POD for 47-2531 on licensed POU

Plate No: A0016292

GPS- Bruce2

Appears to be some unapproved transferring of licensed water going on here. According to Lee, Bruce told him that the area appurtenant to license 47-2521 is no longer irrigated with ground water and is exclusively TFCC now, he told Lee that those wells have been abandoned and plugged up. Apparently the claimant is using both licenses on the 47-2531 POU and on the non-claimed land (11S 19E S18 SESW SWSE SESE & NESE NWSE).

The POU **claimed** in 47-2531 (not the licensed POU) was purchased in 1990 and the unapproved transfer from licensed to claimed POU occurred in 1995. Will have to recommend licensed POU and POD for 47-2531.

Yesterday I called Bruce and he informed me his Uncle Harold I Bulcher {died} and should be taken off file. So while we were reviewing these water right files he said the yellow area in file 2521 is all Canal Co. water and in file 2531 almost all of the land is irrigated with large circle irrigation systems and some of the corners are hand line irrigation, with some small corners left dry. Looking back into the 10/09/2000 photo's 2521 file of the two POD's he informed me that both of these POD's are abandoned ,plugged and long covered up, these two rights have been transfer to the land further down the photo to the area in blue where well POD is now. The domestic well is a sub. Well by labor house [see GPS] IN 2531 file CC POD is shown from canal with pipes. All water is co-mingled . Bruce said the area in file 2531 was purchased in approx. 1990 from the old Joe Savage bankruptcy and the POU was moved from the licensed location in approx. 1995
