Comments:

1. dnelson 4/25/2006 Claim Review

Comment: The above claim is an instream stockwater claim. No evidence of priority was required. This right authorizes the watering of livestock directly from the stream without a diversion. Therefore it was recommended as filed using the standard conditions, stating that the right is not a determination of historic beneficial use. The use was for 500 head of cattle, so this limitation should not be a problem.
