constructed and as enlarged and the depth of each well.

Prior to 1963 the dairy used water from 3 artesian wells, 2 of which are still being used for domestic and stockwater purposes. The wells were cased but the flow was not regulated prior to 1995. A small pump picked up water for domestic use and dairy use, with stockwater provided to watering troughs at low pressure. Well 1 continues to water 200 head of cattle this way. The remainder from wells 1 and 2 flowed into a ditch and was used for irrigation in summer and drained into Indian Creek during the rest of the year. Well 3 was used exclusively for irrigation and continues to flow freely.

Commercial water used			3.35	afa/3.5=	0.96 equiv. acres

Because no data is available on actual flow used for stockwater and commercial in 1963, the following method was used to develop a reasonable number:

1. All stockwater and commercial use is considered consumptive, and because we know that allowable consumptive use for irrigation was 3.5 afa in 1963, divide the actual quantities used by 3.5 afa to calculate equivalent acres.
2. Maximum allowable flow for irrigation is .02 cfs/acre. Multiplying the equivalent acres by the .02 maximum flow/acre yields the following flows:

Flow for stock water	2.94	acres X's	0.02	0.059	
Flow for Commercial	0.96	acres X's	0.02	0.019	
Total				0.078	cfs

Observed remaining flow from 3 artesian wells:

well 1	Irrigation	75 GPM	0.167	cfs
Well 2	Domestic and dairy			
Well 3	Irrigation	10 Ac.x.02	0.2	

(Owner's estimate, can be checked against current flow from wells)

Flow diverted to irrigation system during season

0.367 cfs

Acres irrigated 18.33

Total flows to irrigation, stockwater, and commercial use from these 3 wells

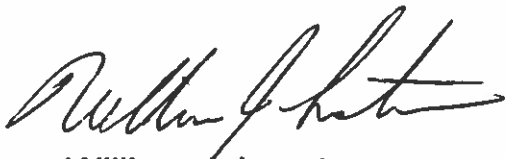

0.445 cfs

To Whom It May Concern:

I, William J. Lunstrum, residing at 1151 N. Happy Valley Road; Nampa, ID 83687, have been a neighbor of the Schuler family all of my life. I recall the Schulers using water from two Artesian wells to irrigate cropland while visiting their property prior to 1963.

MEMORANDUM

TO: Lori Graves & IDWR
FROM: Darwin Vander Stelt, preparer

DATE: 04/26/2000

RE: Notice of Claim To A Water Right, Schuler Lane Farms

The applicant wishes to claim stockwater, commercial, and irrigation rights for water used continuously since 1948.

DOCUMENTS AND APPLICATION PREPARATION

- A. Dairy Water Requirement Worksheet
- B. Affidavit from neighbor verifying irrigation use prior to 1963
- C. Ownership documentation - *see transfer*

CURRENT RECORDS & PROPOSED CHANGE

The applicant has dairied continuously on the current site since 1948. There are no recorded stockwater or commercial water rights.

The dairy has been using water continuously from 3 artesian wells, labeled 1, 2, and 3. The dairy originally used water from wells 1 and 2 for stockwater and commercial use, with the overflow running freely into Indian Creek in Winter, and used for irrigation in Summer. There was also a house on well 2. Well 3 was always used for irrigation.

As of March 25, 1963, applicant was milking 240 cows and 240 heifers. Attachment A calculates the approximate flows and volumes of water used for stockwater, commercial, and irrigation purposes at that time.

As of March 25, 1963, applicant was also irrigating approximately 10 acres with well 3.

An affidavit from a neighbor familiar with the farm operation is attached as verification of the use of artesian well water to irrigate prior to 1963.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use

Prior to diversion of water under Transfer No. 68492, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

The total instantaneous diversion of water from all points of diversion under Right 63-31100 shall not exceed 0.45 cfs, nor total combined annual volume of 82.3 af.

The place of commercial use authorized by Transfer No. 68492 includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by this water right.

The right holder shall accomplish the change authorized by Transfer No. 68492 within one (1) year of the date of the approval.

Use of water under Transfer No. 68492 shall comply with applicable water quality standards of the Department of Environmental Quality.

