RE: Amended SRBA Recommendations for 67-467A, B, C and 67-468A, B, C

Dear Claimants:

This letter is to inform you that the recommendations for the split portions of 67-467 and 67-468 have been amended based on new evidence. Through the Notice of Error (NOE) process, 1919 tax assessment records were submitted as additional evidence of which ground was the historically irrigated under rights 67-467 and 67-468.

The recommendations for this right have been adjusted three times. The first time the decreed rights were distributed based on what was interpreted to be the original irrigated ground.

There was claimant disagreement with this distribution based on this procedure so lacking better evidence, I recommended the split proportions based on water master records, knowing that there was evidence to indicate that the water master records were wrong for rights 67-467 and 67-468 as they show delivery of more water than was originally decreed.

After the preliminary mailing was sent out, Mr. Dunham provided 1919 tax assessment documents that showed how much irrigated ground existed in each of the decreed 40 acre tracts. The actual acreage shown in the 1919 tax roll was 140 acres and a total decreed acreage between the two rights was 131.2 acres.

By taking the number of acres in each 40 and dividing it by the total 140 acres, we came up with a percentage of irrigated ground per QQ for the decreed POU. That percentage was then used to calculate how much each split portion had from each decreed right.

The 1919 tax assessment roll appears to be the most reliable date I have currently. If you disagree with the recommendations for your water rights, you will have a chance to file an objection and be heard by the SRBA court.

Respectfully submitted,

Craig L. Saxton
Sr. Water Resource Agent
Adjudication Bureau

42 ACRES TOTAL

This right is limited to the irrigation of 9.8 acres within the place of use described above in a single irrigation season.

The rights listed below are limited to the irrigation of a combined total 42.0 acres in a single irrigation season. Combined Right Nos.: 67-467A, 67-468A, and 67-4090

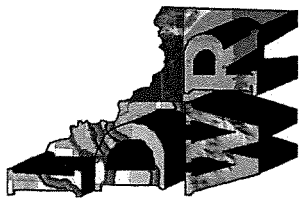

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Right includes accomplished change in point of diversion pursuant to Section 42-1425, Idaho Code.

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

Remarks:Comments:

1. csaxton 11/26/2006 Diversion Rate
Comment: See memo in file dated 11-26-06

2. csaxton 12/14/2006 NOE
Comment: The recommendations for this right has been adjusted three times. The first time the decreed rights were distributed based on what was interpreted to be the original irrigated ground. Mr. Carr disagreed with that assessment so lacking better evidence, we recommended the split proportions based on water master records. However, evidence indicates that the water master records are wrong for rights 67-467 and 67-468 as they show delivery of more water than was originally decreed.

After the preliminary mailing was sent out, Mr. Dunham provided 1919 tax assessment documents that showed how much irrigated ground there was in each of the the decreed 40 acre tracts. The actual acreage shown in the 1919 tax roll was 140 acres and a total of 131.2 acres was decreed under the two above mentioned rights.

By taking the number of acres in each 40 and dividing it by the total 140 acres, we came up with a percentage of irrigated ground per QQ for the decreed POU. That percentage was then used to calculate how much each claimant had from each decreed right.

The 1919 tax assessment roll appears to be the most reliable date I have currently.

Memorandum

Date: 1-13-06

To: File 67-467A, 67-468A, and 67-4090

From: Craig L. Saxton

RE: Preliminary recommendation for SRBA claims 67-467A, 67-468A, and 67-4090

I met with Farrell and Joan Carr on 1-6-06 to discuss the preliminary recommendations I made on the above listed claims. There were three main points of contention.

- 1) No evidence of priority was submitted for irrigation of ground located in the SWSE of section 15. Mr. and Ms. Carr brought in copies of 1915 tax notices that reference 25 acres of agricultural ground in the SWSE. Due to Muir vs. Allison, the best priority I can recommend is 5-10-1918. Mr. Carr drew in the irrigated POU and I agree with his findings. I will recommend flood water on the SWSE.
- 2) POD recommended under 67-467A and 67-4090 put the POD to the Steward Ditch. According to the claimant, there is another POD downstream from the Steward Ditch POD and is located in the NWSE of S.15. The claimant drew in the location of the POD on a map. I do not know when this POD was put in place and am not totally sure if it is from the main source or from a ditch. The map provided by the claimant in 1989 does not show the additional "POD". The POD in the NWSE will not be recommended, but **by this memo, there could be another active POD that might require a transfer.**
- 3) Add POD in Section 36 for 67-467A and add the Section 15 POD to 67-468A per the addition of the decreed acres recommended SW of the Little Weiser River. Through historical irrigation practices, I believe both PODs are used to divert both 67-467A and 67-468A and the acreage that each one is used on within the 17.2 ac recommended, is not distinguishable.

Basically, the proportionate share of water that is recommended for 67-367A and 67-368A, cannot be put on either the north side or the south side of the creek. Simply, the numbers don't match. Example: there are 8.3 irrigated acres on the south side of the Little Weiser. But the claimants proportionate share is 12 acres of water. There are 8.9 irrigated acres on the north side of the Little Weiser, but the claimants proportionate share is 5.2 acres. **In order for this water to irrigate what it has been irrigating, both rights are used on both pieces of property. That requires both POD's to be on each right.**

- 4) I originally thought the decreed POU for 67-467 and 67-468 was limited to ground located NE of the Little Weiser River. However, 67-467 and 67-468 were delivered from two different ditches per the decree. Mr. Carr stated that one of those ditches put water on his property SW of the Little Weiser River. I do not have any information to show otherwise. In addition, Water Master records show that delivery for Mr. Carr for portions of 67-467 and 67-468 come from two different diversion points, yet the same source.

Based on this new information, I increased the acreage recommended under the decreed rights 67-467 and 67-468
