shapefiles from Zach, as you suggested, only to find that for one of my Campion claims (#37-577CA) - the specific shape generated at the Sun Valley meeting only totals **10** acres and the claim is for **40** acres. (The 0.26 cfs claimed is in "the yellow" on the Riley spreadsheet.)

Do you happen to know who created those shapes from the Sun Valley meeting, so that I may contact them and get further clarification on those shapes/acres were determined?

Thanks,

Kimberly Brown

Zach, thank you for being so prompt about sending these shapefiles! I appreciate it.

Can you give me any background information regarding what these shapefiles are based upon? For instance, I am looking at the Campion rights and the four POU shapes just sent only add up to 10.0 acres; but the claims are for 30.0 and 40.0 acres of irrigation. Any information you have on how these shapes were created would help me tremendously.

Thanks,

Amendment of SRBA Claims A37-00577CA, A37-00659A and A37-07017

Dear Ms. Fawcett:

Thank you for your letter of September 12, 1995.

Will you please make the following corrections in the IDWR computer data base for the above-referenced amended SRBA claims:

1. Please change the claimant's mailing address on Claim No. A37-07017 to P. O. Box 538, Ketchum, Idaho 83340, and claimant's telephone number to 208-726-3289.
2. The three water rights all share the same place of use and, therefore, paragraph 13 of each amended Notice of Claim should refer to the other two water rights.

When these corrections have been made, please forward to me computer printouts on the IDWR data base for the amended claims.

Thank you.

Sincerely yours,
