

Evan Roda IDWR

Reference water license #95-12744

RECEIVED
MAR 01 2016
IDWR / NORTH

Good Morning Thank you for working with us the other day on all of our water permits and adjudication issues. Attached to this email is some information that should help you confirm that the water license #95-12744 was in beneficial use back in the 1950's or 1960s. I have tried to contact previous owners of this water license and all are deceased. Looking at the attached pictures note these items.

1. I removed the green Meyers & Bro pump from the end of the dock in 1984 and installed a new one as the old one was not operating properly. IE note the pictures it certainly had years of use prior to the time of 1984. I really don't know why I still have it other than it was hiding, leaning against the shop wall in the corner, maybe for this reason or my collecting old junk habit. I tried to track the age, but the Myers & Bro company does not exist.
2. Note the water line going up to the property and the condition of the irrigated areas.
3. Note the old electric line going to the pump via the pilings
4. Note the old black and white picture that shows the dock, cover, and another old boat house. The note on the bottom of the picture is the dock permit #33-372. That would make the dock built in the 1930's. I secured this picture from the Dept of Lands file.

We know that the orchard and area was watered from the dock for many years before our ownership. Thank you for all your assistance on our year of use.
