Attorney for Hancock Timberland X, Inc.

AFFIDAVIT OF DAVID GABRIELSEN
COEUR D'ALENE-SPOAKE RIVER BASIN ADJUDICATION
CLAIM NO. 91-7909

STATE OF IDAHO)
) ss.
County of Kootenai)

DAVID GABRIELSEN, being first duly sworn upon oath, deposes and says:

1. I am over the age of 18 and state the following based upon my own personal knowledge.
2. I am presently the Idaho Region Manager for Hancock Forest Management ("Hancock"). Since 1999, in an employment capacity, I have been involved with the property ("Property") that is the subject of the Coeur d'Alene-Spokane River Basin Adjudication claim no. 91-7909. During my tenure, the Property has changed hands on a number of occasions, with ownership by various entities. The entities who have managed the Property during my tenure are Hancock, Forest Capital Partners, and Crown Pacific Partners ("Crown Pacific").
3. I am familiar with the records of the entities that have owned the Property.
4. I provided the technical information to support claim no. 91-7909.

5. In addition to my work experience with the Property, I grew up in the area. While growing up, I spent time hunting and fishing in the area of the Property. I personally saw water used from Dismal Lake for fire protection and industrial purposes.

6. In addition to my understanding of the records of the entities who have owned the Property, as well as my personal experience, I have additional knowledge of water use at the Property due to the fact that my father was employed in the area from late 1960's through 2002 for numerous entities in a variety of capacities, culminating as Land Manager for Crown Pacific.

7. Based on my understanding of the records, personal knowledge, experience, and knowledge passed down to me from my father, I can attest to how water has historically been used for fire protection and industrial purposes of use since the July 31, 1954 priority date claimed in claim no. 91-7909.

8. Water is diverted for an industrial purpose use on the main line road, which is claimed as the industrial place of use in claim no. 91-7909. Water is diverted from Dismal Lake, pumped into trucks, then used to water the main line road. In addition to watering the main line road, water is also diverted from Dismal Lake in order to maintain equipment.

9. For fire protection, and depending on the circumstances, water is either diverted from Dismal Lake by trucks, or scooped by buckets from helicopters. The water diverted from Dismal Lake is then used for fire protection in the places of use in claim no. 91-7909. Generally, when water for fire protection is needed in areas where roads are not present, helicopters are used.
