claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

- (2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)
Jackass Creek tributary to S. Fork Coeur d'Alene River

- | Quantity | Use | Period of Use From | To |
|----------------------|-----------------------|--------------------|-------|
| 0.23 cfs | Domestic (A) | 1-1 | 12-31 |
| 0.45 cfs | Domestic (B) | 1-1 | 12-31 |
| 1 A.E. | Storage for Domestic | 1-1 | 12-31 |
| 1 A.E. | Domestic from Storage | 1-1 | 12-31 |
| 0.06 cfs | Irrigation | 3-15 | 4-15 |
| TOTAL QUANTITY USED: | | | |

- B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. 8'x90' Conc. Dam with one AF Res. 8" line
from dam to C₁₂, then to place of use.

- (B) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

[illegible]

No. of acres 3

8) If water is used for other than irrigation, fully describe that use, being as specific as possible:
 at Little Run, Cafeteria

1) School - 500 Students / Gym, Cafeteria

8) Hops. - 60 Beds (Calderia. - Laundry)

NOTE: Include here the type and number of stock watered: _____
If you are claiming water as a member of an organization, list name of organization: _____

Gentlemen:

The Board of Trustees of Joint Class A School District No. 391 of Shoshone and Kootenai Counties, Kelliog, Idaho wish to apply for a pipe line right-of-way to supply water to our Senior High School Building. Water to the building will be used for domestic use in the building and for irrigation of the grounds.

In addition to the pipe line right-of-way the Board of Trustees desire a road right-of-way along the pipe line since it will be necessary for maintenance of the pipe line and reservoir.

The said pipe line and road right-of-ways shall be on a tract of ground located in the S.W. 1/4 of Sec. 30, T. 49 N., R. 3 E., B. N. and more particularly described as follows:

Beginning at the S.W. corner a point identical with the South 1/4 corner of Sec. 30; thence N. 30° 31' E., 1360.0 feet to a point; thence S. 59° 29' E., 100.0 feet to a point; thence S. 30° 31' W., 1301.1 feet to a point of intersection with the South line of said Section 30; thence west along said section line 116.1 feet to the S.W. corner and place of beginning and containing 3.055 acres, more or less.

This request for right-of-way is made pursuant to the regulations in part 244. C.F.R. 43. and we agree that the

(FORM 5)

Kenneth Preston states that he is the chief engineer (or was employed
(name of engineer)
to supervise or check the construction of the canals, ditches, laterals, and reservoirs)
for the Joint Class A School District No. 391 ; that said (canals, ditches, laterals,
(Company)
and reservoirs) have been constructed under his supervision; that construction was
commenced on the 4th day of March, 1955, and completed on the 2nd
day of April, 1955; that the constructed (Canals, ditches, laterals, and
reservoirs) as aforesaid, conform to the map which received the approval of the
Department of the Interior on or about the 5th day of July, 1955.

Kenneth L. Preston
(Signature of engineer)

(FORM 6)

I, Howard Andrews certify that I am the Superintendent of Schools
(Applicant) (Company officer) (Title)
of the Joint Class A School District No. 391 ; that the (canals, ditches, laterals,
(Company)
and reservoirs) were actually constructed as set forth in the accompanying statement
of Kenneth Preston, chief engineer (or the person employed by the company
in the promises), and on the exact location represented on the map approved by
the Department of the Interior on or about the 5th day of July 19 55 ;
and that the company has in all things complied with the requirements of the act
of (March 3, 1891) granting rights-of-way for (canals, ditches, laterals, and reservoirs)
through public lands of the United States.

Mr. Howard Andrews
Superintendent of Schools
Kellogg, Idaho

Dear Mr. Andrews:

Thank you for your letter of Feb. 1, 55, authorizing us to construct a water system for your new high school. We wish to thank the board for this opportunity and to assure them the job will be completed as early as possible in keeping with good construction practice.

At this writing we see no obstacles to an early completion as all supplies are either on hand or scheduled for early delivery.

Construction will be started at once to take advantage of unusual weather and before spring run off starts.

Sincerely yours,

Zanetti Brothers

Mr. Howard Andrews
Superintendent of Schools
Kellogg, Idaho

Dear Mr. Andrews:

This is in reply to a letter from Culler and Gale dated October 26, 1954, inquiring as to the possibilities of certain changes in the water supply system to the new high school.

The proposal calls for laying approximately 1200' of 6" cast iron water main from the existing hydrant through the proposed housing development site and to the entrance of the high school site. From that point a booster pump will operate on a closed system through a 3" cast iron water main.

only Under these conditions it would probably be best if we would participate in the extension of the 1200' of 6" main and at that point install a meter for the high school, and the high school to provide their own system from that point. In that case the school would furnish their own necessary booster pump to furnish water to the school.

I might comment that 3" cast iron main is not, to my knowledge, a readily obtainable item. I am reasonably sure that it is not manufactured by western pipe manufacturers, and must be purchased from eastern sources.

Mr. Gale proposed to lay the 3" main in the same trench as the present sewer line to reduce the cost of excavation. Such a practice is contrary to the Public Health Standards set forth by the Department of Public Health in which they specify a 10' horizontal distance between a sewer line and a water line.

I hope this answers the information you needed, and if there is anything else we can help you with, please feel free to call.

Very truly yours,

Walter H. Smith

Mr. Fred Albinole,
Kellogg, Idaho.

Dear Sir:

Complying with your request for prices on our untreated-coated wood stave pipe for the Pine Hurst water system, we are pleased to offer you the following prices fob. Kellogg, Idaho.

Amount	Size	Head	Type of coupling	Weight per 100 feet	Price per 100 feet.
4200'	6"	100	Wood	870#	\$118.60
	6"	150	Collar	916#	123.50
	6"	200	"	958#	130.70
	6"	250	"	990#	139.15
	8"	100	"	1119#	148.80
	8"	150	"	1176#	155.35
	8"	200	"	1239#	177.80
	8"	250	"	1305#	189.15
	10"	100	"	1430#	187.40
	10"	150	"	1552#	199.15
	10"	200	"	1585#	207.40
	10"	250	"	1675#	222.45

The above prices are based on furnishing the pipe manufactured from untreated Douglas Fir in random lengths and each section of pipe will be equipped with one collar. After the pipe is assembled it will be given a heavy coating of Coal Tar and then rolled in saw dust to facilitate handling.

We trust this is the data you need, but if there is any other information we can furnish you, please call on us.

Yours very truly,

Federal Pipe and Tank Co.
