OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

This right remains subject to the right of the original appropriator, in good faith and in compliance with state laws governing changes in use and/or expansion of water rights, to cease wasting water, to change the place or manner of wasting it, or to recapture it.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use

This right is a split from former right 63-4025.

**IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS**

In Re SRBA

Case No. 39576

Water Rights: 63-32069

**NOTICE OF COMPLETED
ADMINISTRATIVE
PROCEEDING**

IDWR has completed the following administrative proceeding:

XX Address change

Substitution of Party

☐ IC § 42-222 transfer

- | | |
|---|--|
| ☐ Point of diversion | ☐ Place of use |
| ☐ Period of use | ☐ Nature of use |
| ☐ Split of water right | ☐ Change in ownership |
| ☐ Other | |

☐ IC § 42-219 license

IDWR certifies that it has completed its investigation into the changes to the elements of the water rights listed above as set forth in the attached *Amended Director's Report(s)* for said water right(s). No other changes have been made to the elements of these water rights except as set forth above.

IDWR has served copies of the *Notice of Completed Administrative Proceeding* and *Amended Director's Report(s)* on the claimant(s), prior claimant(s) and all parties in the subcases affected, if any, as reflected on the attached certificate of mailing.

DATED: February 23, 2007

Signature of IDWR Representative

CERTIFICATE OF MAILING

I certify that on February 23, 2007, I delivered the original and copies of this form, including all attachments, to the following persons, postage prepaid if required and addressed as follows:

Re: Original Notice of Claim to a Water Right No. 63-4025

Renumbered Notice of Claim to a Water Right No. 63-32069

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim represents a split of the claim filed by a previous owner during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience, as we have had several water right changes to process. Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Adjudication Section
Western Region

Department of Reclamation

Identification No. 63-4025P
 Claim No. 42687
 Map No. _____

STATE OF IDAHO
 DEPARTMENT OF RECLAMATION
 CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant George L. Walker
 post office address P/ B/ No. 498 - Parma
2. The point of diversion is in SE 1/4 of SW 1/4 Section 9 Township 5 North
 Range 5 West B.M. located on Waste Way of the Farmers' Co-Operative Ditch
 Company _____ (name of source)
 tributary to Boise River in Canyon County.

3. Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed:

January 1st, 1938 amount: _____ c.f.s. or 1 and 3/5 acre feet
 _____ amount: _____ c.f.s. or _____ acre feet
 _____ amount: _____ c.f.s. or _____ acre feet
 Total claimed _____ c.f.s. or 1 and 3/5 acre feet.

- b. Explain the purpose for which the water has been used and the time during the year when you have used

the right claimed:

This water has been used on said lands continuously for 30 years for irrigation
 use _____ period of use from _____ to _____ (both dates inclusive)

use Irrigation period of use from April 1st to October 15th (both dates inclusive)
during each of the last 30 years

use _____ period of use from _____ to _____ (both dates inclusive)

use _____ period of use from _____ to _____ (both dates inclusive)

4. Description of diverting works:

- a. Surface water diversion dam and/or headgate: material is composed of One electric pumping
system and plant in waste way continuously and water pumped from said waste way to
 by a conveying ditch three feet wide; length is said lands feet; height is _____ feet;
 width at bottom is three feet; with at top is four feet; explain any increase in diversion capacity since structure was first built, giving dates and estimated capacities if known _____

- b. Underground water diverting works: is well flowing or pumped _____; depth of well is _____ feet; diameter of well is _____ inches; type of pump is _____
 capacity of pump is _____ g.p.m.; name and address of well driller is _____

if feeder canal is used give maximum carrying capacity_____c.f.s.; if reservoir is off stream, describe location of reservoir by 40-acre subdivisions_____

[illegible]

Explain any significant increase in area irrigated since first use, give dates and acreages if known _____
No change

b. Do you get water through a ditch owned by several users? No If yes, give the name of the ditch
_____. The other users and their respective
interests in the ditch are (if known) _____

6. Where water is used for stock watering, give number of each kind of stock watered _____
It is for irrigation of arid lands

7. Where water is used for domestic or municipal purposes give number of families served _____
name of town supplied _____

8. Where water is used for other purposes not above enumerated, give the nature of use, the extent of use,
and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible,
giving dates and quantities _____

None

9. Remarks: please explain any details of your claim which you feel need clarification or additional explanation
The water for the lands herein described was secured from a nearby waste
way which was about January 1, 1938, when said nearby waste way was diverted into
the waste way herein described, and upon which this filing is made

BE IT KNOWN that the undersigned hereby makes claim to a water right as described above together with
all attached information and certifies that all statements are true and accurate to the best of his knowledge.