Stockwater use is for 480 dairy cattle.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

Failure of the right holder to comply with the conditions of Transfer No. 68492 is cause for the Director to rescind approval of the transfer.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

Conditions of Approval:

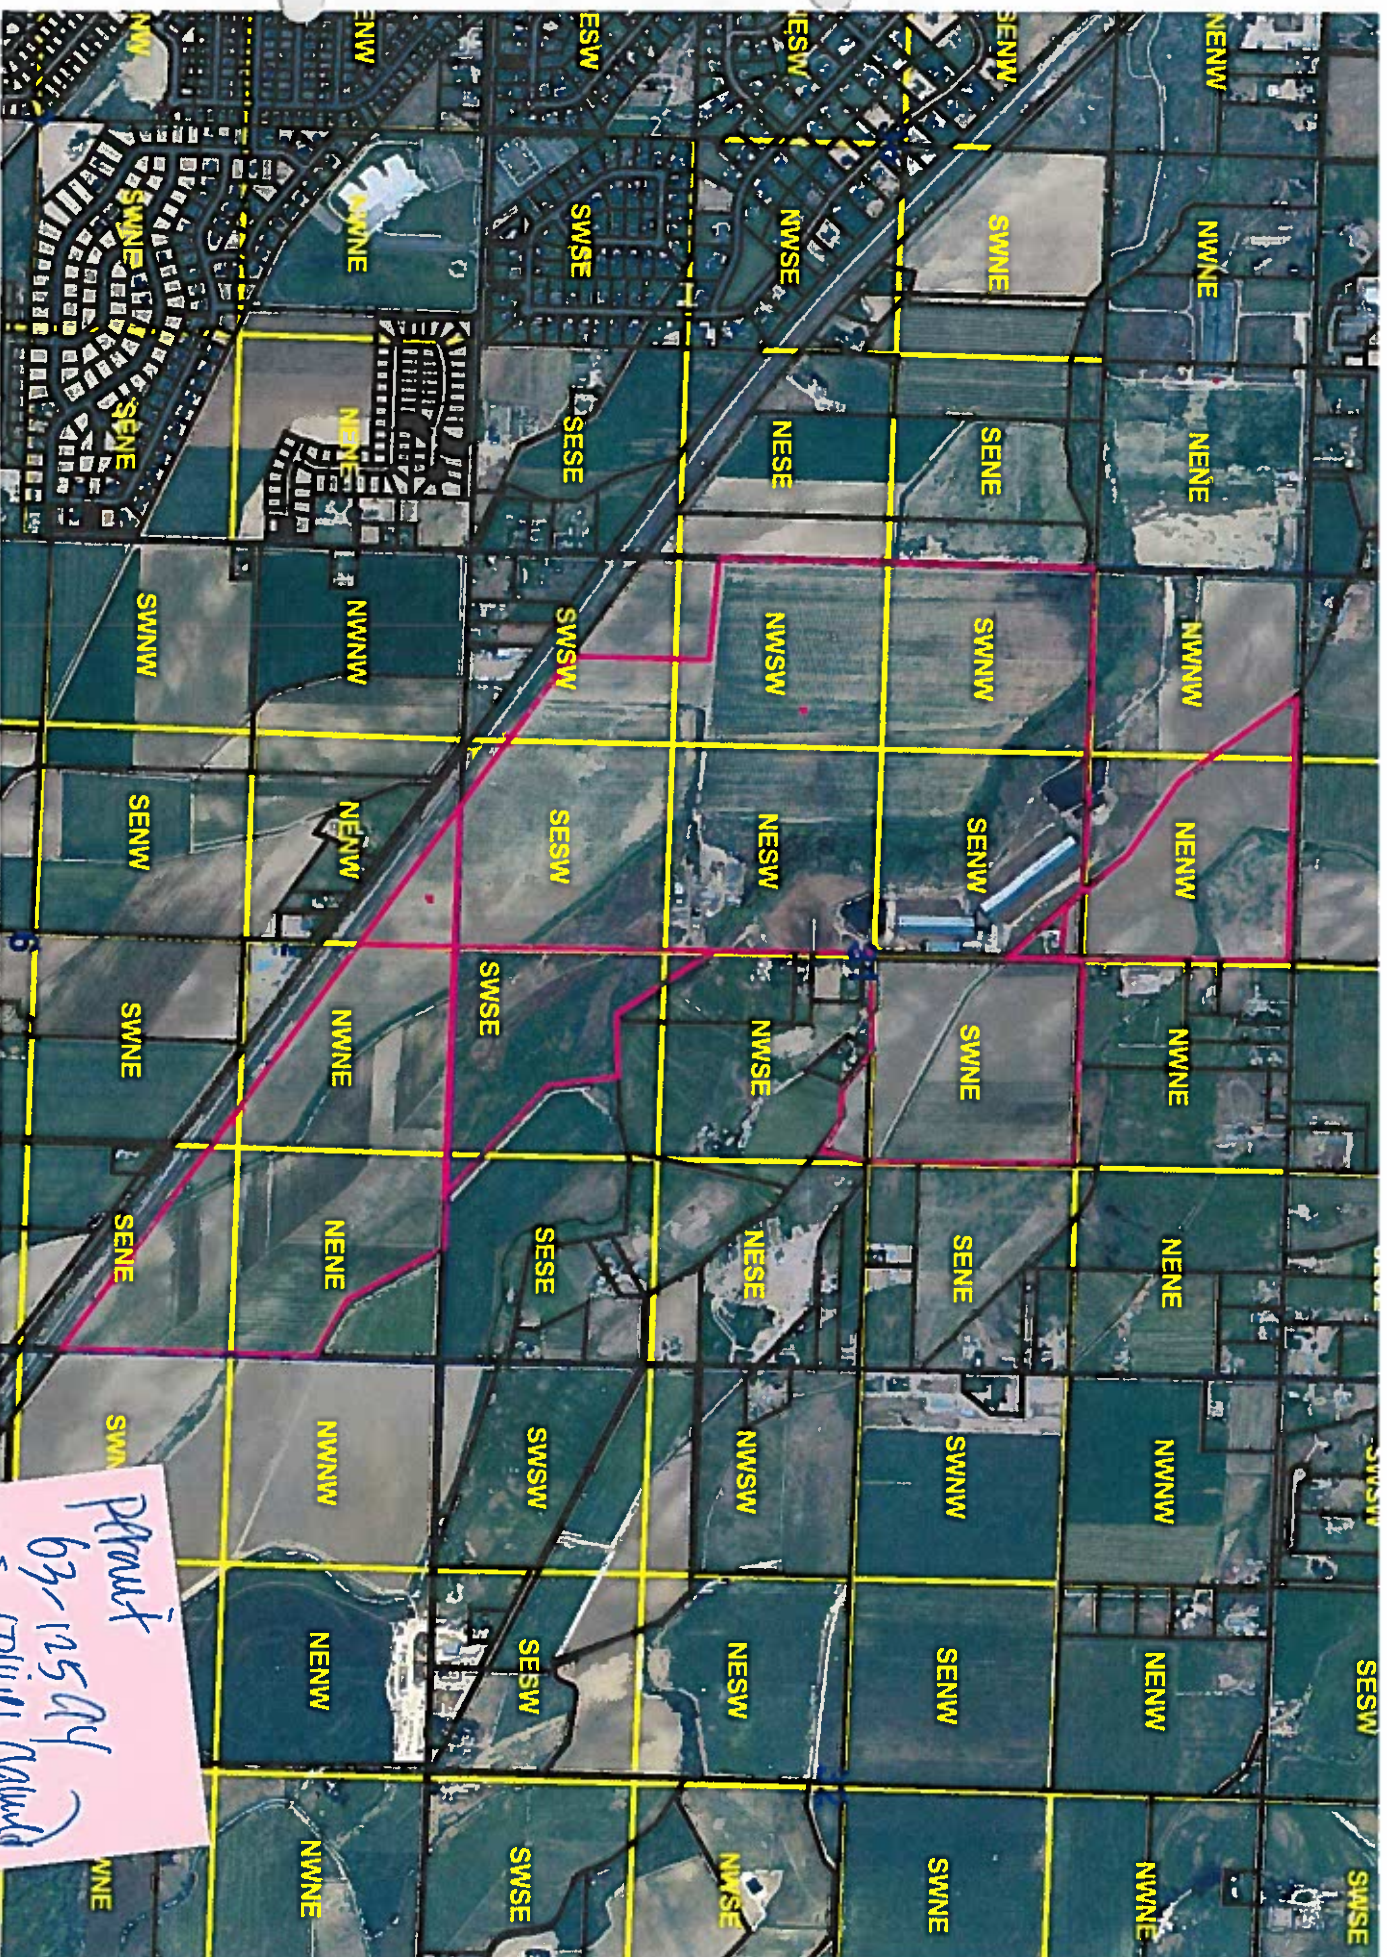

- 01Q After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
- 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- WB4 The total instantaneous diversion of water from all points of diversion under Right 63-31100 shall not exceed 0.45 cfs, nor total combined annual volume of 82.3 af.
- T07 The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
- X58 ~~Approval of Transfer 68492 does not confirm SRBA Claim 63-31100.~~
- R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
- T08 Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- T09 ~~Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.~~
- 106 Use of water under this approval shall comply with applicable water quality standards of the Department of Environmental Quality.
- WD8 The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by this water right.
- T17 Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.

