Remarks:Comments:

1. dnelson 3/28/2006 Claim Review

Comment: This claim is based on water right license 63-2680. When the adjudication claims were filed, two individuals filed for a portion the license creating water rights 63-31410 and 63-31411. The claims were licensed without a season of use, so the standard season of use was placed on the adjudication claim.

The claimant's portion of the original the diversion rate is 0.02 cfs per acre or 0.09 cfs. The rate was rounded to the nearest hundredth. The standard volume of 4.5 afa per acre was used to determine the annual volume of 209.7 afa.

An overlapping statutory claim 63-4951 was filed on 1/17/1983. The claim stated that a well in the SWSW S12 supplied supplemental water to 120 acres. Two adjudication claims were filed in 1990 and 2001 that split this right into 63-4951A and 63-4951B. When 63-4951A was filed in 1990 they listed a new point of diversion, which was located in the NWSW. Water right 63-4951A was then split by a change in ownership on 4/14/2000, which created adjudication claims 63-31412 and 63-31413. Generally, changing the point of diversion may be acceptable through an accomplished transfer, if the change had occurred prior to commencement of the adjudication process or prior to 1987.

However, this water right license for the well in the NWSW was filed to supply supplemental water to the same exact acres at the full allocation of 0.02 cfs or one inch per acre. A transfer cannot be allowed when an individual proposes to move a water right from one source (the well in the SWSW) to a second source (the well in the NWSW) when the second source already has a water right that supplies the full allocation of water to the same lands. Therefore, we cannot consider an accomplished transfer for those statutory claims.

Whereas the lands irrigated from the well are fully covered by this right and 63-31411, both of the statutory claims have been recommended for disallowal. The full allowable flow of water for these lands will be recommended in claims based on the licensed right or water rights 63-31410 and 63-31411.

MEMORANDUM

TO: ADJUDICATION CLAIM FILE 63-31411

FROM: DANIEL A. NELSON

DATE: 3/28/06

SUBJECT: CLAIM REVIEW

This claim is based on water right license 63-2680. When the adjudication claims were filed, two individuals filed for a portion the license creating water rights 63-31410 and 63-31411. The claims were licensed without a season of use, so the standard season of use was placed on the adjudication claim.

The claimant's portion of the original the diversion rate is 0.02 cfs per acre or 0.09 cfs. The rate was rounded to the nearest hundredth. The standard volume of 4.5 afa per acre was used to determine the annual volume of 209.7 afa.

An overlapping statutory claim 63-4951 was filed on 1/17/1983. The claim stated that a well in the SWSW S12 supplied supplemental water to 120 acres. Two adjudication claims were filed in 1990 and 2001 that split this right into 63-4951A and 63-4951B. When 63-4951A was filed in 1990 they listed a new point of diversion, which was located in the NWSW. Water right 63-4951A was then split by a change in ownership on 4/14/2000, which created adjudication claims 63-31412 and 63-31413. Generally, changing the point of diversion may be acceptable through an accomplished transfer, if the change had occurred prior to commencement of the adjudication process or prior to 1987.

However, this water right license for the well in the NWSW was filed to supply supplemental water to the same exact acres at the full allocation of 0.02 cfs or one inch per acre. A transfer cannot be allowed when an individual proposes to move a water right from one source (the well in the SWSW) to a second source (the well in the NWSW) when the second source already has a water right that supplies the full allocation of water to the same lands. Therefore, we cannot consider an accomplished transfer for those statutory claims.

Whereas the lands irrigated from the well are fully covered by this right and 63-31411, both of the statutory claims have been recommended for disallowal. The full allowable flow of water for these lands will be recommended in claims based on the licensed right or water rights 63-31410 and 63-31411.

Re: Original Notice of Claim to a Water Right No. 63-02680

Renumbered Notice of Claim to a Water Right No. 63-31411

Dear Claimants:

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time. You will be notified of any future action taken on this claim. Also enclosed is a copy of the original claim for your reference.

Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Denise Buffington