ERNEST ANDERSON

ATTORNEY AT LAW
PARMA, IDAHO 83660

July 18, 1968.

Department of Reclamation,
Statehouse-Annex 2,
State of Idaho,
Boise, Idaho, 83707.

Dear Sirs: Claim to Water Right
George L. Walker-Parma.

I am returning herewith CLAIM TO A WATER RIGHT, of
George L. Walker, of Parma, Idaho, completed as you suggested
in your letter dated July 17th, 1968.

This water was used for irrigation purpose upon the
lands described in the application dated July 5th, 1968. each
year for the last 30 years, continuously, between April 1, and
October 15th, both dates inclusive, during the last thirty years,
aforesaid.

Very truly yours,

Attorney for George L. Walker

RE: A63-22193, A63-27742, A63-32068, A63-32069

Statutory claim 63-4025 was originally filed by George Walker on a waste way for irrigation of 63 acres that the claims listed above are appurtenant to. George submitted an affidavit in 1968 supporting a 1938 priority date. That right was claimed in the SRBA by Fred Hines, then split into A63-32068 & A63-32069 due to a change in ownership filed by the Fords. The Ford's purchased 39.5 acres of the claim A63-4025 represented by A63-32069. Current owner for that property is 4D Arena LLC. The remaining 10.5 acres was left in Fred Hines name as A63-32068.

Claims A63-22193 and A63-27742 were filed on property within the 10.5 remaining acres. The claimants were probably unaware of the statutory claim at the time of filing and just filed beneficial use claims.

A63-22193 lists wastewater for irrigation of 6 acres filed by the Hofeldts listing a 1900 priority date. Current owner for that property is Karl Morris.

A63-27742 lists a drain ditch for irrigation of 2 acres filed by Cutler and Campbell listing a 1935 priority date. Current owner for that property is Abel Martinez.

The only portion of the remaining 10.5 acres listed on claim A63-32068 not claimed on a separate beneficial use claim is 3 acres located in the very bottom SESESW corner currently owned by Justin Coranado.

Proof of priority letters will be sent to A63-22193 & A63-27742, stating that the department has a affidavit on file supporting a 1938 priority date. They could either try to establish their claimed priorities or go with the 1938 date.

MEMORANDUM

TO: ADJUDICATION FILES 63-32068, AND 63-32069

FROM: DANIEL A. NELSON

DATE: 9/8/06

SUBJECT: FIELD EXAMINATION

I was asked to perform a field exam on water right 63-32068 for Bradley and Brenda Ford, and to check on a 10-acre water right for 63-32069 for a Mr. Fred Hines. Apparently, Mr. Hines originally owned the entire farm and subsequently split it into 4 separate parcels. The Fords purchased the largest parcel, and a Martinez, Morris, and Corando purchased the three smaller parcels. The Fords were the only one of the four new owners that would respond to adjudication agent's mailings, so they were my only chance of contact. The adjudication Agent, Lori Graves, asked if I would check on the other parcels and see if any of them are irrigating other than the Fords. During my field visit I found that Martinez parcel and the Ford parcel were the only lands being irrigated. The irrigator for the Fords informed me that he has never seen the Morris or Corando irrigate anything but their yards, and he assumed that they do that from their house wells. Therefore, I believe that the remaining 10-acre portion of the original water right belongs solely to Mr. Martinez, so 63-32068 should be reduced to his portion of the original right. I will discuss the details of each water right below:

63-32069 (Ford Portion of statutory claim 63-4025)

Water right 63-4025 was originally filed with a single point of diversion from a drain located in the SESW of S9 T5N R5W. The drain water was delivered to several ditches to irrigate a 50-acre farm. The Fords purchased a 46.2-acre portion of the farm. The Fords are still irrigating the farm in the same manner as Hines did originally, except they don't supply water from their point of diversion to the other folks that purchased portions of Hines' original farm.

