LEGAL DESCRIPTION

PART OF LOT 2 OF SEC. 30 AND ALSO PART OF THE NW¹ NE¹ OF SEC. 31, ALL IN T10S, R24E, BM., BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING AT THE NE CORNER OF THE NW¹ NE¹ OF SEC. 31, R.24E, BM., WHICH SHALL BE THE TRUE POINT OF BEGINNING:

THENCE SOUTH FOR 671.5 FEET TO A POINT ON THE N R.O.W. OF STATE HWY. 81;
THENCE N 87° 40' W FOR 687.66 FEET ALONG SAID NO R.O.W. TO A POINT;
THENCE N 0° 15' W FOR 1008.8 FEET TO A POINT;
THENCE N 89° 45' E FOR 174.0 FEET TO A POINT;
THENCE N 0° 15' W FOR 2330 FEET TO A POINT ON THE HIGH WATER LINE OF THE SNAKE
THENCE EASTERLY ALONG SAID HIGH WATERLINE FOR ± 515 FEET TO A POINT ON THE EAST OF LOT 2;
THENCE SOUTH FOR ± 670 FEET ALONG SAID E. LINE TO THE TRUE POINT OF BEGINNING.

A typical domestic use is a well used for a single family residence, including up to 1/2 acre of lawn and garden. This type of use would qualify for the special procedure. But since water rights are almost infinite in their variety and since the definition is fairly complicated, further explanation of the definition of domestic use is provided below.

Based on the statute and the rules, there are five prerequisites that must be met for a campground use to be eligible for the special procedure:

- (Note that "owned by a group of people" means that each member in the group is an owner of the entire facility. Individual ownership of individual parcels is not the same thing, even though all of them together can be said to own all of the parcels.

In example 1, the parcel is in single-ownership, although owned by a group of people, because A, B, C, and D each own a partial interest in the entire property. In example 2, each parcel is owned by a different person, and each is in separate ownership, even if A, B, C, and D are in the same family, either by blood or marriage. In example 3, each lot is owned by a different person.

and each is in separate ownership, even if Corporation A is wholly owned by A, because a corporation is its own legal entity separate from the people that own the corporation's stock. In example 4, the two lots can be considered one parcel, even if the lots were separately acquired or separately designated in county records, because they are owned by the same persons.)

5. The campground must not be a commercial or business establishment. In other words, a campground owned by a non-profit organization or public agency qualifies. A campground operated for profit or maintained by a for-profit business does not qualify. However, a campground that otherwise qualifies may claim water for an office used for the campground.

Again, there are five prerequisites for home use to qualify for the special procedure.

1. The total amount of water claimed to be diverted pursuant to the water right cannot exceed 13,000 gallons per day.
2. The total amount of land claimed to be irrigated cannot exceed 4 acres, and must be in connection with the house. The 4-acre limitation is a per claim limitation, not a per residence limitation.
3. The use must be for a home, where people live, or a use in connection with a home. A suburban residence used solely for a day-care center is not a home, even though the building may look just like the homes around it.

4. The residence or residential facility must be in single ownership, but it may be multiple family. For example, domestic use may include two houses owned by the same person or group of people, if the use meets the other four requirements. (See Item 4 under campground use for a discussion of "owned by the same person or group of people".)

5. The use cannot be for a commercial or business establishment. This is the element of the definition that usually causes the most confusion. Questions are asked by many claimants include whether residential rental property is a commercial use, whether property used for farm related activities is a commercial use, whether water for a business operated out of the owner's home is a commercial use, etc. The focus is whether the use is primarily residential. Some examples are provided below. The other four requirements for a domestic use.

a. Single family houses: A house used as a home by a single family is a domestic use, whether or not the house is a rental. A house used solely for a business (such as some day-care

b. Multiple family buildings (duplexes, multiplexes, apartment buildings): A multiple family residence can be a domestic use if it meets the other four requirements, even if some or all of the units are rentals.

c. Non-profit boarding houses are domestic uses (because they are primarily residential), but boarding houses operated for profit are commercial uses (because they are primarily commercial), regardless of whether the owner resides there or not.

d. Mobile home parks and motels are commercial uses, regardless of whether the owner lives there or not.

c. "Farmstead" uses are domestic uses. For example, if the claimant uses water for a home, plus an outbuilding for tractor maintenance, plus another building for storing crops, etc.- the use is domestic so long as it meets the other four requirements.

"I DON'T HAVE TO FILE A NOTICE OF CLAIM, BUT I MAY. SO SHOULD I?"
Some Considerations

1. The claimant of a small D&S water right must pay a \$25.00 fee to file a notice of claim to a water right in the SRRA at this time. If the owner of a small D&S water right files a motion to have the water right adjudicated later, the owner will be required to pay the cost of serving the motion and IDWR's will be required to investigate and preparing a report of the water right claimed. It will almost certainly cost more to do it later than to do it now.

