Subject: ATTN: Mariah R. Dunham: Coeur d'Alene-Spokane River Basin Adjudication Claim - 93-7664 (Anderson-Lutze)
Attachments: 93-7664_POD_&_POU_Question.pdf

Dear Ms. Dunham,

I am in the process of reviewing CSRBA late claims 93-7663 and 93-7664 in the name of Richard D Andersen and Faith E. Lutze. During my review, I ran into a question which I was hoping you could help with. My question is specifically concerning the claimed location of the Place of Use (POU) and Point of Diversion (POD) for [93-7664](#).

[93-7664](#) claims domestic and Stockwater use from a well drilled in 1998. However, the claimed well location does not appear to be close to any domestic structure I can see from the aerial photography. I have attached a map that shows the parcel (and QQ) that the claim indicates the well is located in (Light blue outline). The map also shows the location of a domestic structure that appears to be the home (red circle).

Could you please help clarify the location of the well (POD) that supplies the claimed domestic and Stockwater use as well as the location (POU) of the domestic and stock tanks or where the water is diverted for the stockwater use?

In addition, on the attached map I have also highlighted in yellow a triangle which shows the boundary of parcel RP43N04W010500. This is the 1st parcel identified as the Place of Use on the claim. The [county tax records \(pg 12\)](#) submitted with the claim also indicate that there is a domestic structure on RP43N04W010500. Yet, if you look at the map, it would appear that the domestic use is within parcel RP43N04W01040B.

With that said, regardless of which of the two parcels the home is located on, both parcels are located within the Government Lot 4, NENE, S1, which is what will be reflected as the place of use on the water right recommendation. But I thought I would bring this to your attention.

Any information you could provide regarding the place of use and point of diversion for 93-7664 would be very helpful.

Respectfully,

Craig L. Saxton