Brief

The dairy site has existed since 1948 without the applicant properly recording the water rights. As a result, SRBA claim A63-31100 was filed for uses developed prior to 1963. Application for permit no. 63-12594 was filed for uses developed between 1963 and 1987. This transfer was filed based on SRBA claim A63-31100 for uses developed after 1987 and to cover future expansion plans.

History

The first dairy was located south and west of Indian Creek and operated until 1970. By 1963, cow numbers had reached 250 cows and 250 heifers. In 1970, a new dairy was built north and east of Indian Creek and a new well was drilled next to the new milking parlor. A capacity of 480 cows and 480 heifers was reached by 1987. Another new dairy was constructed between 1993 and 1995. The capacity of this dairy is ~1000 cows and 900 heifers, which the owner hopes to reach by 2002.

The system consists of three artesian wells and one non-artesian well. The excess flows from the artesian wells can supplement surface water irrigation via ditch and gated pipe.

Overlaps

Claim A63-08719 is for a well that has not been used for over 20 years according to applicant's consultant. Applicant does not feel that this claim will be recommended in

the SRBA due to non-use. The water right was not included in this transfer because historical use could not be established.

As referenced above, application for permit no. 63-12594 was filed by the applicant with this transfer for commercial and stockwater uses developed between 1963 and 1987.

Nampa/Meridian Irrigation District water also covers the acres listed. No other rights are used.

Verification

Applicant provided a 1990 FSA photo. Department aerial photos from 1987 and 1994 were also used to determine the dairy's stages of development.

Power records were not available for the artesian wells. Based on artesian flows from the three wells, applicant estimated that the wells supplemented the surface water on the 96 claimed acres at a diversion rate of ~.37 cfs.

Nampa/Meridian Irrigation District supplies .78"/ac or .0156 cfs/ac. This leaves .22"/ac or .0044 cfs/ac that could supplement the surface water.

Attachment B of the transfer developed an average historic diversion volume estimation of 4.4 afa/ac averaged from three recent years of crop records. The following compares the logistics of this amount to IDWR standards:

$$\frac{4.4\text{afa}}{4.5\text{afa}} = \frac{X}{.02\text{cfs}} = .019555 \text{ cfs/ac (96 ac)} = 1.88 \text{ cfs}$$

$$(.78")(.02\text{cfs})(96\text{ac}) = 1.5 \text{ cfs}$$

$$1.88 \text{ cfs} - 1.50 \text{ cfs} = .38 \text{ cfs}$$

To satisfy the historic diversion volume of 4.4 afa, it is safe to assume that .38 cfs of groundwater was needed to supplement the surface water. The applicant is claiming .37 cfs irrigation water from the artesian wells on SRBA claim A63-31100. Based on the above calculations, **this amount appears reasonable.**

In regards to the transfer, ground water could have historically irrigated 18.9 acres at 83 afa/ac diversion volume and 50 afa/ac consumptive use volume.

18.9 ac – 8.3 ac needed for dairy = 10.6 remaining acres that can be irrigated soley with ground water @ .02 cfs/acre

-or-

96 acres – 8.3 ac needed for dairy = 87.7 remaining acres that can be supplemented with ground water @ .0044 cfs/acre

After reviewing the documentation submitted along with having personal knowledge of the dairy's progression, SRBA agent Mel Schulte said he would recommend claim A63-31100 as filed.

Recommendations

Approve the transfer and associated application for permit as filed.

Have applicant withdraw claim A63-08719.

LEGAL NOTICE NOTICE OF PROPOSED CHANGE OF WATER RIGHT TRANSFER NO. 5808

Notice is given that SCHULERLANE FARMS INC. of 1815 Cruise Ln, Nampa, ID 83687, have applied to the Department of Water Resources to change the nature, period and place of use and add a point of diversion pursuant to I.C. § 42-222 for the following Snake River Adjudication (SR-BA) claim in T3N R1W S31 and T2N R1W S6, Ada County:

Claim A63-31100, priority 3/25/1963, diverted from three artesian wells in S 1/2 S31, 426 cfs for irrigation of 96 acres, .078 cfs for commercial and stockwater uses for 250 cows and 250 heifers. Wastewater from the dairy is land applied to acres in S31 and NE S6.

