RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-30181

NAME AND ADDRESS: NAMPA & MERIDIAN IRRIGATION DISTRICT
C/O RINGERT CLARK LAW
ATTN DAN STEENSON
PO BOX 2773
BOISE ID 83701-2773

SOURCE: BOISE RIVER
MORES CREEK

TRIBUTARY: SNAKE RIVER
TRIBUTARY: BOISE RIVER

QUANTITY: 0.200 CFS

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

SF5 Right No. 63-30181

PRIORITY DATE: 06/01/1864

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.

POINT OF DIVERSION:

PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	0.200 CFS
Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.		

PLACE OF USE:

~~69495 ACRES TOTAL~~

This right when combined with Right Nos. 63-198AJ, 63-199B, 63-200B, 63-2392B, 63-2968 and ~~63-32695~~ can be used to irrigate up to 69,495 acres within the boundary of the Nampa Meridian Irrigation District.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and ground water recharge purposes divided by 0.0156 cfs/acre.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and ground water recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

SF5 Right No. 63-30181

SF5 Right No. 63-30181

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

~~The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.~~

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

This right is also designated as Right No. 1 in the Boise River Stewart Decree and Boise River Water Distribution Report.

Hi Lori,

Attached are the changes Bryce and I came up with on Right Nos. 63-2392B, 63-31937 & 63-32480. He wanted the season of use remark off of there because the source is not the Boise River. I said ok and then thought – these are credited back up and diverted out of the Boise River questioning whether to leave it or take it off. Then I looked on all the other rights for these credits back up and none of them have the season of use remark. So, please omit it on all of these rights. (I am writing this so I can put it in the file as to why I removed the remarks). Another change is omission of the digital boundary pou language and putting in the other remark as indicated on 63-32480. I did put in digital right before boundary for each ditch company on the remark to be moved. One last change also on 63-31937 is the addition of the name Little Pioneer Canal. Bryce was worried we would mix it up with the Pioneer Irrigation District. I can see his point there.

The name of their firm is Ringert Law. So, on all the rights we need to take out Clark. That will include 63-198AJ, 63-199B, 63-200B, 63-2968 and 63-30181 for NMID also. For NMID's SF5s I have attached an example of the changes on 63-198AJ that will apply to all of them. Omit Clark in the name and cross out the total acres. It is redundant to the condition below it. These rights are boundary changes only, but we still need to print each one out in SF5 form and send with the special boundary change SF5 cover sheet and a copy of the map. Ray has copies of the maps already and will just need to know about the above cover sheet.

Call if you have any questions. Would you please send me a copy of the SF5s so I can review one last time before we send them to Ray.

Thanks,
Jan

Bryce,

Attached are Draft SF5s for the above sub cases. Please review these to insure that the items we agreed upon are included.

You had also requested that I look at the points of diversion listed on 63-31937 to be sure all the ditch companies were covered. This right lists 7 points of diversion for 9 canal companies. The reason for this is that the point of diversion in the SENE, S5, T3N, R2E is the main diversion for the Farmers Union Canal Co. which also carries water for the Boise Valley Irrigation Ditch Co., using the same diversion point. Also, the point of diversion listed in the NESE, Lot 1, S.23, T4N, R1E is the main diversion for the New Dry Creek Ditch Co. which also carries water for the New Union Ditch Co. using the same diversion point. All other points of diversion are single points for the remaining ditch companies. In checking the current decreed acres for each ditch company involved in this right, the total acres had changed from that previously recommended. This was due to objections, etc., on these rights and the decreed total for all companies is 31,536.3 acres rather than the previously recommended 29,309.15 acres. This change has been reflected on the attached draft SF5 for 63-31937. Once the SF5 for 63-31937 is signed by all, I will add the explanatory remark concerning the uncuttable delivery of these credited rights to Drainage District No. 4's Right No. 63-31936 as agreed upon.

Concerning the SF5 for DD#2's Right No. 63-32480, you indicated that you wanted me to look at the conditions on 63-31937 and see if any applied to 63-32480. The only changes I made to 63-32480 were to the name in order to make it the same as 63-31937 for future research of these rights. I also crossed out the total acres per new Department preference and because it is redundant with the other acreage conditions on this right. In the end I did not add any conditions from 63-31937. This 50 cfs right is not listed in the Boise River Water Distribution Report for Water District 63 as having ever been credited back to the point of diversion for these ditch companies. We could only find the 100 cfs under 63-31937 as having been credited. So, I treated this right as a regular waste water beneficial use recommendation.

Also attached is a digital boundary map for the Nampa Meridian Irrigation District. This map reflects the addition of the Creason Lateral irrigated lands and the removal of the BLM lands. Since the addition of the Creason land and the removal of the BLM lands were between 3 and 4 acres each, I decided not to change the total number of acres that can be irrigated within NMID's digital boundary.

There will be no changes to the written recommendations for Nampa Meridian Irrigation District's Right Nos. 63-198AJ, 63-199B, 63-200B, 63-2968 and 63-30181. The objections in those sub cases were the addition of the Creason Lateral lands and removal of BLM lands. This has been corrected as shown on the digital boundary map. This map will be submitted with the SF5s for these rights and a special cover page for the signatures bringing attention to the boundary changes.

