IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Recommendation Report 63-31410 V1

Remarks:Comments:

1. dnelson 3/28/2006 Claim Review

Comment: This claim is based on water right license 63-2680. When the adjudication claims were filed, two individuals filed for a portion the license creating water rights 63-31410 and 63-31411. The claims were licensed without a season of use, so the standard season of use was placed on the adjudication claim.

The license shows 15 acres in the NESW. The field exam map shows that the 15 acres were west of the Wilson Drain. The available tax lot information for Canyon County shows Wilson Drain is also the east border of the claimant's property. New mapping technology using GIS mapping only shows 10.8 or 11 acres west of the Wilson Drain. Therefore, I reduced the amount of acres recommended in the NESW to the amount of land owned by the claimant or 11 acres. As a result of the resolution of acres, the diversion rate was reduced to 0.02 cfs per acre or 0.93 cfs. The standard volume of 4.5 afa per acre was used to determine the annual volume of 208.7 afa.

An overlapping statutory claim 63-4951 was filed on 1/17/1983. The claim stated that a well in the SWSW S12 supplied supplemental water to 120 acres. Two adjudication claims were filed in 1990 and 2001 that split this right into 63-4951A and 63-4951B. When 63-4951A was filed in 1990 they listed a new point of diversion, which was located in the NWSW. Water right 63-4951A was then split by a change in ownership on 4/14/2000, which created adjudication claims 63-31412 and 63-31413. Generally, changing the point of diversion may be acceptable through an accomplished transfer, if the change had occurred prior to commencement of the adjudication process or prior to 1987.

However, this water right license for the well in the NWSW was filed to supply supplemental water to the same exact acres at the full allocation of 0.02 cfs or one inch per acre. A transfer cannot be allowed when an individual proposes to move a water right from one source (the well in the SWSW) to a second source (the well in the NWSW) when the second source already has a water right that supplies the full allocation of water to the same lands. Therefore, we cannot consider an accomplished transfer for those statutory claims.

Whereas the lands irrigated from the well are fully covered by this right and 63-31411, both of the statutory claims have been recommended for disallowal. The full allowable

MEMORANDUM

TO: ADJUDICATION CLAIM FILE 63-31410

FROM: DANIEL A. NELSON

DATE: 3/28/06

SUBJECT: CLAIM REVIEW

This claim is based on water right license 63-2680. When the adjudication claims were filed, two individuals filed for a portion the license creating water rights 63-31410 and 63-31411. The claims were licensed without a season of use, so the standard season of use was placed on the adjudication claim.

The license shows 15 acres in the NESW. The field exam map shows that the 15 acres were west of the Wilson Drain. The available tax lot information for Canyon County shows Wilson Drain is also the east border of the claimant's property. New mapping technology using GIS mapping only shows 10.8 or 11 acres west of the Wilson Drain. Therefore, I reduced the amount of acres recommended in the NESW to the amount of land owned by the claimant or 11 acres. As a result of the resolution of acres, the diversion rate was reduced to 0.02 cfs per acre or 0.93 cfs. The standard volume of 4.5 afa per acre was used to determine the annual volume of 209.7 afa.

An overlapping statutory claim 63-4951 was filed on 1/17/1983. The claim stated that a well in the SWSW S12 supplied supplemental water to 120 acres. Two adjudication claims were filed in 1990 and 2001 that split this right into 63-4951A and 63-4951B. When 63-4951A was filed in 1990 they listed a new point of diversion, which was located in the NWSW. Water right 63-4951A was then split by a change in ownership on 4/14/2000, which created adjudication claims 63-31412 and 63-31413. Generally, changing the point of diversion may be acceptable through an accomplished transfer, if the change had occurred prior to commencement of the adjudication process or prior to 1987.

However, this water right license for the well in the NWSW was filed to supply supplemental water to the same exact acres at the full allocation of 0.02 cfs or one inch per acre. A transfer cannot be allowed when an individual proposes to move a water right from one source (the well in the SWSW) to a second source (the well in the NWSW) when the second source already has a water right that supplies the full allocation of water to the same lands. Therefore, we cannot consider an accomplished transfer for those statutory claims.

Whereas the lands irrigated from the well are fully covered by this right and 63-31411, both of the statutory claims have been recommended for disallowal. The full allowable flow of water for these lands will be recommended in claims based on the licensed right or water rights 63-31410 and 63-31411.

APPLICATION FOR AMENDMENT TO PERMIT TO APPROPRIATE
THE PUBLIC WATERS OF THE STATE OF IDAHO, No. 20296

Comes now E. V. Redabaugh and represents to the State Reclamation Engineer of the State of Idaho:
That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 20296;
That the point of diversion is described in said Permit as being located in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 12, Twp. 3 N.,
Range 3 W., B.M., and place of use in the S $\frac{1}{2}$ SW $\frac{1}{4}$ said Section;
That he now requests that the point of diversion be changed to a point located in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ Section 12,
Twp. 3 N., Range 3 W., B.M. and that the place of use be changed to N $\frac{1}{2}$ SW $\frac{1}{4}$ of said section.
That his reasons for desiring to make such change are as follows: The point of diversion and place of use
were both erroneously described in the original application and permit.
That no one will be injured by such change, and that such change will be made at Permit Holder's own risk.
Signed at Boise, Idaho, this 6th day of Dec., 1948.

APPROVAL OF STATE RECLAMATION ENGINEER

I, MARK R. KULP, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing
application for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 20296. This approval
constitutes a new permit and is issued as an amendment to the original permit to which it refers, and of which it
becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected
thereby.

Re: Original Notice of Claim to a Water Right No. 63-02680

Renumbered to Notice of Claim to a Water Right No. 63-31410

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of your original Claim to a Water Right Number as referenced above. This change of ownership resulted in a split of your original claim.

When a portion of the original water right claim has been conveyed to another and the original right has been split, then the original claim number is renumbered by issuing a new water right number to represent each split. Each split contains only the portion of the original right for each separate owner. The above referenced new water right number reflects your remaining portion of the original claim after the change of ownership. Enclosed is a copy of this new claim for your records. Please refer to your new claim number when corresponding with our office. Also enclosed is a copy of the original claim for your reference.

If you have any questions concerning this ownership change, or the enclosed claim copy, please feel free to contact this office.

Sincerely,

Denise Buffington
