20	845	150+	26+	26	209	300
21	425	12	19+	19	N/D	N/D
22	No Well					
23	No Well					
24	No Well					

The test pump used for all test is an 18 GPM 5 HP Goulds. All tests are limited to the max flow of this pump at depth.

All wells tested have achieved the minimum of 5 GPM average flow for 4 hours. Only 2 wells so far have recovery of less than 5 GPM but both are deep and offer lots of storage (1 & 5). Both of these wells were tested short of the bottom as well due to pump limitations but still achieved minimums.

Testing of well on lot 17 was attempted but requires liner repair. This repair has been authorized but not completed as of yet.

The well on lot 6 had been abandoned due to filling of casing above 200 feet.

All wells have been located and tested. A total of 22 were tested.

Dave Bangle, Sandpoint Pump and Power
