Comments:

1. dnelson 9/13/2006 Claim Review

Comment: This claim was originally filed as a beneficial use claim for 0.28 cfs and 14 acres of irrigation. I performed a field exam on this claim and discovered that 21.3 acres and 0.33 cfs are actually being used for this claim. I informed the owners and they filed an amended claim on 7/11/2006. This claim is a basic supplemental groundwater use to land irrigated by Black Canyon Irrigation District water. Therefore, it should be recommended per the amended claim with the condition that Black Canyon Irrigation District water is also used on this place of use.

The owner supplied an affidavit from the previous owner that was used in an earlier case against the neighbors who were trying to use their Black Canyon Irrigation District and ground water on their property. The previous owner assisted them in resolving that situation, and they supplied the same documentation for this claim. The information is sufficient to recommend this claim with a 3/1/1953 priority date.

No volume was claimed on the right, but the diversion rate is sufficient to allow the full 4.5 afa per acre for the 21.3 acres for a total of 96 afa.

ADDITIONAL INFORMATION NEEDED FOR IRRIGATION FIELD EXAMS

Field Examiners, please complete the following checklist. Mark "unknown" or N/A if information doesn't apply or information is unavailable.

IF CURRENT OWNER DOES NOT MATCH PROOF REPORT PLEASE GIVE NEW OWNER CHANGE OF OWNERSHIP FORM TO COMPLETE.

1.) Pump information:

Well or Diversion Identification No.*	Motor Make	Hp	Motor Serial No.	Pump Make	Pump Serial No. or Discharge Size
P10	FRANKLIN ELECTRIC	7.5	S 20926	Berkley	model # 6TP-125

2.) Lift (distance from pump to water) 128 FT PWL } per owner
121 FT static

3.) How was lift determined (well log, measurement, owner)? owner

4.) Pressure against pump (this is checked using the owner's psi gauge, your gauge, or an estimate by owner) Estimated open discharge @ 10 psi.

5.) Was a measurement made? NO If no can a measurement be made at a latter time? NO Theoretical used

6.) What type of measurement device was used? Theoretical

7.) Is there a pump curve available for pump? yes (matches Theoretical)

8.) Please fill out the following:

Number of sprinklers _____

Sprinkler nozzle size _____

Number of Pivots (include gpm rating for each pivot) _____

Gated Pipe.

9.) Please outline all acres irrigated on attached aerial photo. ☒ DONE

10.) Please clearly mark all points of diversion on map and GPS. ☒ DONE

11.) Please clearly mark all mainlines, ditches, and other conveyances.

☒ DONE

12.) Pictures taken of place of use and point of diversion. ☒ DONE

13.) Please show where and how water from other sources are diverted into the irrigation system. ☒

FIELD EXAMINERS NOTES (descriptions, other uses, questions, ect.)

The water is diverted from a well ~~into~~ by 7.5 HP pump. A measurement was not possible, because the gated pipe had been removed. A theoretical and a pump curve were used to determine flow rate. The owner claimed 14 acres, but it is obvious that the pump can irrigate all of the land. I recommended the owner amend the claim to include all of the land. This right is supplemental to Black Canyon Irrigation District.

DATE EXAM CONDUCTED 6-12-2006

FIELD EXAMINER Daniel A. Moberg

T06N R05W S29
1994 AERIAL PHOTO

NWSW
7.3 ACRES

**BLACK CANYON
WATER COMES
IN HERE.**

SWSW
14 ACRES

The water is pumped from the well into one of three mainlines. The first mainline goes to a regulation box outside of the pump house. This box diverts the water to the west to a gated pipe that irrigates a small field west of the driveway. The second mainline goes to the home to irrigate the yards and gardens. The third mainline goes north east to a diversion box on the east side of the property. This diversion box diverts water by gravity flow back to the west to irrigate the fields north of the house and the fields south of the house. Black Canyon Irrigation District water also enters this east regulation box. There is a third box in the middle of the system to direct water to different locations. There is a total of 21.3 acres irrigated. The well can irrigate all of the property.

Total Flow	0 gpm =		
Pivot / System rating	gpm =		

Max Flow from all sheets:

0.33

ASSUMPTIONS

- 1) "Horsepower" is the motor shaft horsepower, equivalent to nameplate for a fully loaded motor
 - 2) "PUMP Eff Estimate" is the efficiency of the pump only; motor efficiency would be included to assess total pumping system efficiency. Over-ride this value if additional information (such as a pump curve) is available.
- .73 for <7.5 hp
.76 for 7.5 to <15 hp
.77 for 15 to <40 hp
.79 for 40 to <75 hp
.82 for 75 hp and larger

The sprinkler equations assumes new nozzles; increase "Percent Leaks" to account for wear.

Comments / Data Supplied:

The theoretical and pump curve for this pump are identical. Therefore, a diversion rate of 0.33 cfs will be recommended as the capacity of this system. The owner supplied the pumping water level and the pressure was estimated as a standard pressure for open discharge.

