WATER RESOURCES
WESTERN REGION

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

Water Right No(s).	Adjudication Claim No(s).	Split	Water Right No(s).	Adjudication Claim No(s).	Split
63-32295					
63-32296					

2. The following **REQUIRED** information must be submitted with this form:

A. The appropriate **FILING FEE**. See instructions for fee amounts.

B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.

C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

3. Name and Address of Former Owner/Claimant(s)

PATRICIA MALONE HOWARD MALONE
UNKNOWN DECEASED

4. New Owner/Claimant(s)

KEVIN F LANA OLINGER
Name Connector (Check one): ☐ and, ☐ or, ☐ and/or

New Mailing Address

DBA L+K FARMS LIMOUSIN
P.O. BOX #176

City, State and ZIP Code

PARMA, IDAHO 83660

New Telephone Number

208 722-7812 Cell (208) 740-9444

5. Date you acquired the property

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

DESCRIPTION OF YOUR PORTION OF WATER RIGHT (If the right(s) will not be split, skip this area and proceed to item 7)		
Water Right and/or Adjudication Claim Number _____

INSTRUMENT NO. 253050

253050**EXHIBIT "A"**

Land in Twp. 6 N. R. 5 W., B.M., Payette County, Idaho:

In Sec. 16: SW1;

EXCEPTING THEREFROM the following described parcel of land:

Commencing at the Southwest corner of said SW1SW1;
thence N. 89°56'00" E. along the South side line of said SW1SW1, 908.03 feet;

thence N. 24°00'40" W. 27.35 feet to the TRUE POINT OF BEGINNING;

thence continue N. 24°00'40" W. 247.74 feet;

thence N. 89°56'00" E. 292.13 feet;

thence S. 00°04'00" E. 226.42 feet;

thence S. 89°56'00" W. 191.58 feet to the Point of Beginning.

FURTHER EXCEPTING THEREFROM the following described parcel of land:

Commencing at the Southwest corner of said Sec. 16;

thence N. 89°56'00" E. 414.20 feet along the South side line of said Sec. 16 to the Point of Beginning, being a point on the centerline of an irrigation canal, and the beginning point of a non tangent curve to the right having a radius of 530.00 feet, the tangent of which bears N. 7°37'50" E.;

thence Northerly along the centerline of said canal, on a curve to the right, concave Easterly, through a central angle of 13°49'35", an arc distance of 127.90 feet;

thence continuing along said canal the following five courses:

N. 21°27'25" E. 25.25 feet to the beginning of a tangent curve to the right having a radius of 115.00 feet;

thence Northeasterly, concave Southeasterly, through a central angle of 68°11'20", an arc distance of 136.06 feet;

thence N. 89°38'45" E. 106.00 feet to the beginning of a tangent curve to the left, having a radius of 58.00 feet;

thence Northeasterly, concave Northwesterly, through a central angle of 71°19'45", an arc distance of 72.21 feet;

thence N. 18°19'00" E., 19.87 feet;

thence departing the centerline of said canal, N. 89°56'00" E. 53.58 feet;

thence S. 24°00'40" E. 30.00 feet to a 5/8" rebar with a PELS 2007 cap, representing the Northwest corner of a parcel shown on a Survey, recorded in Book 3 of Surveys, at Page 39, in the Official Records of Payette County;

thence along the Westerly line of said Parcel S. 24°00'40" E. 275.21 feet to a point on the Southerly line of said Sec. 16;

thence along said South line, S. 89°56'00" W. 493.15 feet, more or less, to the Point of Beginning.

AND FURTHER EXCEPTING THEREFROM that portion conveyed to the State of Idaho, for highway purposes, along the West side line of the subject lands, as conveyed by grant, recorded June 12, 1991, Fee #234812, Deed Records of Payette County, Idaho.

TOGETHER WITH all water and water rights, ditches and ditch rights, tenements and hereditaments, appurtenances and fixtures, and permits and licenses belonging thereto or in anywise appertaining, including eight and one half (8 1/2) shares in the Farmers Co-Operative Ditch.

Change of Address

SEE OVER

Dear Claimant:

IDWR has been notified the address presently in our records is incorrect. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right(s) can be sent only to the address on your water right(s) or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary and list any other water rights you may have before returning this letter by March 12, 1999. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water right(s) referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the water right record.

Sincerely,

Sally

Notice of Claim to a Water Right No. 63-32295, 63-32296

Dear Claimant(s):

Enclosed is a copy of the above referenced claim(s), which reflect the change in ownership of the land and appurtenant water rights, covered under the original filing.

