Date of Priority for Water Right

A deep water well was constructed on our property on July 31, 1975 (see well driller's report attached). The deep water well replaced a surface well. The surface water source accessing a spring consisted of a 350 foot pipeline of which 150 feet crossed National Forest land, a water tank and a pump house. I have attached documentation of special use permits from the National Forest Service, the earliest of which refers to a permit dated May 1, 1961. Although May 1, 1961 is the earliest documentation of water use, the spring was used as a water source for years prior. The pump house previously used for the spring is in the exact same location on our land as the pump house now used for the deep water well. According to Jean Bradley, forester with the State of Idaho Department of Lands, the National Forest land referred to in the special use permits was transferred to the State of Idaho on December 28, 1987.

I have indicated a priority date for our water right as May 1, 1961 based on the earliest date for which I have written documentation of the use of the water.
