Re: Coeur d'Alene-Spokane River Basin Adjudication (CSRBA) claim 91-7502

Dear Mr. and Ms. Geike,

After the hearing on September 15, 2015, in connection with the Motion to Amend Claim 91-7502, I have been asked to follow up with the review of your amended claim.

As I understand it, the main point of amending the claim is to recognize a replacement well located in Government Lot 8, (NENE), as the actual point of diversion for 91-7502. The old well was located in Government Lot 1, (NENE).

The maps submitted with the amended claim show the new well as being located in Government Lot 8 (NENE). However, there are several well log records in that area. IDWR well construction data shows a well drilled in 2011, located in government lot 1. In addition, there are records of wells drilled in the NENE of Section 4, that don't narrow down what government lot they are located in:

<http://idwr.idaho.gov/Apps/appsWell/WCInfoSearchExternal/>. There could very well be other wells drilled that IDWR has no record of.

I just want to confirm with you where the old well and new well is located. I also need to know when the replacement well was drilled. I have enclosed a map and a postage paid envelope for your convenience. Could you please locate the wells on that map and return the map to me at your earliest convenience to help me understand where the old and new wells are. Please include any information related to the new well, like date drilled, and a metal tag number if it is available. Finally, if you had a way to get a GPS point on the well locations, that would really help verify well locations.

Please feel free to contact me if you have questions, please do not hesitate to call me at 208-287-4916.

Respectfully,

Craig L. Saxton
Adjudication Technical Analyst

91-7502 Well Location Map

Please Draw in the location of the old well and the locaiton of the new (replacement well). If you could GPS the new well and send the coordinates, that would be really helpful.