Please note that the enclosed Notice of Claim to a Water Right is not a final determination of your water right. This claim was filed during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience and cooperation, as we have had several water right changes to process. If you have any questions concerning the enclosed information, please feel free to contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Liberty Gagnon".

MEMORANDUM

TO: ADJUDICATION FILES 63-32295 and 63-32296

FROM: DANIEL A. NELSON

DATE: 9/20/06

SUBJECT: CLAIM REVIEW

The two above claims are based on statutory claim 63-4018. This claim was filed to capture unnamed drain water to irrigated approximately 69 acres within a 160 acre tract of land. The adjudication claim was initially filed the same as the statutory claim, but both claims claimed two separate priority dates. One date was for the gravity flow system and the other was for the pressurized system. There was adequate evidence in the files to recommend both dates, so the file was split by our office into 63-32295 for the gravity system and 63-32296 for the pressurized system. The priority dates claimed for each of these rights will be recommended as claimed due to the affidavits supplied.

The two systems even though they come from the same source are different. They both irrigate mainly pasture or grass/hay fields, but the only real connecting feature is the pond. The water being diverted flows into and out of the pond and then back into a lateral. The gravity system uses the water that overflows the pond into the lateral, and the pressurized systems pumps directly out of the pond. Burke Scholer performed an exam on this system, but he did not get a measurement of the water flowing into the pond and/or into the lateral. I went back to the site and performed a Mannings Equation to determine the maximum capacity of the water flowing into and out of the pond. I will discuss the flow rates for each right below:

63-32295:

This is the gravity flow right for this farm. It is a little shaky on whether or not this is actual drain water, wastewater, or canal water from the D-line canal delivering the Black Canyon Irrigation District shares to the property. This farm hasn't been used in several years, so the ditches and fields were in very poor condition. I would call this an unnamed drain at this point, but I could be convinced in many different directions fairly easily.

The Water in the drain flows under the road into a small pond. The pond has a culvert in the dam that allows overflow water to flow into the lateral. The water in the lateral is then diverted at the lateral headgate. The lateral belongs to Co-Operative Canal Company, but from what I understand, it also delivers Black Canyon Irrigation District water as well.

Burke Scholer did the field exam on this claim, and found the acres being irrigated. However, he didn't measure the amount of water being used for the gravity system. The water in this drain flows into and out of the pond at approximately the same rate. The flows vary greatly depending on how much wastewater is being generated upstream. Therefore, I performed a Mannings measurement on the culvert coming under the road with the assistance of Kimberly Brown. We determined that the drain had the capability to carry 29.79 cfs at full flows. This is highly unlikely, but they did construct the culvert to carry this amount of water. Therefore, I have concluded that there is sufficient drain water at times to supply the full inch per acres for both the pressurized system and the gravity system at the same time.

Mr. Scholer found that approximately 30.7 acres are capable of being irrigated out of this system. This acre amount is based on current photos and not on the 1987 aerial photography. Using the 1987 aerial photos I found that 24.8 acres were irrigated in the 1987. The 24.8 acres will be recommended. The diversion rate is limited to 0.02 cfs per acre or 0.50 cfs. The owner claimed more water on the original claim for the 1951 priority date, but I believe more of that was supposed to go to the pressurized system with the 1954 priority date.

The affidavits should be sufficient to allow the 1951 priority date. This right should include the conditions that limit the use of water at the field headgates when all rights are combined to 0.02 cfs per acre, and also include acknowledgement that Black Canyon and Farmers Co-Operative Canal Company are also used on this property.

63-32296:

This is the pressurized flow right for this farm. It is a little shaky on whether or not this actual drain water, wastewater, or canal water from the D-line canal delivering the Black Canyon Irrigation District shares to the property. This farm hasn't been used in several years, so the ditches and fields were in very poor condition. I would call this an unnamed drain at this point, but I could be convinced in many different directions fairly easily.

The Water in the drain flows under the road into a small pond. The pond has a culvert in the dam that allows overflow water to flow into the lateral. There is an old pumping station set on the bank of the pond, but this system hasn't been used in many years. The pump is at the shop of the current property owner. Burke Scholer did the field exam on this claim, and performed the theoretical calculation on the pump and found the acres being irrigated. I performed a Mannings measurement on the culvert coming under the road with the assistance of Kimberly Brown. We determined that the drain had the capability to carry 29.79 cfs at full flows. This is highly unlikely, but they did construct the culvert to carry this amount of water. Therefore, I have concluded that there is sufficient drain water at times to supply the full inch per acres for both the pressurized system and the gravity system at the same time.