Please let me know if these are ready to go or if you need to discuss these rights. I have a conflict for the June 2nd meeting and would like to get these on their way asap which I know you definitely want to also.

Sincerely,

Re: Preliminary Recommendations for Nampa & Meridian Irrigation District's
(NMID) Water Rights

Dear Don:

As we discussed by phone today, enclosed is a letter from Daren Coon, NMID's Secretary/Treasurer, identifying a parcel of land that should be included in the place of use for NMID's water rights.

As we also discussed today, the statement under the quantity element of NMID's water rights related to the Green Ranch diversion should state the amount of water to be used from that diversion as 4.5 afa per acre, rather than 3.5 afa per acre.

Water right 63-30181 has the shorter statement regarding the authorized rate of flow for the Surprise Valley diversion, but does not have the language relating to the amount of water to be used from the Surprise Valley diversion that is in 63-198AJ, 63-199B and 63-200B.

If possible, it would be helpful for future reference if the remarks could be in the same order in each of the water rights.

Today you confirmed that the explanatory material is included in the recommendations for internal IDWR record-keeping purposes only, so that, for ease of reference in IDWR's files, transfer conditions are associated with SRBA decrees. The court will not consider the explanatory material, and it will not be included in NMID's decrees. There is, therefore, no opportunity or need for NMID to object to any of the statements in the explanatory material. Any inaccuracies in those statements can be corrected later at an appropriate time.

I have, nonetheless, reviewed the statements in the explanatory material sections of each of the recommendations for NMID's water rights. The following statement in the recommendations for water rights 63-199B and 63-200B concerns me: "The place of use for industrial and groundwater recharge purposes under right nos. 63-199B and 63-200B is limited to the lands served by the Surprise Valley diversion." I recognize that the statement is one of the conditions in the water right as a result of the transfer to add the Surprise Valley diversion and lands served by it. I think the statement is correct as to groundwater recharge, but I think it is not entirely accurate with respect to industrial use in light of I.C. § 43-335, which allows an irrigation district to lease water rights for use on industrial lands within its boundaries under certain circumstances:

LEASING OF WATER RIGHTS BY IRRIGATION DISTRICT WITHIN THE DISTRICT BY DISTRICT'S WHERE LANDOWNER CAN RECEIVE WATER THROUGH THE DISTRICT'S IRRIGATION SYSTEM. Any irrigation district which has within its boundaries residential, commercial or industrial lands, or any combination of those lands, and which holds water rights for those lands, shall have the right to lease, to any municipality, municipal provider, public utility, domestic water users organization which furnishes water service to those lands, or to any other entity for the distribution of water to those lands for uses other than culinary purposes, those water rights which are held for any residential, commercial or industrial lands for which the owner has elected not to receive his proportionate share of the irrigation district's water through the irrigation system of the district; provided, however, that no water right under which water is delivered through a community ditch shall be leased without the written consent of the ditch users who do not elect not to receive water from the district. For purposes of this chapter, the terms "municipality" and "municipal provider" shall be defined as provided in section 42-202B, Idaho Code; "culinary purposes" shall mean the use of water for direct human consumption, cooking, sanitary purposes, and other such uses. Nothing in this chapter shall be construed as amending or affecting the laws of Idaho pertaining to the control and regulation of public utilities, municipal providers or water corporations.

Since the statements in the explanatory material are not at issue in the SRBA process, this is really an academic issue at this point. The situation contemplated by the statute is, I believe, the only one in which the referenced statement in the explanatory material and the water right is not entirely accurate.

As we discussed over the phone, we are verifying the 40 acre limitation in water right 63-198AJ. Subject to double-checking, it appears that NMID does not have any other concerns with the preliminary recommendations.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and tributaries.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

This right is also designated as Right No. 1 in the Boise River Stewart Decree and Boise River Water Distribution Report.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

Subject: NMID Irrigated Acres

Dan, John and Daren,

This am we reviewed where we are at in computing NMID acres. Here is an approach that might fit the unique situation for NMID:

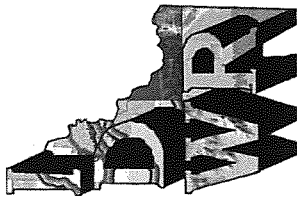

1. We are finding that the irrigation delivery organizations in the Treasure Valley have been able to identify sufficient irrigated acres to justify the acres originally assigned water in their plat books. This target of irrigated acres count has widely been achieved.
2. Lands irrigated under the NMID service area have changed greatly over the years due to urbanization. To the extent that land was not removed from the rolls, the irrigation water right remains.
3. NMID place of use includes both the tax roll and rental roll lands.
4. In some cases NMID water is used on land that was originally platted as too high to receive water. In other cases NMID water is not used on land that was platted to be irrigated with NMID water. It is our understanding that originally unplatted land now receiving NMID water has been added to the rolls on an acre-by-acre basis under the supervision of NMID.
5. Darren advised us at the last meeting in our office that he had counted the acreage in the plat books, but we are not aware of a tabulated copy of this information.
6. To justify the acreage in the original plat books we need a tabulated copy of the information.
7. IDWR has assisted different water delivery organizations in different ways via the SRBA process -- this is not a one-size-fits-all process.
8. IDWR recognizes that there is only one copy of the plat book. Accordingly we would be willing to visit your offices during normal business hours, and tabulate the acres to which water was originally provided by keying into a laptop the number of irrigated acres per tract as described in the plat book. We would be willing to share the resulting spreadsheet with you and ask for a double-check. This listing could be used to back up a count of acres irrigated by the project.

