Questionnaire.

Exceptions to Forfeiture for Mining Questionnaire – Section 42-223(11), Idaho Code

This questionnaire should be used as a guide to provide evidence supporting an exception to forfeiture. Each answer will need to have corresponding documents and/or affidavits.

List the adjudication claim number(s) in which an exception to forfeiture under Section 42-223(11), Idaho Code is sought:

94-4235

- 1) Enter the name of the mine or property in which the water claimed above was historically used. (All of the following questions will refer to the mine or property named below.)

Gold Creek Mines, Inc.

- 2) When was the mining, mineral processing or milling at the mine or property suspended?
Mining discontinued in 1960s. Property maintained for mining since then. Various mining companies have continued with exploration.

- 3) Described the reason(s) the mining, mineral processing or milling of minerals at the mine or property was suspended or the mine was closed?

Unknown, but believed to be related to low metals prices. Records have not been located.

- 4) Does the mine or property have one or more valuable minerals as defined in Section 47-1205, Idaho Code? If so, please list the mineral(s).

Yes, silver, copper and lead known to exist, along with traces of gold. See letter of Dan Hussey.

- 5) Please provide a history of the price of the mineral(s) at the mine or property?

Production may have occurred in 1940's and 1950's, no records found.

- 6) Explain how the property and mineral rights have been maintained for future mineral production at the mine or property?

In the late 1950's and 1960's, Elmer Almquist maintained the tunnels, adits, water lines and ponds for the owner,

A.A.M. Arnold. Elmer Almquist acquired the property in 1975 and continued the maintenance, including payment

of real estate taxes and Bureau of Land Management fees for all unpatented claims. In addition, the property

has been leased to various mining companies for exploration and preservation.

Mr. Michael Branstetter

Wallace, Idaho 83873

Dear Mr. Branstetter,

U.S. Silver & Gold Corporation leases a group of claims referred to as the Gold Creek claims. Surface geologic mapping indicates a broad zone of multiple WNW and EW striking veins with siderite, quartz, barite, and pyrite. Much limonite (oxidized mineralization) float is seen in road cuts indicating the potential for an extensive zone.

In 2007 U.S. Silver drilled two core holes on the property. The first hole was abandoned at 386 feet due to poor drilling conditions. The second hole was completed to 1435 feet. An extensive zone of weak mineralization was seen in the core. The best assay was from a vein at 871 feet which was 0.6 feet thick with 1.54 ounce per ton silver and 0.052 percent copper. While this is not very impressive, the geology within the hole was good enough to warrant another drill hole. Unfortunately, since 2007 the company has had other priorities and has not been in a position to drill another hole. The company does maintain the property lease however.

Sincerely,

Dan Hussey, Chief Geologist