Mr. Scholer found that the pump has the capacity to divert 1.40 cfs and approximately 65.1 acres that are capable of being irrigated out of this system. This acre amount is based on current photos and not on the 1987 aerial photography. Using the 1987 aerial photos I found that 43.8 acres were irrigated in the 1987. The 43.8 acres will be recommended. The diversion rate is generally limited to 0.02 cfs or an inch per acre for the 43.8 acres or 0.88 cfs, however, only 0.60 cfs was claimed under the 1954 priority date. Taking into account that the department did the split of these rights, I determined that as long as both 63-32295 and 63-32296 does not exceed the 1.40 cfs claimed under the original adjudication claim, 63-4018, we should be able to recommend the full 0.88 cfs for this claim. 63-32295 was recommended for 0.50 cfs so this claim will be recommended for 0.88 cfs for a total between the two claims of 1.38 cfs below the amount originally claimed under 63-4018.

The affidavits should be sufficient to allow the 1954 priority date. This right should include the conditions that limit the use of water at the field headgates when all rights are combined to 0.02 cfs per acre, and also include acknowledgement that Black Canyon and Farmers Co-Operative Canal Company are also used on this property. I am not sure how Black Canyon and Farmers Co-Operative water are diverted to these upper acres, but this condition should be included in case this unnamed drain is actually a poorly maintained lateral.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Recommendation Report 63-32295 V1

Comments:

1. dnelson 9/20/2006 Claim Review

Comment: The two above claims are based on statutory claim 63-4018. This claim was filed to capture unnamed drain water to irrigated approximately 69 acres within a 160 acre tract of land. The adjudication claim was initially filed the same as the statutory claim, but both claims claimed two separate priority dates. One date was for the gravity flow system and the other was for the pressurized system. There was adequate evidence in the files to recommend both dates, so the file was split by our office into 63-32295 for the gravity system and 63-32296 for the pressurized system. The priority dates claimed for each of these rights will be recommended as claimed due to the affidavits supplied.

The two systems even though they come from the same source are different. They both irrigate mainly pasture or grass/hay fields, but the only real connecting feature is the pond. The water being diverted flows into and out of the pond and then back into a lateral. The gravity system uses the water that overflows the pond into the lateral, and the pressurized systems pumps directly out of the pond. Burke Scholer performed an exam on this system, but he did not get a measurement of the water flowing into the pond and/or into the lateral. I went back to the site and performed a Mannings Equation to determine the maximum capacity of the water flowing into and out of the pond. I will discuss the flow rates for each right below:

63-32295:

This is the gravity flow right for this farm. It is a little shaky on whether or not this is actual drain water, wastewater, or canal water from the D-line canal delivering the Black Canyon Irrigation District shares to the property. This farm has not been used in several years, so the ditches and fields were in very poor condition. I would call this an unnamed drain at this point, but I could be convinced in many different directions fairly easily.

The Water in the drain flows under the road into a small pond. The pond has a culvert in the dam that allows overflow water to flow into the lateral. The water in the lateral is then diverted at the lateral headgate. The lateral belongs to Co-Operative Canal Company, but from what I understand, it also delivers Black Canyon Irrigation District water as well.

Page 2

63-32295 & 63-32296

Burke Scholer did the field exam on this claim, and found the acres being irrigated. However, he did not measure the amount of water being used for the gravity system. The water in this drain flows into and out of the pond at approximately the same rate. The flows vary greatly depending on how much wastewater is being generated upstream. Therefore, I performed a Mannings measurement on the culvert coming under the road with the assistance of Kimberly Brown. We determined that the drain had the capability to carry 29.79 cfs at full flows. This is highly unlikely, but they did construct the culvert to carry this amount of water. Therefore, I have concluded that there is sufficient drain water at times to supply the full inch per acres for both the pressurized system and the gravity system at the same time.

Mr. Scholer found that approximately 30.7 acres are capable of being irrigated out of this system. This acre amount is based on current photos and not on the 1987 aerial photography. Using the 1987 aerial photos I found that 24.8 acres were irrigated in the 1987. The 24.8 acres will be recommended. The diversion rate is limited to 0.02 cfs per acre or 0.50 cfs. The owner claimed more water on the original claim for the 1951 priority date, but I believe more of that was supposed to go to the pressurized system with the 1954 priority date.