How does this approach sound? Please advise if you would suggest improvements to the approach. Our goal is to create a defensible count of acres -- hopefully one that both NMID and IDWR can support as we make our recommendations to the SRBA Court.

Thanks, Dave

P.S. Anita, would you please place a copy of this email in our NMID file?

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PLACE OF USE: SEE CONDITIONS OF APPROVAL

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
4. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
5. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

6. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
7. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
8. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
9. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
10. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
11. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
12. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
13. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.
14. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
15. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

PLACE OF USE: SEE CONDITIONS OF APPROVAL

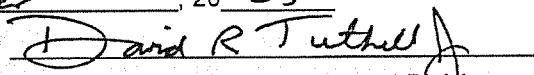

CONDITIONS OF APPROVAL

1. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.
2. Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.
3. Right 63-198AJ is limited to the irrigation of 40 acres within the authorized place of use.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.
5. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

6. The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.
7. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
8. When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.
9. Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
10. The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.
11. The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more volume than can be beneficially used for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
12. The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.
13. The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.
14. Water shall not be diverted under this right at the Green Ranch diversion if such diversion would cause injury to rights senior in priority to November 20, 2001 that are authorized to divert from Mores Creek and its tributaries.
15. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
16. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.

Re: *Nampa & Meridian Irrigation District Transfer Application
No. 69594 for the "Green Ranch"*

Dear Dave:

I am writing to inquire about ownership of one of the rights in the above referenced transfer application for Nampa & Meridian Irrigation District (NMID). Water right no. 63-120F describes 0.40 cfs. Ownership of the entire right is not clear from Idaho Department of Water Resources (IDWR) files. The following summary is provided for your consideration in documenting ownership of this right with respect to the applicant.

Transfer 595 changed the place of use for right 63-120F to 4N 1W 36 SENE (.30 cfs) and 3N 2W 25 ESE (.30 cfs). It was later discovered that the water right prior to the transfer only included 0.40 instead of 0.60 cfs, and IDWR records were adjusted accordingly. The transfer noted water would be conducted to the lands through Settlers Irrigation District (SID) and NMID canals. IDWR approved Transfer 595 in the name of Boise Trust Company.

Boise River Watermaster Lee Sisco recently noted right 63-120F is credited to NMID for 0.20 cfs and to SID for 0.20 cfs instead of entirely credited to NMID in water district accounting.

NMID filed a SRBA claim for this right in early 1990. The claim recorded 0.20 cfs for NMID's service area and referenced the Jacob's Canal. For the sake of computer convenience in dealing with large service areas, in 1990 IDWR listed all the land served by NMID adjudication claims, including 63-120F, under claim 63-30181 ("large claim" technique for extensive land lists; see claims 63-30181Z0 and 63-30181Z1). Claim 63-30181 listed 0.20 cfs for lands served by NMID via claim 63-120F.

Based on the land list for claim 63-30181, it appears that NMID's service area does not include land in 4N 1W 36 SENE (recall place of use in Transfer 595).

January 23, 2002

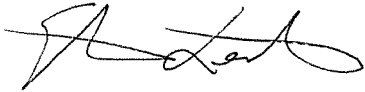

Page 2

NMID filed Transfer 5273 and included 0.40 cfs for right 63-120F. IDWR approved the transfer without resolving the rate of flow discrepancy between the water right and SRBA records. Approval of Transfer 5273 resulted in amended claim 63-30181 by January 2000 to conform the claim to the transfer record. The claim reflected 0.40 cfs for 63-120F pursuant to approval of the transfer.

In summary, SRBA claim history for water right 63-120F identified 0.20 cfs for NMID until Transfer 5273 was approved. IDWR does not have information to show that the applicant owns all 0.40 cfs of this right. NMID should provide sufficient information to show that it acquired all of the water right.

Please submit the above requested information within thirty (30) days of the date of this letter. Thank you for your prompt attention to this discrepancy.

Sincerely,

Dear David:

My secretary, Donna, informed me of your request for a copy of the October 1990 Board of Directors report to the taxpayers of the Irrigation District. She also mentioned that your office had received some telephone calls in relation to this flier.

Should you have any questions that come to you, either in writing or by telephone, it would be appreciated if you would refer these inquiries on to our office for answering. You will find, enclosed, a copy of the flier which was sent to each taxpayer for the 1990 taxroll.

The report is written and submitted to the taxpayers in an effort to keep the taxpayers better informed as to major issues and operational procedures of the Irrigation District. It is the District's belief that the outcome of such newsletter will be a positive one.