The water for this farm is actually diverted from 2 separate drains, and not a single drain as claimed by Mr. Hines. The North Pump diverts the main water source from the upper drain, which runs along the northern border of the farm. The water is diverted through cement and earthen ditches down to the lower drain running along the southern border of the property. The lower drain collects very little water, and it is not able to irrigate the small triangular field in southern portion of the SWSE by itself without water from the upper drain intentionally being diverted to the lower drain to supplement that source. The corral pump is used to divert water to a earthen ditch to irrigate the small field from the lower drain. Even though most of the water being diverted through the corral pump is from the upper drain, the small amount of water delivered through the lower drain is also used.

Page 2

63-32068 & 63-32069

I found that a total of 37.4 acres are being irrigated on the Ford property. The Ford's portion of the split of the original statutory claim was 39.5 acres. This makes sense since there are several drains and ditches running through the area. There is also a small entrance way that has now been turned into a hay and machinery lot.

I measured the water being diverted from the North pump at a diversion rate of 1.20 cfs. The corral pump was not operating, and there was not enough water in the lower drain to measure. I did do a theoretical calculation on the corral pump and it has a capacity of 0.69 cfs. If both drains were full, this system would have the ability to divert 1.89 cfs. The system only irrigates 37.4 acres, so the maximum allowable is 0.02 cfs per acre or a total of 0.75 cfs. I suggest that this claim be recommended as follows:

Unnamed drain in the SESW T5N R5W S9

Unnamed drain in the NESW T5N R5W S16

Irrigation of 37.4 acres – 17 acres in the SWSW S9
 20 acres in the SESW S9
 0.4 acres in the NENW S16

0.75 cfs and 168.3 afa for irrigation use from 3/1 to 11/15

63-32068 (Martinez Portion of statutory claim 63-4025)

This portion of the original claim has its own pumping system for the drain. No one was home at the time of the exam, so I was not able to find out when it was installed. However, the parcel and home can clearly be seen in the 1987 aerial photo so I assume it could be considered an accomplished transfer.

The water for this portion of the claim is pump directly from the upper drain and irrigates approximately 1.7 acres. The pump was washed out during this springs high water event, and the owner hasn't replaced or fixed it. However, the pump was still there, it just wasn't useable. The irrigator for the Fords said that he did irrigate last year, because he saw the water in the field.

Page 3
63-32068 & 63-32069

The pump is a 2 Hp Parma Pump. The theoretical calculation shows that the capacity of the pump is 0.48 cfs, which is much more than is needed for this system. Whereas this irrigation use is less than 5 acres, I decided to use 0.03 cfs per acre standard for smaller irrigation uses, since there are less acres currently being irrigated than original claim. There should be no need for a fee upgrade. There is 1.7 acres being irrigated, so the total water use should be 0.05 cfs and 7.7 afa.

I would suggest that this claim be recommended as follows:

Unnamed Drain in the SESW T5N R5W S9

0.05 cfs and 7.1 afa for irrigation of 1.7 acres in the SESW T5N R5W S9 from 3/1 to 11/15

FILE NUMBER 63-32069

The top photo shows the North pump for the upper drain. It flows into a small settling pond and then is goes into a cement ditch.

The middle photo shows the Corral pump. This pump diverts from the lower drain and into an earthen ditch that travels south.

The bottom photo shows the place of use from the North pump. The ditch flowing on the right hand side of the photo is the water being diverted through the North pump. My measurement was made on this ditch.

ADDITIONAL INFORMATION NEEDED FOR IRRIGATION FIELD EXAMS

Field Examiners, please complete the following checklist. Mark "unknown" or N/A if information doesn't apply or information is unavailable.

IF CURRENT OWNER DOES NOT MATCH PROOF REPORT PLEASE GIVE NEW OWNER CHANGE OF OWNERSHIP FORM TO COMPLETE.