The affidavits should be sufficient to allow the 1951 priority date. This right should include the conditions that limit the use of water at the field headgates when all rights are combined to 0.02 cfs per acre, and also include acknowledgement that Black Canyon and Farmers Co-Operative Canal Company are also used on this property.

63-32296:

This is the pressurized flow right for this farm. It is a little shaky on whether or not this actual drain water, wastewater, or canal water from the D-line canal delivering the Black Canyon Irrigation District shares to the property. This farm has not been used in several years, so the ditches and fields were in very poor condition. I would call this an unnamed drain at this point, but I could be convinced in many different directions fairly easily.

The Water in the drain flows under the road into a small pond. The pond has a culvert in the dam that allows overflow water to flow into the lateral. There is an old pumping station set on the bank of the pond, but this system has not been used in many years. The pump is at the shop of the current property owner. Burke Scholer did the field exam on this claim, and performed the theoretical calculation on the pump and found the acres being irrigated. I performed a Mannings measurement on the culvert coming under the road with the assistance of Kimberly Brown. We determined that the drain had the capability to carry 29.79 cfs at full flows. This is highly unlikely, but they did construct the culvert to carry this amount of water. Therefore, I have concluded that there is sufficient drain water at times to supply the full inch

FIELD EXAM 63-32295
DRAIN FLOW CALCULATIONS
BY DAN NELSON AND KIMBERLY BROWN

Water for this claim travels through a gully that catches wastewater and drain water from several farms down to the owner's pond. The water fills the small pond and the overflows into the lateral. From the lateral it is gravity fed into ditches that irrigate the lower fields. The only way to determine the amount of water that flows into the lateral is to measure the flow of water into the pond.

In order to measure the maximum capacity of the gravity system we needed to take into account the maximum flow of water flowing into the pond. In order to do this I used the Mannings Equation through the culvert that crosses under the road south of the pond. It is obvious that the culvert would flow at a full pipe during the high water events. The following are my calculations:

Mannings equation $\rightarrow Q = [(1.49/n) (R)^{2/3} (S)^{1/2}] \times A$

$n = 0.025$ Steel metal pipe in Open Channel Hydraulics, Ven Te Chow
1959, McGraw-Hill

$R = 1.01$ (I measured the inside diameter of the pipe at 2.02 ft. $D/2 = R$ or
 $2.02 / 2 = 1.01$) {This is a 2 foot pipe}

$S = 0.024$ (I measured the length of the pipe at 59.51 feet long with a 1.4 feet
difference in elevation using an automatic level. I measured 10.68
feet downstream and 9.28 feet upstream. Slope is determined by
Rise/Run, therefore, $0.1.4\text{ft} / 59.5\text{ft} = 0.024$ slope.)

$A = 3.205 \text{ ft}^2$ (Area = $\pi R^2 \rightarrow A = \pi (1.01)^2 = 3.205 \text{ ft}^2$.

Mannings Calculation $\rightarrow$

$Q = [(1.49/0.025) (0.1.01)^{2/3} (0.024)^{1/2}] \times 3.205$

$Q = 29.79 \text{ cfs}$

This seems reasonable for this ditch during high flows.