I sincerely hope that it has not caused you any problem in your operation. However, if you have any questions concerning any of the statements made on the newsletter, please feel free to call on me.

Sincerely,

NAMPA & MERIDIAN IRRIGATION DISTRICT

OCTOBER 1990

In a continuing effort to keep the taxpayers of the District informed, the Board of Directors feel that the following information is a helpful outline of some major items that the District has accomplished or soon hopes to accomplish.

The following items were acquired by the District as capital assets in 1990 in an on-going effort to improve the taxpayer's equity in the District for the purpose of continued and enhanced operation and maintenance of all aspects of the District:

1. One - Tractor-mounted mowing machine which will be used in conjunction with other methods for cleaning the drains and canals in the District.
2. Two - New 1990 one-half ton pickups which replaced unserviceable units.
3. Miscellaneous items for the recently constructed mechanical repair facility at the District's shop.

Irrigation District Director election for 1990 will be held for the Boise Precinct Director this year. The election will be held 11 December 1990. For details concerning the qualifications, date, and format for filing of Director Election petitions, please contact the District's office at 343-1884 or 466-7861.

The Nampa & Meridian Irrigation District, in conjunction with four (4) other Irrigation Districts, is currently in the negotiation process for hydroelectric facility development at Arrowrock Dam and construction of a dam for irrigation and hydroelectric facilities on the Boise River. This site is also known as the Twin Springs site.

The Bureau of Reclamation has begun repair work on the Deer Flat Dams (Lake Lowell). The work is being conducted through a federal legislative action called the Safety of Dams Act. The project is designed to have a minimal effect on irrigation deliveries.

The filing for Ridenbaugh Water Rights in Nampa & Meridian Irrigation District by the District and for Project Water Rights in Nampa & Meridian Irrigation District by the federal government, Bureau of Reclamation, has been completed for the Snake River Adjudication and is now pending final review and approval by the State and the court system for the adjudication process. Property owners are again urged to contact the Idaho Department of Water Resources for filing on irrigation wells, domestic and stock water wells.

The 1990 irrigation season proved to be somewhat better than anticipated in the quantity of water available, however, on approximately 9 July 1990, the normal delivery was cut to 70% for the remainder of the season to ensure a lengthier delivery season.

A facsimile machine has been installed and is available for transmitting and receiving documents only. The FAX telephone number is 888-6201.

The Irrigation District encompasses approximately 63,000 irrigable acres and approximately 32,000 separate tracts of land and hundreds of miles of canals and drains. To enable the Irrigation District to collect data faster and more efficiently, a new computer system consisting of hardware and some new software has been installed. The resulting effect of this installation has been an increase in the speed of processing data required in the operation of the District.

In conclusion, the Board emphasizes that it has always been and will continue to be its goal to maintain an Irrigation District that plays a positive role in the growth and development of the valley.

Nampa & Meridian Irrigation District

Dear Mr. Bergquist:

Mr. Higginson has forwarded your letter of August 17, 1989, regarding the Snake River Basin Adjudication and the Nampa & Meridian Irrigation District, to me for reply.

The Nampa & Meridian Irrigation District has indicated they will file water right claims for their service area. Since the district serves lands in both Ada and Canyon counties they have notified me they intend to file by the Canyon County deadline which is during March 1990.

I expect the district's claim to be fairly extensive. You may wish to check with the department in April of 1990 to verify the claim has been filed. If you feel you need a copy of the claim you could request a copy at that time.

If you have additional questions regarding the Adjudication, please contact this office.

Yours Truly,

David B. Shaw

Dear Ms. Moore:

My residence is located on the Cruzen-Mountain View
Lateral Association which is sourced by your District.

Confirming our conversation of yesterday, I understand
that the District has made a blanket filing with the Idaho
Department of Water Resources and therefore it is not
necessary for me to file as an individual to protect my water
rights in accordance with Civil No. 39576.

Re: Snake River Basin Adjudication
Twin Falls County Case No. 39576
Claims of Nampa & Meridian Irrigation District

Dear Mr. Shaw:

Enclosed are the following Notices of Claims to Water Rights by Nampa & Meridian Irrigation District, to be filed in the Snake River Basin Adjudication:

<u>Claim No.</u>	<u>Quantity</u>
A63-00120F	0.200 c.f.s.
A63-00198Q	0.400 c.f.s.
A63-00199A	0.40 c.f.s.
A63-00199B	169.200 c.f.s.
A63-00200A	8.9 c.f.s.
A63-00200B	353.040 c.f.s.
A63-02392	4.63 c.f.s.

The maximum acreage claimed for these water rights is 27,042 acres. Nampa & Meridian Irrigation District Warrant RM No. 115 in the amount of \$27,142.00 is enclosed, in payment of the variable filing fee based on irrigated acreage. This warrant inadvertently was drawn for \$100.00 in excess of the amount required, and we request a refund of \$100.00 to Nampa & Meridian Irrigation District from the proceeds of this warrant.

