ORDER OF PARTIAL DECREE

For Water Right 34-00302

On June 18, 1992, the Idaho Department of Water Resources filed its Director's Report in Basin 34, which included a recommendation for water right 34-00302.

On February 26, 1993, the United States Bureau of Land Management (BLM) filed an *Objection* to the above-captioned water right. The *Objection* was withdrawn by the BLM on June 21, 1993.

On June 24, 1999, in response to the Idaho Supreme Court decision in *A&B Irrigaion District v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), IDWR filed a *Supplemental Director's Report, Reporting Area 1, IDWR Basin 34, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions* which included a recommendation for the irrigation season of use for this water right. No objections to this Supplemental Report were filed and the time period for filing objections has now expired.

Therefore, IT IS ORDERED that water right 34-00302 is hereby **decreed** as set forth in the attached *Partial Decree Pursuant to I.R.C.P. 54(b)*.

DATED JAN 29 2001.

I remember a little of my
good ol' UofI Soils 201 & 202 classes,
but not much more than which end of

- 1) IS THIS ACCEPTABLE?
- 2) WHAT DOES IT MEAN?
- 3) DOES IT JUSTIFY 3.2 cfs over 53 ac.?

MAJOR USES

Current uses:

irrigated -
cropland,
hayland
pastureland (nonirrigated and irrigated)
homesites
rangeland

MAJOR MANAGEMENT FACTORS

Soil-related factors:

very rapid permeability in the subsoil in some areas,
low available water capacity in some areas

CROPLAND

Suitable crops:

irrigated -
wheat,
barley,
potatoes

General management consideration:

Most climatically adapted crops can be grown if adequate drainage is provided.

For highest yields, crops and pasture must be irrigated.

The most suitable irrigation system is sprinkler.

Natural fertility is high.

All crops but legumes respond to nitrogen. All respond to phosphorus.

Suitable management practices:

Irrigate carefully to prevent the development of a seasonal water table.

Maintain the content of organic matter by using suitable rotation and returning crop residue to the soil.

Reduce compaction of the soil by returning crop residue to the soil and keeping tillage at a minimum.

HAYLAND AND PASTURE

Suitable crops:

irrigated -

MICROFILMED
NOV 20 1992

alfalfa,
grass-legume hay,
pasture
nonirrigated -
pasture,

General management consideration:

Some occasional flooding increases the amount of moisture available for plants and thus increase the amount of forage produced.

Suitability for seeding: good

All crops but legumes respond to nitrogen. All respond to phosphorus.

Suitable management practices:

These areas are best suited to grazing during late summer, fall and winter when soils are not saturate to the surface.

Irrigate carefully to prevent the development of a seasonal water table.

BULIDING SITE DEVELOPMENT

General management considerations:

Septic tank absorption fields can be expected to function poorly because of wetness in some areas during periods of flooding and seasonal wetness.

Suitable management practices:

Reduce wetness by providing drainage around building with basements and crawl spaces.

Reduce the risk of flooding by constructing dikes and channels that have outlets for floodwater.

Consider the depth to which frost penetrated in designing footing and road bases.

Protect onsite sewage disposal systems for flooding.

If the soil is to be used as base for roads and streets, mix it with sand and gravel to increase its strength and stability.

RANGELAND

Dominant vegetation in potential natural plant community:

Big basin sagebrush, Wheat grasses and occasional horsetail, sedges

General management considerations:

MICROFILMED

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

NOS. 34-0301/0302

Notice is hereby given that Anthony E. Madsen, Arco, Idaho, has applied to the Department of Water Resources for a change in the place of use of the waters of the Big Lost River tributary to sinks. The rights sought to be changed are evidenced by decreed Right Nos. 34-0301/34-0302 and are recorded as follows:

AMOUNT: 3.00 cfs (34-0301)	PRIORITY: 5/01/1885
3.20 cfs (34-0302)	4/22/1889

POINT OF DIVERSION: SE $\frac{1}{4}$, Sec. 4, Twp. 5N, Rge. 26E, Butte County.

The water is used to irrigate 480 acres within the NW $\frac{1}{4}$, Sec. 14; E $\frac{1}{4}$, Sec. 15; Twp. 4N, Rge. 26E, B.M.

TO BE CHANGED AS FOLLOWS

Only 1.0 cfs of water from Right No. 34-0301 with the point of diversion within the SE $\frac{1}{4}$, Sec. 4, Twp. 5N, Rge. 26E will be used to irrigate 107 acres within the SE $\frac{1}{4}$, Sec. 15, Twp. 4N, Rge. 26E, B.M.

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 1515 Lincoln Road, Idaho Falls, Idaho, 83401 on or before January 21, 1980.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

The United States of America, acting through the BLM, objects to this water right recommendation because the claimant is a private individual claiming a water right on public domain lands. The BLM, on behalf of the United States, has managed and controlled this property for the beneficial use of the American public. The claimant has no property interest in the claimed water rights or any other water right appurtenant to federally owned lands. The United States objects to all aspects of the right because of these facts, including the recommended name and address, source, quantity, priority date, points of diversion, purpose of use, period of use, place of use, and consumptive use. BLM also objects to the recommendation in its entirety because the claimant has not been the exclusive beneficial user of this water given that other members of the public have had access to this land and water source. See Objection page 7.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Director's Report should be changed to recommend disallowance of this claim.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.