a. Earth, straight and uniform			
1. Clean, recently completed	0.016	0.018	0.020
2. Clean, after weathering	0.018	0.022	0.025
3. Gravel, uniform section, clean	0.022	0.025	0.030
4. With short grass, few weeds	0.022	0.027	0.033
b. Earth, winding and sluggish			
1. No vegetation	0.023	0.025	0.030
2. Grass, some weeds	0.025	0.030	0.033
3. Dense weeds or aquatic plants in deep channels	0.030	0.035	0.040
4. Earth bottom and rubble sides	0.025	0.030	0.035
5. Stony bottom and weedy banks	0.025	0.035	0.040
6. Cobble bottom and clean sides	0.030	0.040	0.050
c. Dragline-excavated or dredged			
1. No vegetation	0.025	0.028	0.033
2. Light brush on banks	0.035	0.050	0.060
d. Rock cuts			
1. Smooth and uniform	0.025	0.035	0.040
2. Jagged and irregular	0.035	0.040	0.050
e. Channels not maintained, weeds and brush uncut			
1. Dense weeds, high as flow depth	0.050	0.080	0.120
2. Clean bottom, brush on sides	0.040	0.050	0.080
3. Same, highest stage of flow	0.045	0.070	0.110
4. Dense brush, high stage	0.080	0.100	0.140
D. NATURAL STREAMS			
D-1. Minor streams (top width at flood stage <100 ft)			
a. Streams on plain			
1. Clean, straight, full stage, no rifts or deep pools	0.025	0.030	0.033
2. Same as above, but more stones and weeds	0.030	0.035	0.040
3. Clean, winding, some pools and shoals	0.033	0.040	0.045
4. Same as above, but some weeds and stones	0.035	0.045	0.050
5. Same as above, lower stages, more ineffective slopes and sections	0.040	0.048	0.055
6. Same as 4, but more stones	0.045	0.050	0.060
7. Sluggish reaches, weedy, deep pools	0.050	0.070	0.080
8. Very weedy reaches, deep pools, or floodways with heavy stand of timber and underbrush	0.075	0.100	0.150
b. Mountain streams, no vegetation in channel, banks usually steep, trees and brush along banks submerged at high stages			
1. Bottom: gravels, cobbles, and few boulders	0.030	0.040	0.050
2. Bottom: cobbles with large boulders	0.040	0.050	0.070
D-2. Flood plains			
a. Pasture, no brush			
1. Short grass	0.025	0.030	0.035
2. High grass	0.030	0.035	0.050
b. Cultivated areas			
1. No crop	0.020	0.030	0.040
2. Mature row crops	0.025	0.035	0.045
3. Mature field crops	0.030	0.040	0.050
c. Brush			
1. Scattered brush, heavy weeds	0.035	0.050	0.070
2. Light brush and trees, in winter	0.035	0.050	0.060
3. Light brush and trees, in summer	0.040	0.060	0.080
4. Medium to dense brush, in winter	0.045	0.070	0.110
5. Medium to dense brush, in summer	0.070	0.100	0.160
d. Trees			
1. Dense willows, summer, straight	0.110	0.150	0.200
2. Cleared land with tree stumps, no sprouts	0.030	0.040	0.050
3. Same as above, but with heavy growth of sprouts	0.050	0.060	0.080
4. Heavy stand of timber, a few down trees, little undergrowth, flood stage below branches	0.080	0.100	0.120
5. Same as above, but with flood stage reaching branches	0.100	0.120	0.160
D-3. Major streams (top width at flood stage >100 ft). The n value is less than that for minor streams of similar description, because banks offer less effective resistance.			
a. Regular section with no boulders or brush	0.025		0.060
b. Irregular and rough section	0.035		0.100

	NO NAME-PLATE	25	N/A	BERKELEY B3TDM	SN-7271280 3" COUED TO 6"

Pump &
Shop

→ ACCORDING TO KEVIN

- 2.) Lift (distance from pump to water) 6' TO PUMP DISCHARGE PIPE
NO PUMP INSTALLED
- 3.) How was lift determined (well log, measurement, owner)? MEASUREMENT TO POND W.S.
- 4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) NO GAGE
- 5.) Was a measurement made? NO If no can a measurement be made at a latter time? AFTER PUMP IS REINSTALLED & OPERATING
- 6.) What type of measurement device was used? THEORETICAL
- 7.) Is there a pump curve available for pump? YES (PUMP CO.)
- 8.) Please fill out the following:
Number of sprinklers ?
Sprinkler nozzle size 5/32
Number of Pivots (include gpm rating for each pivot) N/A
- 9.) Please outline all acres irrigated on attached aerial photo. ✓ DONE

10.) Please clearly mark all points of diversion on map and GPS.

☒ DONE

GPS - 2263159
1125 1409838

11.) Please clearly mark all mainlines, ditches, and other conveyances.

☒ DONE

12.) Pictures taken of place of use and point of diversion.

☒ DONE

13.) Please show where and how water from other sources are diverted into the irrigation system.

OTHER INFORMATION NEEDED:

* Please indicate which 25 acres weapon are irrigated with gravity flow!

THERE ARE APPROXIMATELY 65.1 AC. OF IRRIGATABLE LAND AS SHOWN ON THE AERIAL PHOTO. THIS LAND IS ALL UPHILL FROM THE CANAL AND IS SPRINKLER IRRIGATED. W/ DRAINAGE WATER (CANAL IS FARMERS COOP) (LAND BELOW THE CANAL CAN BE IRRIGATED WITH DRAIN WATER)

FIELD EXAMINERS NOTES (descriptions, other uses, questions, ect.) USING VALVE & PIPE TO CROSS CANAL)

THIS LAND HAS NOT BEEN IRRIGATED FOR FEW YEARS.