Also enclosed is Nampa & Meridian Irrigation District Warrant RM No. 116 in the amount of \$350.00 in payment of the \$50.00 flat rate filing fee for the seven Notices of Claims.

The following information might be helpful to the Department in analyzing these claims for the purposes of the Director's report in the adjudication:

1. Number 00199B covers most of right number 67 from the Stewart Decree and includes the water right for the so-called rental roll lands served by NMID. The combined total of the Ridenbaugh acres and the rental roll acres is shown as 27,042 acres;

Mr. David B. Shaw
March 21, 1990
Page Two

2. Number 00200B covers most of right number 106 in the Stewart Decree. None of the rental roll land is included in this claim;

3. Number 00200A covers a portion of right number 106 for which the point of diversion was transferred to the New York Canal. The same number of Ridenbaugh acres are included in 00200A and 00200B.

Please note that the boundaries of the District are described in Appendix 1 of the larger claims as those boundaries were established by the Order of the County Commissioners creating the District. That description does not take into account the numerous small parcels that have been excluded from the District over the years. It might be advisable at a later date to amend the claims by filing a list of excluded lands, and I will discuss that matter with your staff at an appropriate time.

I was unable to prepare draft copies of claims based on water right numbers 63-00199 and 63-00200. This is because these water rights have been split into A and B portions, and numbers 63-00199 and 63-00200 no longer represent water rights. Also, a draft copy of water right 63-00200A was not prepared, because this right has been claimed by the Boise Project Board of Control.

Nampa & Meridian Irrigation District

Dear Mr. Shaw:

On February 5, 1990, I requested that Helen Harrington of your office send me format printouts for the water rights of Nampa & Meridian Irrigation District which were identified in the letter. A copy of the letter is attached to facilitate reference.

Yesterday Helen furnished us copies of preliminary printouts indicating that a number of the water rights had been split as a result of transfers. I have had an opportunity to review those printouts and it appears to me that the water rights for which we need to file claims for Nampa & Meridian Irrigation District are as follows:

1. 63-00120 (transfer No. 595 only - 0.20 cfs from Jacobs Canal to Nampa-Meridian)
2. 63-00198 (transfer No. 392 only)
3. 63-00199, 63-00199A and 63-00199B
4. 63-00200, 63-00200A and 63-00200B
5. 63-00249
6. 63-00278 and 63-00278A
7. 63-00279 and 63-00279A

Please call me if any additional information is required in order to obtain the requested printouts.

As soon as the printouts are ready, please have someone call me and we will pick them up.

Thank you very much for your assistance in this matter.

This letter is to confirm your understanding expressed in your letter of July 12, 1989 regarding the filing deadline for Nampa & Meridian Irrigation District.

Since Nampa & Meridian Irrigation District serves lands in both Ada and Canyon Counties the district may elect to file by the later of the county deadlines without late penalties. The deadline for Canyon County is planned to be March 1, 1990.

Please let me know if you have additional questions.

Re: Snake River Basin Adjudication Department of Water Resources

Dear Mr. Shaw:

I have received from your office a copy of Memorandum Adjudication #2, dated January 19, 1989, and I am writing this letter as a follow-up to our discussion regarding the deadline for Nampa & Meridian Irrigation District to file its notices of claims in the Snake River Basin Adjudication.

As you know, Nampa & Meridian Irrigation District delivers natural flow water and stored water, from the Boise River, to lands located in Ada County and lands located in Canyon County. That being the case, the filing deadline for Nampa & Meridian Irrigation District should be the deadline established for Canyon County and I am preparing the notices of claims for the District based on the assumption that no late fees will be assessed if the notices are received on or before the deadline for filing for water rights in Canyon County.

If my assumption is not correct, then please regard this letter as a request for an extension of time for 60 days from the original Ada County filing deadline, within which to file the notices of claims for Nampa & Meridian Irrigation District.

This is a matter of considerable importance to the District because Idaho Code §42-1409(8) imposes a late filing penalty of 15% of the original filing fee and, since the District has water rights for more than 60,000 acres, a late filing penalty in excess of \$9,000.00 might be imposed against the District for failure to file before the applicable deadline.

If possible, I would appreciate receiving confirmation from you that the Canyon County deadline is applicable to the notices of claims to be filed by Nampa & Meridian Irrigation District.

Subject: Adjustment of Arrowrock Reservoir Storage Capacity

Dear Mr. Aschenbrenner:

A 1997 Sedimentation Survey has determined that the total active capacity of Arrowrock Reservoir has decreased to 272,224 acre-feet (see enclosed table of Arrowrock Reservoir Storage Space dated May 2000). The amount of storage space that is available to Nampa and Meridian Irrigation District (District) will now be treated as the equivalent of 58,201 acre-feet.

Under the 1926 Arrowrock Reservoir contracts with the five Boise Project Board of Control districts, the storage capacity available for project lands in the districts has been recognized as 232,264 acre-feet. When distributed in accordance with the acreage agreed upon in the contracts executed in 1990 with the five districts for the repayment of safety of dams costs for Deer Flat Dam, the District's proportionate share under its 1926 contract has been recognized as entitling the District to 55,883 acre-feet. As a result of the decrease in Arrowrock Reservoir storage capacity, 53,080 acre-feet is now available to the District under their 1926 contract, a reduction of 2,803 acre-feet from the amount previously recognized.