1.) Pump information:

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
CORRAL PUMPS	AG Smith	3Hp	7-364555 -02-05	PARN	301-6000-2/1
NORTH PUMP	Baldor	5Hp	1013617 71T	PARN	8" discharge

CORRAL Pump 5.7 FT

2.) Lift (distance from pump to water) NORTH Pump 4.4

3.) How was lift determined (well log, measurement, owner)? MEAS

4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) PARTIAL PUMP

NOT enough

5.) Was a measurement made? NO If no can a measurement be made at a latter time? NO

WATER
TO RUN
CORRAL

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
 PLAT OF PROPERTY or SURVEY MAP clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) are for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

3. Name and Address of Former
 Owner/Claimant(s)

FRED HINES
30550 BOULDER RD., PARMA, ID 83660

4. New Owner/Claimant(s)

BRADLEY K. & MR BRENDA K. FORD

Name Connector (Check one): ☐ and, ☐ or, ☐ and/or

New Mailing Address

16315 N. MIDLAND

City, State and ZIP Code

NAMPA, ID 83687

New Telephone Number

208 466-9527

5. Date you acquired the property

1993

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT

Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

- Name of claimant George L. Taylor
post office address P.O. No. 498 - Parma
- The point of diversion is in sec 4 $\frac{1}{4}$ of SW $\frac{1}{4}$ Section 3 Township 5 north
Range 5 East B.M. located on Waste Way of the Farmers' Co-Operative Ditch
Company (name of source)
tributary to Boise River in Carson County.

- Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose as originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed:

January 1st, 1938 amount c.f.s. or 1 and 3/5 acre feet
 amount c.f.s. or acre feet
 amount c.f.s. or acre feet
 Total claimed c.f.s. or 1 and 2/5 acre feet.

- Explain the purpose for which the water has been used and the time during the year when you have used

the right claimed
 This water has been used on said land continuously for 36 years for irrigation
 use period of use from to (both dates inclusive)
 use Irrigation period of use from April 1st to October 15th (both dates inclusive)
during each of the last 30 years
 use period of use from to (both dates inclusive)
 use period of use from to (both dates inclusive).

- Description of diverting works

a. Surface water diversion dam and or headgate: material is composed of One electric pumping
system and plant to waste water continuously length is 11 feet, height is feet
by a concrete ditch three feet wide
 width at bottom is three feet, width at top is four feet explain any increase in diversion capacity
 since structure was first built, giving dates and estimated capacities known
none

The water in said ditch is waste water, spring water and spring water
 b. Underground water diverting works: well flowing or pumped depth of well is
feet diameter of well is inches; type of pump
 capacity of pump is g.p.m. name and address of well owner is

MICROFILMED

JUL 25 1994

attach well logs if available. Has there been any change in pump or motor since we last met completed
Type of water and explain. 22. 11.11

Conveying work: length of ditch to place of use is 1 1/2 miles; width of ditch at top is three feet; width of bottom of ditch is two feet; depth of water is two feet; grade of ditch per 1000 feet is 1 foot; material through which ditch passes is open ditch and stone pipe; maximum length of pipe line to first place of use is 1 mile; diameter of pipe hole is 7 inches; type of pipe iron; grade of pipe per 1000 feet 1.

Please explain any changes or increase in size of conveying system since water was first appropriated giving date and dimensions if possible. No change

d. If water is stored: name of reservoir _____ No. reservoir _____
total capacity of reservoir is _____ acre feet active capacity of reservoir is _____ acre feet
year construction commenced _____; year completed _____; date first used _____
period of storage is from _____ to _____; is reservoir drained each year _____
is reservoir on or off stream _____ explain _____

if feeder canal is used give maximum carrying capacity, _____ c.f.s.; if reservoir is off stream, describe location of reservoir to 40-acre subdivisions _____

has there been any enlargement of the reservoir since it was first built _____; so, give dates and describe _____ no reservoir

5. a. Where water is used for irrigation, describe area irrigated by 40-acre subdivisions and give total acres.

[illegible]

Total number of acres to be irrigated 13

Explain any significant increase in area irrigated since first use. Give dates and acreages if known.

b. Do you get water through a ditch owned by several users? No If yes, give the name of the ditch
The other users and their respective
interests in the ditch are (if known)

6. Where water is used for stock watering give number of each kind of stock watered
It is for irrigation of arid lands
7. Where water is used for domestic or municipal purposes give number of families served
name of town supplied
8. Where water is used for other purposes not above enumerated give the nature of use the extent of use
and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible
giving dates and quantities.

9. Remarks please explain any details of your claim which you feel need clarification or additional explanation
The water for the claim herein described was secured from a water right
which was lost January 1, 1968, when said nearby water right was diverted into
the water right herein described, and with this filing is made

BE IT KNOWN that the undersigned hereby makes claim to a water right as described above together with
all attached information and certifies that all statements are true and accurate to the best of his knowledge.