KEVIN DID NOT DISCLOSE THIS WHEN I MET WITH HIM AT HIS WORKPLACE BEFORE GOING TO THE FARM. HE STATED THAT HE WAS REORGANIZING THE IRRIGATION ^{SYSTEM} TO BE WHAT IS SHOWN ON THE PHOTO. THE PUMP & MOTOR IS AT HIS SHOP - THE POWER SUPPLY HAS BEEN REMOVED. THE UNGROUND MAINLINES ARE IN PLACE WITH ORIGINAL LAYOUT. HE HAS SEVERAL LARGE BUNDLES OF PVC PIPE STACKED AT HIS YARD & SOME IN THE FIELD. THIS IS THE PIPE FOR NEW LAYOUT.

MEMORANDUM

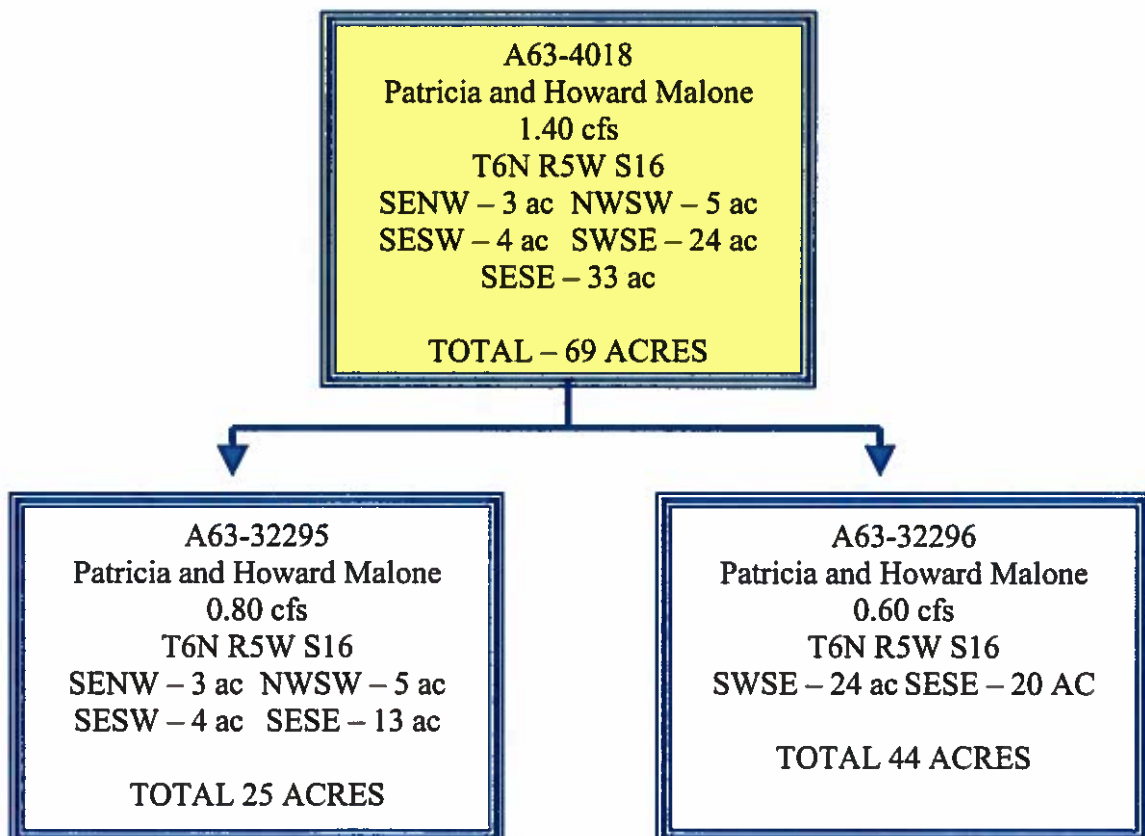

TO: ADJUDICATION FILE A63-4018

FROM: DANIEL A. NELSON

DATE: 5/4/06

SUBJECT: CLAIMING 2 SEPARATE PRIORITY DATES

Statutory and adjudication claims for 63-4018 were claimed with two separate priority dates. The only way that we can recognize the separate priority dates is to split the adjudication claim to represent the two claims. This is the same owner, source, and system, but we are unable to enter the two dates properly in our system. Therefore, adjudication claim should be split as follows:

Identification No. 63-4018 P
Claim No. 42544
Map No. _____

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
CLAIM TO A WATER RIGHT
Established by Diversion and Application to Beneficial Use

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.