The District also has storage rights to an additional 1.9484 percent of the active capacity of Arrowrock Reservoir under Contract No. 7-07-10-W0669, dated June 8, 1987. The amount of storage space that is available to the District under this 1987 contract will now be treated as the equivalent of 5,304 acre-feet, a reduction of 280 acre-feet from the 5,584 acre-feet previously recognized.

According to Bureau of Reclamation (Reclamation) records, a total of 61,274 acre-feet of storage space in Arrowrock Reservoir has previously been available to the District. This 61,274 acre-feet consisted of (a) 55,883 acre-feet available under its 1926 contract, (b) 5,584 acre-feet available under its 1987 contract, and (c) a reduction of 193 acre-feet of storage reallocated to Settlers Irrigation District from the District for lands located within Settlers Irrigation District pursuant to an enclosed July 19, 1995, letter from Reclamation.

As a result of the decrease in Arrowrock Reservoir storage capacity, a total of 58,201 acre-feet of storage space is now available to the District, a reduction of 3,073 acre-feet from the total amount previously recognized.

The 1997 Sedimentation Survey determined that in the 82 years the reservoir has been in operation, about 5 percent of the storage space has filled with sediment. The survey further determined that the reservoir has a total active storage capacity of 272,224 acre-feet and a surface area of 3,141 acres at spillway crest elevation 3,216.0 feet.

If you have any questions regarding the adjustment in your contract amount, please contact Jerry Gregg, Area Manager of our Snake River Area Office, at (208) 334-1460.

Subject: Adjustment of Arrowrock Reservoir Storage Capacity (Old Water Right Lands)

Dear Mr. Aschenbrenner:

A 1997 Sedimentation Survey has determined that the total active capacity of Arrowrock Reservoir has decreased to 272,224 acre-feet (see enclosed table of Arrowrock Reservoir Storage Space dated May 2000). The amount of storage space that is available to Nampa and Meridian Irrigation District (District) for its old water right lands served by the Ridenbaugh Canal will now be treated as the equivalent of 3,794 acre-feet.

Under Contract No. Ilr-414, dated June 1, 1915, as supplemented on November 5, 1918, the District agreed to pay \$64,686 for storage capacity in Arrowrock Reservoir. The proportionate part of \$64,686 ÷ \$4,750,000 of the total available storage capacity has been recognized as entitling the District to 1.36181 percent or 3,903 acre-feet. After including a court ordered increase of \$1,500 to the original contract, the amount purchased increased to \$66,186 for storage capacity in Arrowrock Reservoir. The proportionate part of \$66,186 ÷ \$4,750,000 of the total available storage capacity has been recognized as entitling the District to 1.39339 percent or 3,994 acre-feet. Applying this percentage to 272,224 acre-feet results in a total of 3,794 acre-feet of storage space allocated to the District, a reduction of 200 acre-feet from the amount previously recognized.

The 1997 Sedimentation Survey determined that in the 82 years the reservoir has been in operation, about 5 percent of the storage space has filled with sediment. The survey further determined that the reservoir has a total active storage capacity of 272,224 acre-feet and a surface area of 3,141 acres at spillway crest elevation 3,216.0 feet.

Jan,

fyi - it looks like the parties are close to resolving these. I'll let you know when they get them worked out and we can put together the SF5s.

Thanks!

Larry:

Yes, I am willing to start working on this now. If you or someone from BLM can provide me with the legals of the parcels that you contend are BLM and should be excluded, I can then send them on to the District's office to verify. NMID's objection to add acres was discussed with IDWR before we filed the objection and I don't think they have any problems with it. Thus, if we can resolve the BLM's objections then I think we can wrap things up fairly easily.

Hi Bryce,

I note from objections and responses filed in the above-referenced water rights that you represent the Claimant. BLM objected to delete a parcel of public land from the digital boundary. The Claimant objected to add some parcels to the digital boundary. IDWR has told me they are ready to move forward with settlement documents in Basin 63. I was wondering if you had been able to talk to IDWR about adding the parcels necessary to properly complete the place of use represented by the digital boundary. Perhaps we could work together to get a new digital boundary drafted and settlement documents filed. The only parcel of public land partially encompassed by the digital boundary that I am aware

of is the NWNW, Section 5, T02N, R03E. There may be more that I missed when I looked through the files, but BLM will help me with that. Let me know if we can start working on amending the digital boundary. Scott Beazer in the BLM's state office in Boise is pretty good at it, and he can work with whoever you have doing the technical work for the Irrigation District. Scott's phone numbers is 373-4022. I am pretty sure the Court is about ready to set Initial Hearings, so let me know if your client would like to start working on this.

13. Other Water Rights Used:

14. Remarks:

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 63.

Place of use is within the boundary of Nampa & Meridian Irrigation District pursuant to Section 43-323, Idaho Code.

Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under those rights each year shall not exceed the reported amounts.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The number of acres available for irrigation under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs/acre.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.