PROPOSED CHANGE

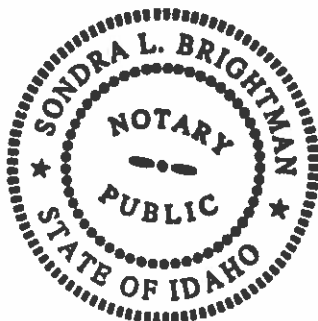

Retire 8 acres from irrigation and use the water from those acres for an existing dairy located 2 miles East of Nampa on Amity road in the W 1/2 S31. The additional water from this transfer and the accompanying application for permit no. 63-12594 will increase the dairy to 850 milking cows, 150 dry cows and 910 replacement heifers. An existing well located in the SENW S 31 will be combined with the artesian wells to reflect a common system. Uses will be described as .2cfs irrigation and a .245 cfs commercial and stockwater.

Any protest against the approval of the proposed change must be filed with the Department of Water Resources, Western Region, 2735 Airport Way, Boise, ID 83705-5082, together with a protest fee of \$25 on or before September 25, 2000. The protestant must also send a copy of the protest to the applicant.

6. General Information:

- a. Description of diversion system: Well # 4 with pump and pressure system, located next to 1970 milking parlor.
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? X Yes No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

The land now irrigated is also irrigated by water from the Nampa-Meridian Irrigation company. The land removed from production was removed in 1996 when the new large barn was constructed. (see maps). The land removed from production is not listed within the ppu for the original claim, but is offered as mitigation in keeping with the requirement that the transfer not result in an enlargement of the right. The actual acreage removed from irrigation as a result of the dairy expansion in the mid 90's is approximately 14 acres and corresponds to Field # 3 on the attached aerial photo.

Water transferred is from groundwater from artesian wells used to irrigate until 1995, and no longer used. The artesian wells were capped at that time except that well # 2 still waters 200 heifers.

A new dairy was built during the period 1994-1997 and animal housing was greatly improved with new free stall barns. The owner says that he only uses the wash pen 3 minutes or less per group, and has it off in the winter. The dairy can function, though less efficiently, without using it at all. The animal numbers used represent full development of the dairy and are expected within 2-3 years.

This transfer requests a change in the nature of use of a portion of the irrigation right claimed in Notice of Claim filed on 4/28/00. The irrigation claim involved water from artesian wells 1,2,and 3. Wells 1 and 2 flowed into the irrigation ditches in summer, and into Indian Creek in winter. The flow into the ditch was estimated by the operator to be approximately 75 gals per minute. From this we calculated irrigation flow of .167 cfs. and acres irrigated of 8.3. Well 3 is located in a different 1/4 and was used to irrigate approximately 10 acres. From the acreage we calculated a flow of .2 (10 acres x's .02), since the actual flow of the well was substantially greater than that. The two together = the .367 cfs claimed. Gated pipe was fitted directly to well # 3, and that has continued until recently when the county put in a new road.

The wells 1 and 2 were capped and controlled in 1995. Well 1 continues to be used for watering stock (200 head), but the excess flows are no longer used for irrigation in summer. The field irrigated by wells 1 and 2 also has rights in the Nampa Meridian Irrigation company, and continues to be irrigated. Well 2 is now used exclusively for a residence. Well 3 has been temporarily capped.

13.9 acres were taken out of irrigation for the new dairy. (See map)

WATER RIGHT NO. 63-31100
As Modified by Transfer No. 68492

CONDITIONS OF APPROVAL

- X* 1. Approval of Transfer 68492 does not confirm SRBA Claim 63-31100.
2. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
- Q* 3. The total instantaneous diversion of water from all points of diversion under Right 63-31100 shall not exceed 0.45 cfs, nor total combined annual volume of 82.3 af.
- QAP* 4. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
- QAP* 5. After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
- QAP* 6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
7. Use of water under this approval shall comply with applicable water quality standards of the Department of Environmental Quality.
- POU* 8. The place of commercial use authorized by this approval includes land upon which wastewater may be applied for irrigation purposes to satisfy water quality requirements. Water diverted under this approval shall not be used for irrigation unless the water is first used in the dairy as authorized by this water right.
- T* 9. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
- QAP* 10. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
- X* 11. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

This water right is subject to all prior water rights and shall be administered in accordance with Idaho law and applicable rules of the Department of Water Resources.