(Please refer to the instructions on the back of this form)

1. Name of claimant ERNEST R. CARTWRIGHT or AUDREY C CARTWRIGHT
post office address BOX 523 QUEENS PERRY, IDAHO 83623
2. The point of diversion is in SE $\frac{1}{4}$ of SW $\frac{1}{4}$ Section 16 Township 6-NORTH
Range 5-N-E-S-T B.M. located on DRAIN IN UNNAMED DRAW
(name of source)
- tributary to WAKE RIVER in PAYETTE County.

3. Dates of priority claimed: list the priority for each separate quantity that you claim. Priority dates should be based upon the earliest diversion of the water which has resulted in continued beneficial use since that time. If there has been an interval of five years or greater when the water was not beneficially used for the same purpose originally appropriated, the priority that you claim should date from the time that the water was again beneficially applied following the period of non-use.

a. Date of priority claimed:

APRIL 1951 amount: 80 ~~acres~~ acre feet
APRIL 1954 amount: 60 ~~acres~~ acre feet
amount: _____ c.f.s. or _____ acre feet
Total claimed 1.40 ~~acres~~ acre feet.

- b. Explain the purpose for which the water has been used and the time during the year when you have used the right claimed:

use IRRIGATION period of use from APRIL 15 to OCTOBER 1 (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive)
use _____ period of use from _____ to _____ (both dates inclusive).

4. Description of diverting works:

a. Surface water diversion ~~dam~~ ~~weir~~ ~~headgate~~: material is composed of EARTH FILL HEADGATE IS STEEL PUMP IS PRESSURE TYPE FOR SPRINKLER; length is APPROX 180 feet; height is APPROX 10 feet; width at bottom is APPROX 20 feet; width at top is APPROX 210 feet; explain any increase in diversion capacity since structure was first built, giving dates and estimated capacities if known INCREASED IN 1954
TO PRESENT CAPACITY ACCOUNT OF ADDING PUMP AND SPRINKLER SYSTEM

b. Underground water diverting works: is well flowing or pumped NA; depth of well is _____ feet; diameter of well is _____ inches; type of pump is _____
capacity of pump is _____ g.p.m.; name and address of well driller is _____

63 4018

Please explain any changes or increase in size of conveying system since water was first appropriated, giving date and dimensions if possible IS USED ON GRAVITY FLOW TO FIELDS BELOW THE
FARMER'S COOP DITCH CO EXTENSION CANAL APROXIMATELY 25 ACRES
PUMP TO IRRIGATE APROXIMATELY 44 ACRES.

If feeder canal is used give maximum carrying capacity_____c.f.s.; if reservoir is off stream, describe location of reservoir by 40-acre subdivisions_____

[illegible]

Explain any significant increase in area irrigated since first use, give dates and acreages if known 1954
30 ACRES PUT UNDER PUMP IRRIGATION OPEN DISCHARGE CHANGED TO SPRINKLER SYSTEM
1956 SO COULD ADD 14 MORE ACRES GROUND

b. Do you get water through a ditch owned by several users? NO If yes, give the name of the ditch
_____. The other users and their respective
interests in the ditch are (if known) _____

6. Where water is used for stock watering, give number of each kind of stock watered NA

7. Where water is used for domestic or municipal purposes give number of families served NA
name of town supplied NA

8. Where water is used for other purposes not above enumerated, give the nature of use, the extent of use,
and any details regarding the initiation of the right or subsequent later expansion. Be as specific as possible,
giving dates and quantities NA

9. Remarks: please explain any details of your claim which you feel need clarification or additional explanation
POND WAS BUILT ON SE-OF SE, SECTION 16 TWP 6 RANGE 5 BN BY PRIOR OWNER OF PROPERTY.
IT WAS USED TO IRRIGATE ALL THE GROUND BELOW SEBREE DITCH OR FARMER'S COOP EXTENSION
CANAL. IN 1954 I ENLARGED POND SO I COULD IRRIGATE 30 ACRES MORE WITH A PUMP THAT
COULD NOT BE IRRIGATED ANY OTHER WAY. THIS WATER CAN ALSO BE USED TO SUPPLEMENT
WATER FROM BLACK CANYON AND FARMER'S COOP DITCH EXTENSION WHEN WATER IS SHORT.
IN 1956 CHANGED OPEN DISCHARGE PUMP TO SPRINKLER SYSTEM SO COULD ADD 14 ACRES
MORE TO SYSTEM.