When the authorized diversion of water under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B is reduced at the Ridenbaugh Canal, excluding reductions for canal

maintenance, the diversion of water under those rights at the Surprise Valley diversion and the Green Ranch diversion must also be reduced by an equivalent proportion.

Prior to diversion of water under transfer approval 5273 and 69594, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.

The right holder shall accomplish the change authorized by transfer 69594 within one (1) year of the date of approval.

The amount of water diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B from the Green Ranch diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights those rights shall provide no more than 0.02 cfs per acre nor more than 3.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.

The rate of flow diverted under right nos. 63-30181, 63-198AJ, 63-199B and 63-200B at the Green Ranch Diversion shall not exceed a combined total of 0.72 cfs.

The Right holder shall be responsible for measuring and recording the rate of flow diverted from the Green Ranch diversion on a weekly basis during the authorized irrigation season and shall provide the diversion records upon request to the watermaster or the department.

In administering water rights from Mores Creek and its tributaries, the diversion and use of water under this right from the Green Ranch diversion shall be subordinate to other rights from Mores Creek and its tributaries, existing prior to November 20, 2001, with the following exception: this right, when diverted at the Green Ranch diversion, shall not be administered as subordinate to other rights from Mores Creek and its tributaries to the extent of a recognized delivery call from any Boise River water right holder against Mores Creek that is necessary to serve the water requirements of the senior right holder while making reasonable use of existing natural flow and storage water rights available to the right holder.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

**PRELIMINARY ORDER
CORRECTING TRANSFER
APPROVAL**

FINDINGS OF FACT

1. On January 18, 1906, water right no. 63-120 was decreed in the case Farmers Cooperative Ditch Company vs. Riverside Irrigation District, et al with a priority date of June 1, 1864 for 2.2 cfs for irrigation use.
2. Application for transfer no. 595 was filed in August, 1938 for a portion of water right no. 63-120 in the amount of 0.6 cfs. The application proposed to change the point of diversion and place of use under the right to lands served by Settlers Irrigation District and Nampa & Meridian Irrigation District canals.
3. On September 27, 1938, transfer no. 595 was approved; the transferred portion of the water right has been designated water right no. 63-120F in records of the Idaho Department of Water Resources (Department).
4. Department review found that only 0.4 cfs was available for the transfer due to previous transfers to water right no. 63-120 and the Department subsequently corrected the records to reflect 0.4 cfs under water right no. 63-120F.
5. Nampa & Meridian Irrigation District filed a claim in the Snake River Basin Adjudication for their portion of water right no. 63-120F under claim no. 63-30181.
6. On January 16, 1998, Nampa & Meridian Irrigation District filed application for transfer no. 5273 (transfer) involving several water rights including water right no. 63-120F. The application proposed to change the entire 0.4 cfs under water right no. 63-120F.
7. On January 27, 2000, the Department approved the transfer, which included a quantity of 0.4 cfs for water right no. 63-120F and a total quantity under the transfer of 532.34 cfs.

8. In January, 2002, the watermaster of State Water District 63 contacted Department staff regarding water right no. 63-120F. The watermaster questioned the ownership for the water right. The water district records showed 0.2 cfs each for Settlers Irrigation District and Nampa & Meridian Irrigation District under the water right as approved under transfer no. 595.
9. Department staff review confirmed that ownership documentation did not exist for Nampa & Meridian Irrigation District for the entire 0.4 cfs recorded under water right no. 63-120F.
10. On January 23, 2002, the Department sent a letter to Dave Shaw, consultant for Nampa & Meridian Irrigation District, inquiring about ownership of water right no. 63-120F and requesting documentation to show ownership of the entire 0.4 cfs.
11. On February 28, 2002, Department staff in conference with Bryce Farris, attorney for Nampa & Meridian Irrigation District, noted Mr. Farris' indication that Nampa & Meridian Irrigation District does not have documentation for ownership of the entire 0.4 cfs and agreement that the correct quantity is probably 0.2 cfs.
12. On May 2, 2002, the Department sent a letter to Nampa & Meridian Irrigation District and to Settlers Irrigation District describing the error in the Department's records regarding ownership of water right no. 63-120F and proposing that the records be corrected to show a quantity of 0.2 cfs each for Nampa & Meridian Irrigation District and for Settlers Irrigation District. The letter indicated that a reply would not be necessary unless information was available to provide a different conclusion.
13. On June 21, 2002, the Department received an amendment to application for transfer no. 69594, which also proposes a change to water right no. 63-120F, from Bryce Farris on behalf of Nampa & Meridian Irrigation District. The amendment was provided to change the quantity for water right no. 63-120F from 0.4 cfs, as originally listed, to 0.2 cfs.