Re:A63-31127 Snake River Basin Adjudication Claim

Dear Mr. Nelson:

Enclosed are the pump curves from Berkeley pumps and the sales slip for the pump end and the motor. I spoke with Larry Caruse at Silver Creek Irrigation in Nampa, phone 463 0519. Mr. Caruse said that the serial numbers on the pump and motor are not in the records, all he has is the same bill of sale that I am forwarding to you.

I hope this helps and please let me know if you need any more information.

Sincerely,

Ann Zavala

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 6/29/2006

FILE NUMBER 63-31127

The top photo shows the well house and the wellhead. The pipeline leaving the wellhead goes into the regulation box directly outside of the well house that feeds the small field west of the driveway. The pipe going sideways goes to the east regulation box and the yard.

The bottom photo is of the regulation box just outside (south) of the well house. It provides water to the small field west of the driveway.

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 6/29/2006

FILE NUMBER 63-31127

The picture above is of the east regulation box. it shows where some of the gated pipe is leaving the box.

The next photo down shows where the Black Canyon water enters the box.

The third photo down shows another exit pipe for the gated pipeline.

The bottom photo shows where the mainline from the well comes into the regulation box. The standpipe for this mainline is missing.

The system hadn't been used in some time, and most of the ground was dried up, so it is difficult to determine how the system is currently operated. I used to the 1964 aerial photo to determine the directions of the mainline and gated pipe. The pump had just been replaced and it appears as though the system is being prepared to be put back into use.

Re:A63-31127 Snake River Basin Adjudication Claim

Dear Mr. Nelson:

Thank you for explaining the information that you needed for our claim in addition to the maps. It took some digging, but I found a statement from Klaus Bohne, who owned the property in 1979, regarding disputed water use from Black Canyon irrigation after we bought the land. There is mention of the well water in that statement, and this might be the information that your office needs for our claim.

Please let me know if you need anything else and thank you for your help with this matter.

Sincerely,

Ann Zavala

June 20, 1999

To Whom It May Concern

I met with Jim, the ditchrider, to talk to him about the water use from Black Canyon irrigation water. I owned the property at 31148 Apple Valley Road, Parma in 1979.

The water from the edge of the farm is piped to the cistern in the middle field. I built the concrete stands and cisterns in 1979. I put pipe in place to irrigate the back and side fields. My system using well water and Black Canyon water could fill the cisterns and ponds and drain onto the fields for irrigation.

Black Canyon water from my land was not shared with any other land in the area. It was not shared with any other farmer or farm. The runoff from the Black Canyon irrigation was not directed to any place other than my farmland. No permission was ever given to take water from my land for any other land.

The Black Canyon irrigation water for 31148 Apple Valley Road was available from about 1952 or 1953, along with water from the original well that had been used to irrigate before Black Canyon. No water from either the well or Black Canyon irrigation was used on any one else's land.

Klaus Bohne

RE: EVIDENCE OF PRIORITY

Snake River Basin Adjudication Claim No(s): A63-31127

Dear Claimants,

In the past, you submitted the above referenced claim(s) during the Snake River Basin Adjudication (SRBA) claims taking. Enclosed is a computer generated printout of the claim(s) for your reference only, it is not necessary to return this printout. You indicated, when this claim was filed, that the water right(s) was based on a "Statutory Claim" or "Beneficial Use" of the water.

Water rights of this type are established by historical beneficial use of the water, dating back to the time the water was first used; this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources, since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary, along with examples of types of evidence that can be submitted to fulfill this requirement. While I encourage you to read the entire pamphlet, I direct your attention to the two sections entitled, "**What Kind of Evidence is Required**" and "**Some Examples of Documents Which May Be Evidence of the Priority Date.**"

It is important that each element of the Notice of Claim be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the SRBA court for decree. This could jeopardize your water use under this right(s) if water availability problems arise in the future.

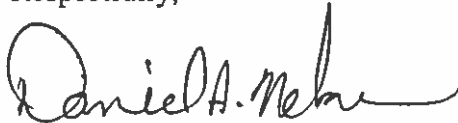

Page 2
Zavala

In addition, since it is our goal to decree the historical water right within the Snake River Basin as accurately as possible, field exams are now being conducted by Department water resource agents to verify claims in this area. In the near future, you will be receiving a call from us in order to set-up an appointment for a field exam.

The required evidence supporting the priority date(s) requested needs to be returned to me by June 2, 2006. Please let me know if you may not be able to submit proof of priority or have any questions not covered by this letter and the enclosed pamphlet, by the date indicated above.

If you have any questions or concerns, please contact me at the above address.

Respectfully,

A handwritten signature in black ink, appearing to read "Daniel A. Nelson". The signature is fluid and cursive, with a large initial "D" and "N".

Daniel A. Nelson
Senior Agent
Western Region Office - IDWR

Enclosure: "Evidence of Priority" pamphlet
Notice of Claim A63-31127

NOTE: If you no longer own the property upon which this claim was filed, please contact this office immediately. Idaho State law requires that the Department be notified of a change of owner or address on a water right.

The quantity is .33. There are 2 places to data enter the quantity in the electronic claims verification record and when the agent made the rec, he only changed it in one place. I corrected it in our database today.

Jan,
Is the quantity 0.28 or 0.33?
Ted