BE IT KNOWN that the undersigned hereby makes claim to a water right as described above together with
all attached information and certifies that all statements are true and accurate to the best of his knowledge.

IN THE MATTER OF:

AFFIDAVIT

E. R. Cartwright
State of Idaho
County of Payette

Gene Honey being first duly sworn,
deposes and says: This water was put to use by
Ed Fincher prior to 1950.
Wagon ditch runs when this water was put to use
it think this water was put into use approximately 1946.
In 1954 E R Cartwright from owner did considerable improvement
on the place, 1 of which was enlarging the dam for
a pond which was on the place to put more water under
pump system irrigate approximately 30 acres
more land.

Gene Honey
(signature)

Subscribed and sworn to before me this 24th day of May 1968.

Subscribed and sworn to before me this 23 day of May 19 68.

Marion E. Anderson
(Notary Public)

Residing at Ada, Idaho
My commission expires Sept 1969.

IN THE MATTER OF:

AFFIDAVIT

Ernest R. Cartwright

State of Idaho
County of Payette

Claude B. Solterbeck

being first duly sworn,

deposes and says: My first positive recollection of the storage of water in a pond for irrigation purposes on a farm owned by Ernest R. Cartwright was in 1956. The subject storage pond is located in the SE $\frac{1}{4}$ SW $\frac{1}{4}$, Section 16, Township 6 North, Range 5 West of B.M. Irrigation water was withdrawn through a pipe under a canal system for gravity irrigation and by pump for sprinkler irrigation. The pond furnished supplemental water for approximately 25 acres under a gravity system and for 21.9 acres under a sprinkler system. The source of water for the storage pond is from waste water and natural runoff from a draw located to the south and east of the point of diversion. The said draw is more accurately located as being in the W $\frac{1}{2}$ E $\frac{1}{2}$ NW $\frac{1}{4}$ Section 21, Section 22, and Section 23, all in Township 6 North and Range 5 West of B.M.

Claude B. Solterbeck
(signature)

Subscribed and sworn to before me this 24 day of May 19 68.

Charles J. Morton
(Notary Public)

Residing at Payette, Idaho.
My commission expires May 14, 1971.

IN THE MATTER OF:

AFFIDAVIT

E. R. Cartwright

State of Idaho
County of Payette

HAROLD BRANSON

being first duly sworn,

deposes and says: The Growers Supply Co. Inc.
in the Spring of 1956 did install a 6"
Steel main line for a total length of 600 ft.
for E.R. Cartwright of Rt # 2 Parma, Idaho.
Said Pipe Line was used to Transfer water
from a pond in the SE 1/4 of Section 16
Twp. 6 Range 5 WBM for the purpose of
attaching Portable Sprinkler Irrigation
pipe.

Harold Branson
(signature)

Subscribed and sworn to before me this 22nd day of May 19 68.

RE: EVIDENCE OF PRIORITY

Snake River Basin Adjudication Claim No(s): A63-32295 & A63-32296

Dear Claimants,

In the past, Howard and Patricia Malone submitted claim A63-4018, which was split into A63-32295 and A63-32296 to allow for the two separate priority dates. These claims were filed in the Snake River Basin Adjudication (SRBA) claims taking process. Enclosed is a computer generated printout of the claim(s) for your reference only, it is not necessary to return this printout. When these claims were filed, the original owner stated that the water rights were based on a "Statutory Claim" or "Beneficial Use" of the water. The previous owner and local tax records suggest that Mr. and Ms. Olinger and/or you may now own these water rights. If this is the case, then you should file a change of ownership form for your portion of these rights as soon as possible.

Water rights of this type are established by historical beneficial use of the water, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. These claims have not been confirmed by a previous filing with the Department of Water Resources, since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled, "What Kind of Evidence is Required" and "Some Examples of Documents Which May Be Evidence of the Priority Date."

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

Page 2
Atkinson

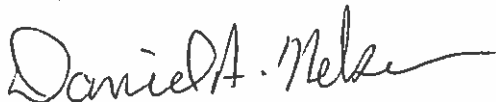

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under these rights if water availability problems arise in the future.

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, field exams are now being conducted by Department water resource agents to verify claims in this area. In the near future, you will be receiving a call from us in order to set-up an appointment for a field exam.

The required evidence supporting the priority date(s) requested and the aerial photo needs to be returned to me by May 31, 2006. Please let me know if you may not be able to submit proof of priority or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

If you have any questions or concerns, please contact me at the above address.

Respectfully,

Daniel A. Nelson