CONCLUSIONS OF LAW

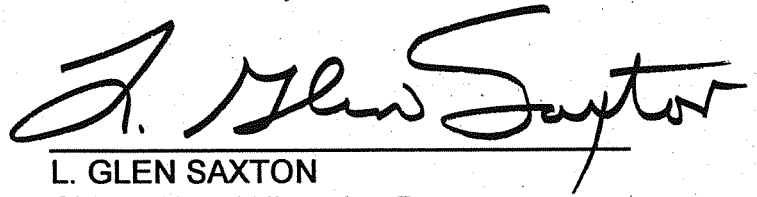

1. The transfer approval should accurately describe each established water right as changed by the transfer pursuant to Section 42-222, Idaho Code.
2. The transfer approval incorrectly describes the quantity for the portion of water right no. 63-120F owned by Nampa & Meridian Irrigation District and the total quantity transferred.

3. The Department should correct the transfer approval to show the correct quantity associated with Nampa & Meridian Irrigation District's portion of water right no. 63-120F and to show the correct total quantity transferred.

ORDER

IT IS THEREFORE HEREBY ORDERED that transfer approval no. 5273 is **CORRECTED** by changing the quantity for Nampa & Meridian Irrigation District's portion of water right no. 63-120F, to be designated as water right no. 63-30181, to 0.2 cfs and by changing the total quantity transferred to 532.14 cfs.

Ridenbaugh Canal	Lot 6(NWSW), Sec. 29, Township 03N, Range 03E ADA County

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

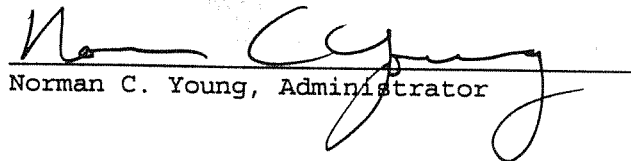

1. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
2. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Prior to March 15 of each year the right holder shall report to the department the number and location of acres to be irrigated by these rights from the Surprise Valley diversion and shall also report the maximum rate of flow to be diverted for industrial and groundwater recharge purposes at the Surprise Valley diversion. Use of water under these rights each year shall not exceed the reported amounts.
5. The amount of water diverted from the Surprise Valley diversion for irrigation purposes shall be calculated at a diversion rate of 0.0156 cfs per acre to be irrigated, and when combined with any other rights these rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation purposes. This condition shall not be construed as a requirement for the right holder to regulate water on a volumetric basis.
6. The number of acres available for irrigation under these rights from the Surprise Valley diversion each year shall be reduced from a maximum of 1300 by at least the number resulting from the total rate of flow to be diverted for industrial and groundwater recharge purposes divided by 0.0156 cfs per acre.
7. Each year the amount of water available for irrigation at the Surprise Valley diversion shall be reduced by the amount of water to be diverted for industrial and groundwater recharge purposes under these rights.
8. Diversion and use of water for industrial purposes under these rights shall not be more consumptive nor more depletive of water flowing in the Boise River than an equivalent diversion and use of water for irrigation purposes under these rights.

TRANSFER NO. 5273
WATER RIGHT NO(S). 63-00120F/63-00198Q/63-00199B/63-00200B

CONDITIONS OF APPROVAL AND REMARKS

9. The rate of flow diverted under these rights at the Surprise Valley Diversion shall not exceed a combined total of 20.34 cfs.
10. When the authorized diversion of water under these rights is reduced at the Ridenbaugh Canal, excluding reductions for canal maintenance, the diversion of water under these rights at the Surprise Valley diversion must also be reduced by an equivalent proportion.
11. Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works from all authorized points of diversion that is acceptable to the watermaster and will provide suitable control of the diversions.
12. The annual volume of water used for industrial and groundwater recharge purposes shall be measured using separate totalizing measuring devices and the right holder shall report the totals to the department by Dec. 31 of each year.
13. Place of use is within the Nampa and Meridian Irrigation District boundaries.
14. Right 63-00198Q is limited to the irrigation of 40 acres within the authorized place of use.
15. The place of use for industrial and groundwater recharge purposes under these rights is limited to the lands served by the Surprise Valley diversion.

Dated this 27TH day of JANUARY, 2000.

The Board of Directors of Nampa & Meridian Irrigation District has set 21 October 1997 at 2:30 p.m. at the office of the Board at 1503 First Street South, Nampa, Idaho for a hearing to accept or reject the Petition for Annexation. Any persons interested or who may be affected by such change of boundaries should appear at said hearing and show cause, in writing, why the lands should not be annexed to said District. Failure of any person to appear will be taken as an assent to a change in the boundaries. The Board of Directors will take all information presented at the hearing into consideration before rendering their decision.

If the Board of Directors deem it not for the best interest of the district to include the lands mentioned in the petition, the Board shall order that the petition be rejected. But, if they deem it for the best interest of the District to annex said property, the Board may order the lands mentioned in said petition or some part thereof annexed to said District. An order shall be issued by the Board to annex said property, but said order shall not become effective until the ninety (90) day period for presentation of an election petition shall have expired without such petition being presented or until approval of the annexation at an election.

If within the ninety (90) days of Board approval of an order allowing annexation a petition signed by either ten (10) landowners or by two percent (2%) of the landowners, whichever number is greater, of the District is presented to the Board which petition states that those signing request an election to approve or disapprove said annexation, then the Board shall order an election be held within said District to determine whether the boundaries of the District shall be changed as mentioned in said order.