2. If the small d4s water user a) is having problems getting water pursuant to his water right, b) does expect to have such problems in the foreseeable future, or c) does expect to seek approval of a change of the water right in the foreseeable future, then adjudication of the water right at this time will be of less immediate benefit to the water user. If small d4s water user a) is not having problems getting water pursuant to his water right, b) does not expect to have such problems in the foreseeable future, and c) does not expect to seek approval of a change of the water right in the foreseeable future, then adjudication of the water right at this time will be of less immediate benefit to the water user.

3. If the small D&S water user has not filed any notices of claims in the SRA, then the water user will not be on the list of claimants who will receive the notice of filing the Director's Report, which will include notice of the opportunity for and the deadline for filing objections to the recommendations to the district court in the Director's report. To make sure that the

-5-

small D&S water user does receive the notice of filing the Director's Report, the water user can either file the notice of claim (\$25.00) or get a subscription to the docket sheet (there is an annual subscription fee for the docket sheet, which is \$7.50 for calendar year 1989, and may go up slightly for subsequent years.)

4. If it is not clear whether the use is within the definition of small DAs use, then the water user may benefit from filing of the notice of claim at this time. If the water user does not file at this time, and it is later determined that use exceeds the definition of small DA3 water rights, then the water user will be limited to a claim that is within the definition. The water user will still be able to claim that portion of the use, if any, that is within the definition of small DA3 uses.

THE BEST (AND CHEAPEST) WAY TO ASSURE THE SECURITY OF YOUR
SMALL DAM WATER RIGHT IS TO FILE A NOTICE OF CLAIM AT THIS TIME.

MICROFILMED
OCT 27 1994

OCT 27 1994

A notice of claim may but is not required to be filed for small 64S water rights in the SRA at this time. The fee for filing a notice of claim to a small 64S water right at this time is \$25.00. If a notice of claim is filed, the claim will be assigned to a District Engineer for investigation of water rights, included in the Director's Report which will be submitted to the Board of Water Rights to be decreed, and included in the district court's decree of water rights, in accordance with the adjudication procedures set forth by statute in Title 42, chapter 14, of the 1989 Code.

A small D&S water right will not be forfeited if a notice of claim for the water right is filed in the SRAA at this time. The owner of a small D&S water right must file a motion with the court to have the water right adjudicated when the need arises. ("Adjudicated" means determined by the district court and included in the district court's decree of water rights.) The procedure for adjudication of a small D&S water right at a later date is described in an order by the district court and is substantially similar to the supplemental adjudication procedure set forth in Idaho Code §42-1405. If a motion to have a small D&S water right adjudicated is filed at a later date, the claimant will be required to bear the cost of serving notice of the motion (which includes publication of notice of the motion three times in a local newspaper), and the claimant will be required to pay IDWR's cost of investigating and preparing a report of the water right claimed. These costs are likely to be more than \$25.00.

Small D&S water rights will not be subject to distribution by a watermaster in a water district unless all of the small D&S water rights have been adjudicated, or unless the director of IDWR determines that distribution of small D&S water rights by the watermaster is necessary. (Not subject to distribution by a

-1-

watermaster" means that the watermaster will not shut off small D&S water rights to provide water for senior water rights, and will not shut off other water rights to provide water for a senior small D&S water right.) If the director determines that distribution of small D&S water rights in a water district is necessary, then the owner of a small D&S water right that has not been adjudicated will be required to have the water right adjudicated in order to have it distributed by the watermaster. Also, the owner of a small D&S water right that has not been adjudicated will be required to agree to have it adjudicated. Thereafter, the owner may seek approval of a change of the water right (such as a change in diversion, change in place of use, change in nature of use, etc.).

There are two limitations that will apply when the owner of a small D45 water right files a motion with the district court in the SRMA to have the water right adjudicated at a later date. First, the owner will not be allowed to claim a water right that is within the definition of a small D45 use by the adjudication statute. (The definition of small D45 use is contained in the second, third and fourth sections of the statute.) Second, the extent of a small D45 water right is limited by actual past use. Under the third presumption that a small D45 use is entitled to the full 13,000 gallons per day that is permitted to be claimed as a small D45 water right.

All potential claimants of water rights in the SNWA will continue to be joined in the adjudication ("joined" means served with the Commencement Notice) and will be bound by any decrees entered in the adjudication. This includes owners of small D&S water rights, whether or not a notice of claim is filed for the small D&S water right at this time.

The special procedure is available for water rights used solely for small domestic and stockwater uses, as those terms are defined by statute. Idaho Code 42-1401(a) provides that

Domestic use includes the use of water for homes, organizations, schools, businesses, campgrounds, livestock, and any other purpose in land, if the total use is not in excess of an amount of up to 4 acre ft. per day. This section further provides that domestic use does not include water for multiple ownership subdivisions, mobile home parks, adjudications Rules and Regulations. IDNR provides that domestic use includes single-ownership, multiple-ownership, and stockwater use, so long as the total amount of water diverted does not exceed 10,000 gallons per day. Idaho Code §24-14051(2) defines stockwater as the use of water solely for livestock or wildlife where the total use does not exceed 1000 gallons per day. Domestic use can include stockwater use (so long as the total use does not exceed 13,000 gallons per day). Of the
