IDWR / NORTH

Mr, Roda

My Name Is Matthew Cocks and I am the site manager for Camp Sweyolakan the property that is discussed in this claim

95-16393.

According to the documents that you have sent us we need to confirm the beneficial use of water for a campground or irrigation purposes.

I know that since 1922 we have been drawing water from the stream or lake but will need to search for documents that state when other utilities were added.

Can you tell me what would be the best documentation to provide or how we can confirm the use for a campground or irrigation use?

We have been operating a summer camp at this location since 1922 and have been using water in one form or another for drinking water and irrigation purposes since that time.

Is there a specific utility that is required to confirm use? Such as the installation of our water filtration systems?

Please let me know what I can do to get this claim processed properly.

THANKS,

Matthew Cocks
