13. Other Water Rights Used:

14. Remarks:

Priority Date Description: The water use is from a well installed in 1951. Groundwater has been used since that time to supply water to six homes. These six homes are still being supplied from this same source. The priority date was originally claimed on a Claim to Water Right submitted in 1982 (copy is supplied in documents). The priority date is related to the time water well was drilled and water began to be used. Documentation of the well being drilled on July 9, 1951 is included in documentation sent to the Water Resources for this file. These documents include signed treasures' reports for Leaning Pine Point (now known as Leaning Pine Inc.) documenting the cost distribution for the drilling the well and installation of the distribution system. Water has been withdrawn continuously from this groundwater source since 1951.

Description of Use: A well supplies water to an underground storage tank at the top of a nearby small hill. The water is then gravity-fed to six homes through an underground distribution system. It should be noted that some homeowners have two lots (as shown on POU, there are seven lots).
