Re: 94-9320 [47N 02W 18 0400]

Dear Mr. Maxey.

Please find enclosed copies of the information listed in the table below. As you can see, Tax #0400 is contiguous to Tax #8600, 3400 and 6250. It's 40 acres also entails large changes in elevation, as well as many uses for the surface water throughout the property. The topographic map identifies some of the main tributaries in to Black Creek, but it impossible to pin point every one of them. The color map enclosed clearly shows the green color changes where the draws move what surface water isn't absorbed down the mountain into Black Creek where the stock can drink when they are at pasture in Tax #8600.

Right now all our cattle are out to pasture at another location except a first time mom down at the barn on Tax #5800, and our black milk cow that is pastured up by our house on Tax #8600. Her water source is directly out of well #D0054714.

This piece of property was brought in to the family on May 15, 1944 by Irene Rader and her husband. Irene was the current owner's (Dean Bates) sister. This land has been used by the family for farming and pasture since that time. Dean Bates believes that the "Spinsters" that lived on the little meadow at the bottom migrated up from Black Lake.

I would like to note that this area is "open range" and lack of fencing does not mean the land was not in use.

I will be more than happy to amend this application or complete another one to show these uses of our well and surface waters if necessary. Thank you for your time and I look forward to our meeting on Tuesday. Please let me know if you need any further information and I will try to gather it before that day.
